

Percentage of High School Students Who Rarely or Never Wore a Seat Belt,* by Sex,[†] Grade, and Race/Ethnicity, 2017

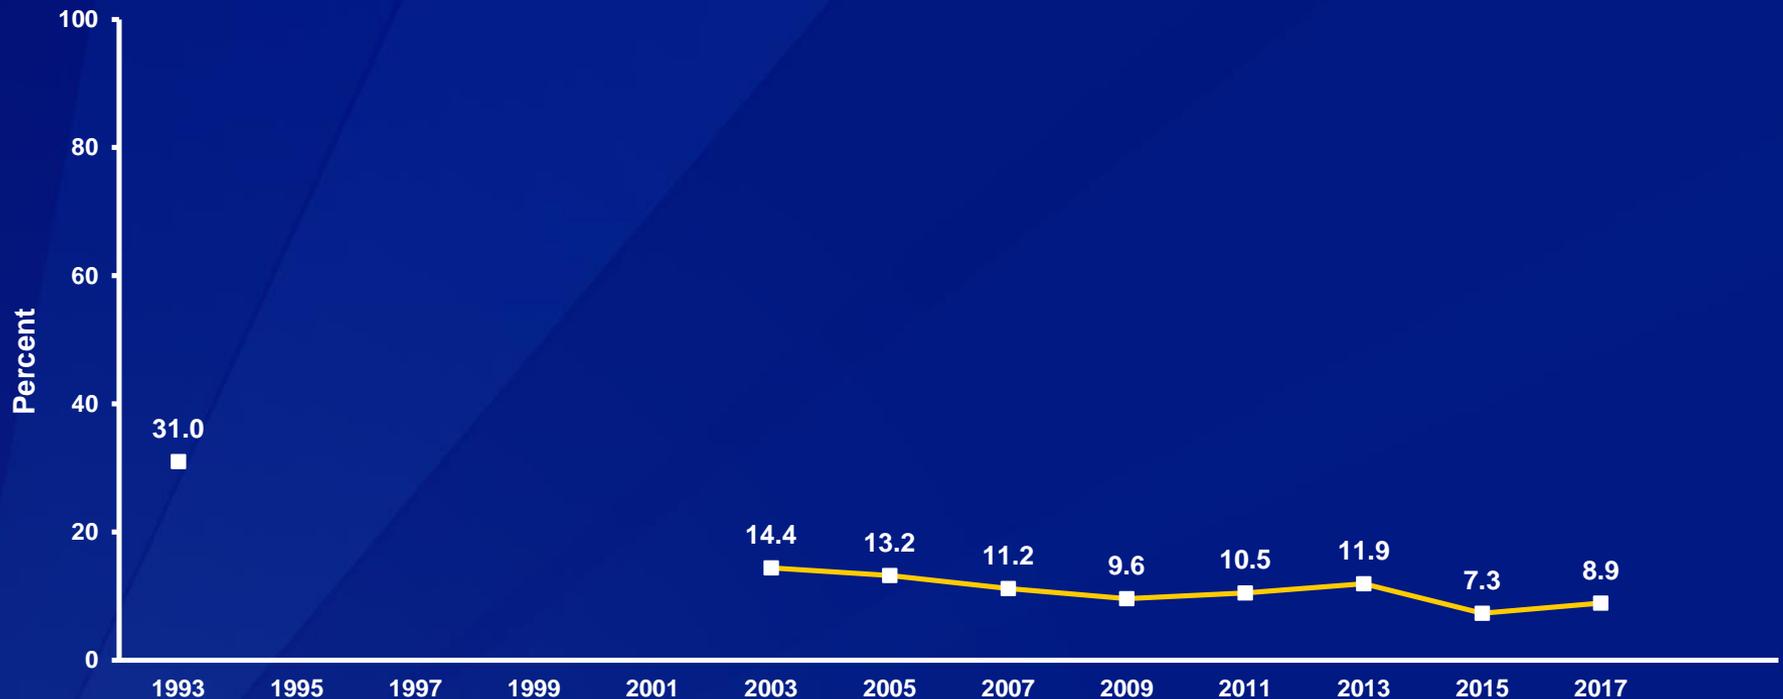

*When riding in a car driven by someone else

[†]M > F (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Rarely or Never Wore a Seat Belt,* 1993-2017†

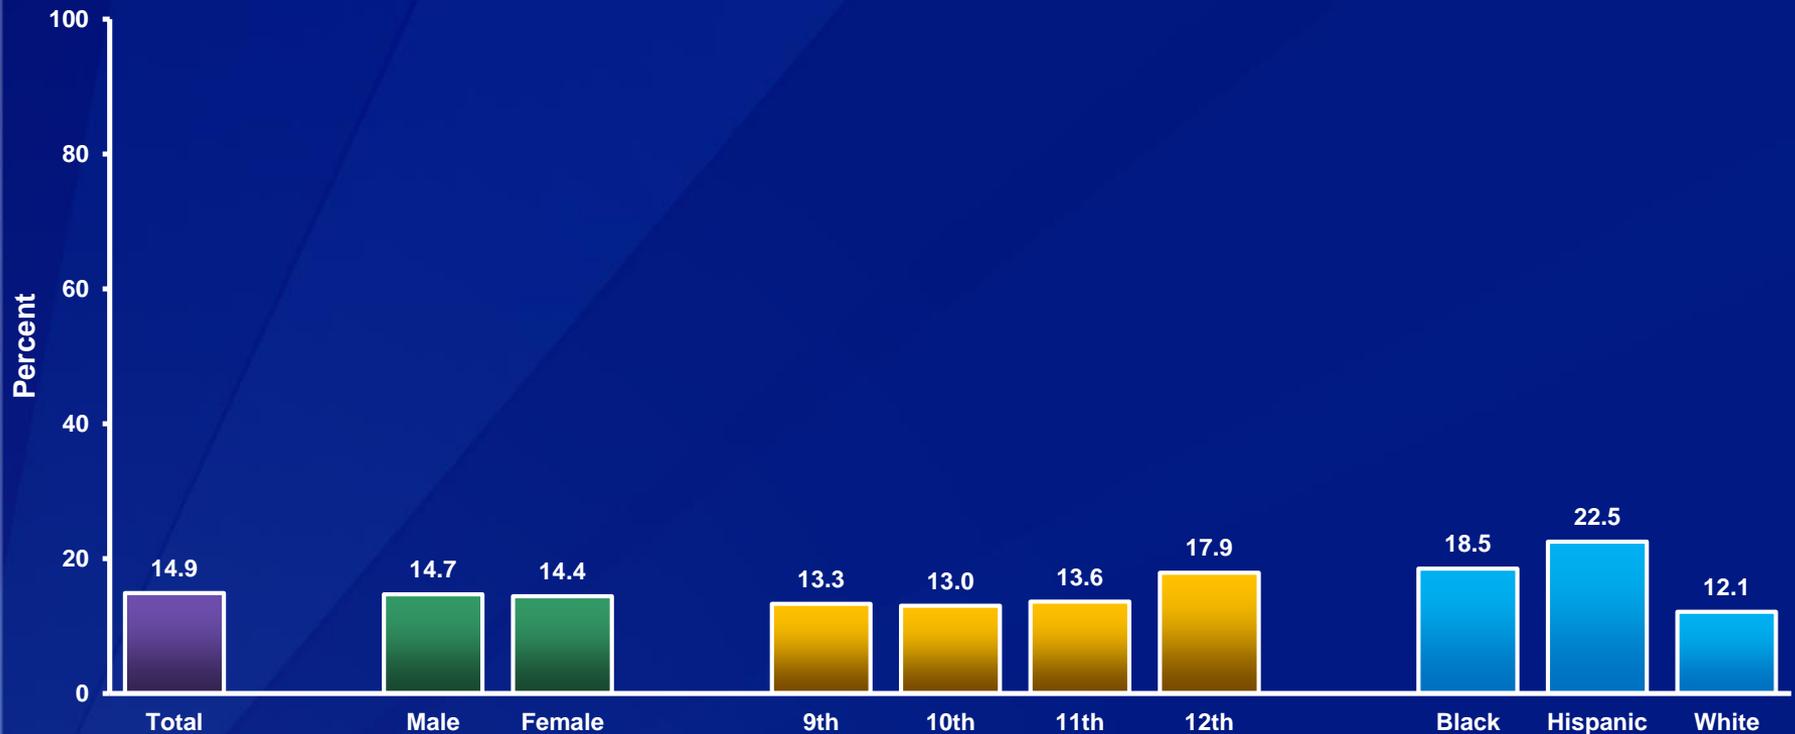

*When riding in a car driven by someone else

†Decreased 1993-2017, decreased 1993-2007, decreased 2007-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Rode with a Driver Who Had Been Drinking Alcohol,* by Sex, Grade,† and Race/Ethnicity,† 2017

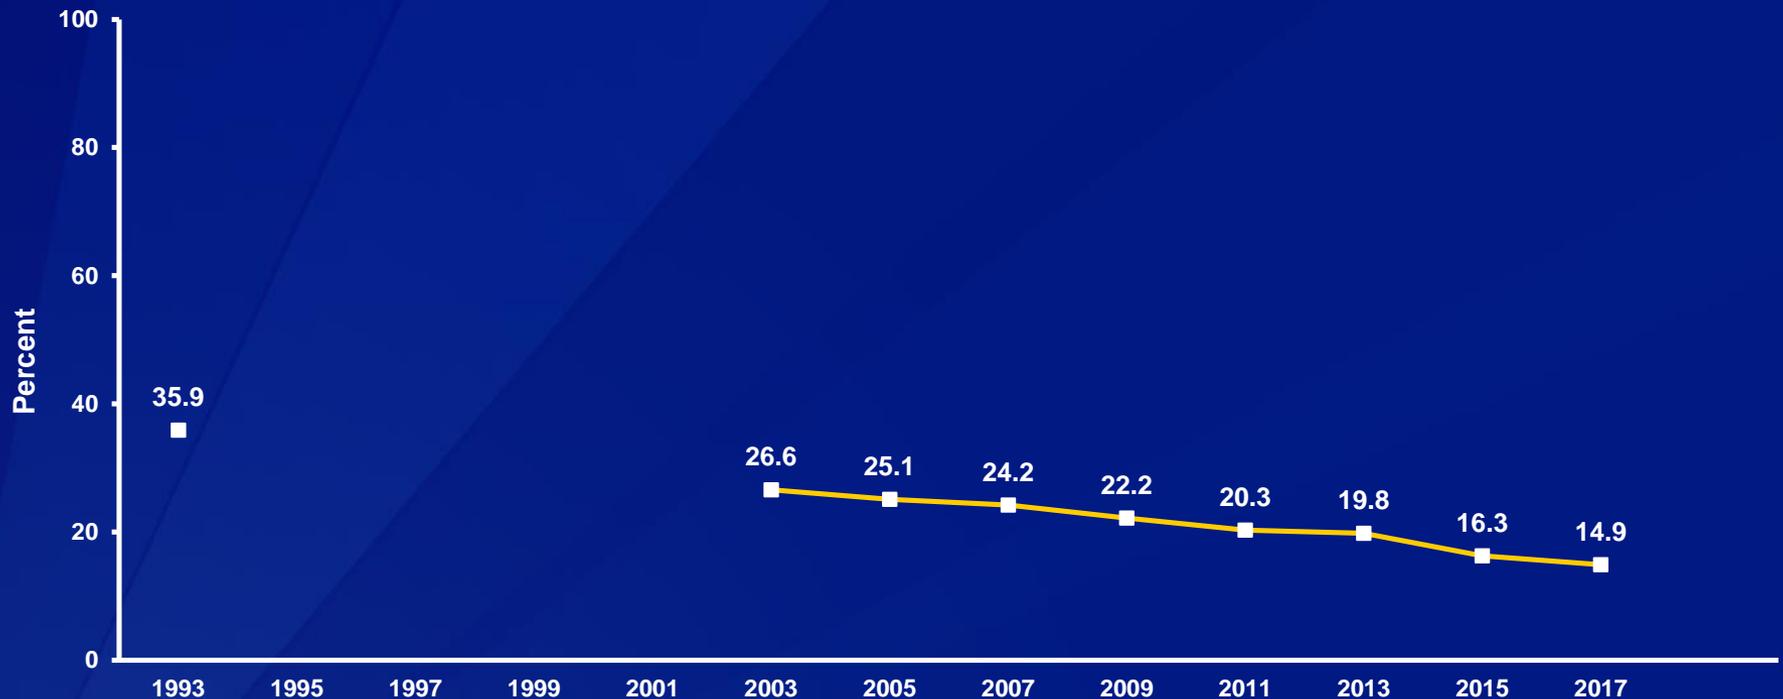

*In a car or other vehicle, one or more times during the 30 days before the survey

†12th > 11th; B > W, H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Rode with a Driver Who Had Been Drinking Alcohol,* 1993-2017†

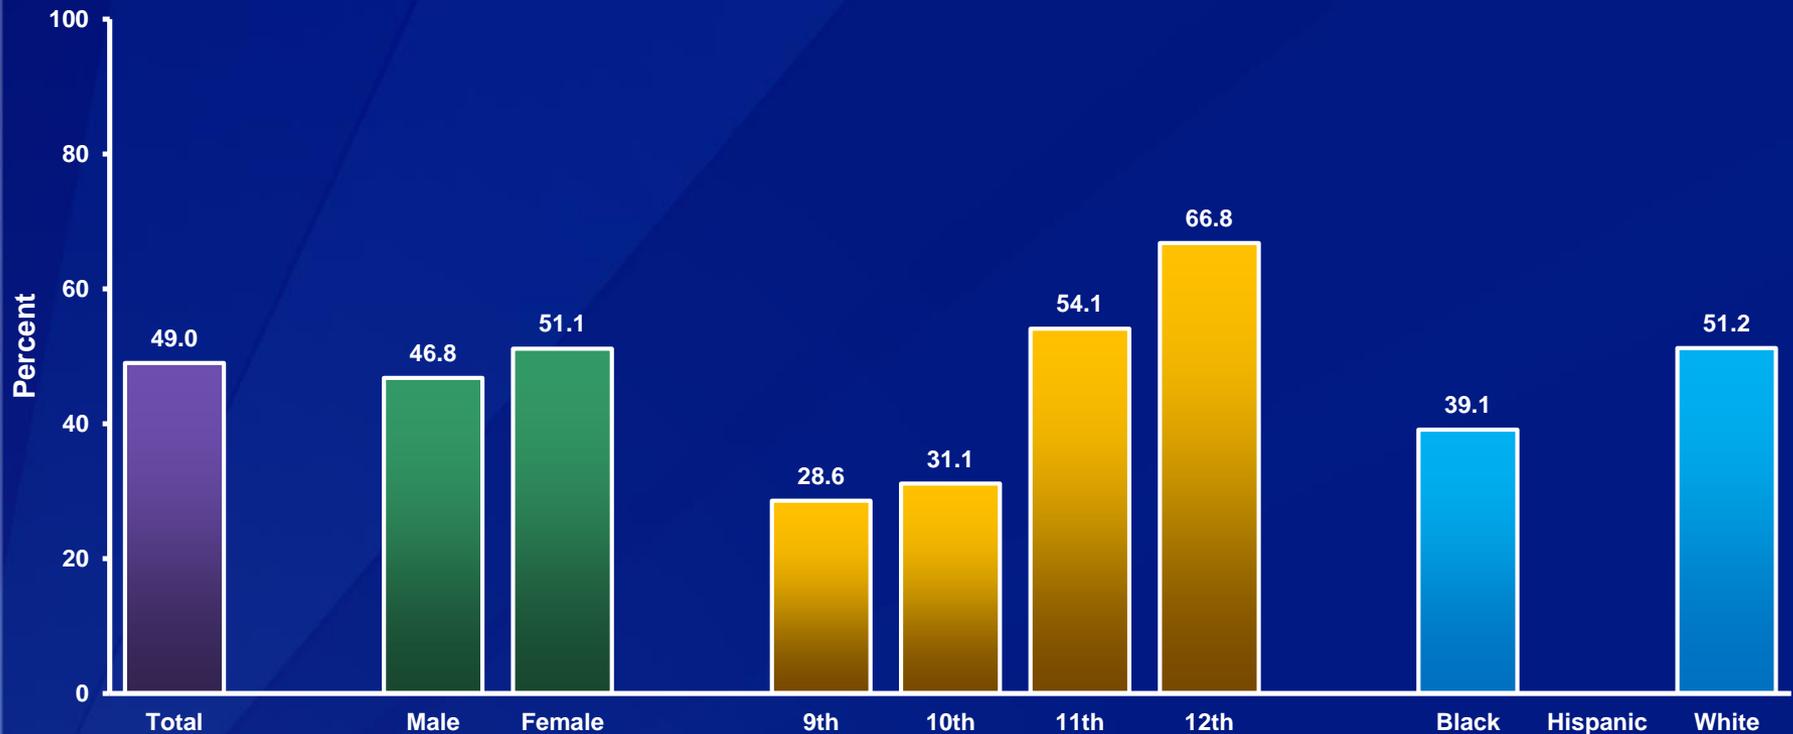

*In a car or other vehicle, one or more times during the 30 days before the survey

†Decreased 1993-2017, decreased 1993-2013, decreased 2013-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Texted or E-Mailed While Driving a Car or Other Vehicle,* by Sex, Grade,† and Race/Ethnicity,† 2017

*On at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

†11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th, 12th > 11th; W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in this subgroup.

Note: This graph contains weighted results.

Percentage of High School Students Who Texted or E-Mailed While Driving a Car or Other Vehicle,* 2013-2017[†]

*On at least 1 day during the 30 days before the survey, among students who had driven a car or other vehicle during the 30 days before the survey

[†]No change 2013-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Note: This graph contains weighted results.

Percentage of High School Students Who Carried a Weapon,* by Sex,† Grade, and Race/Ethnicity,† 2017

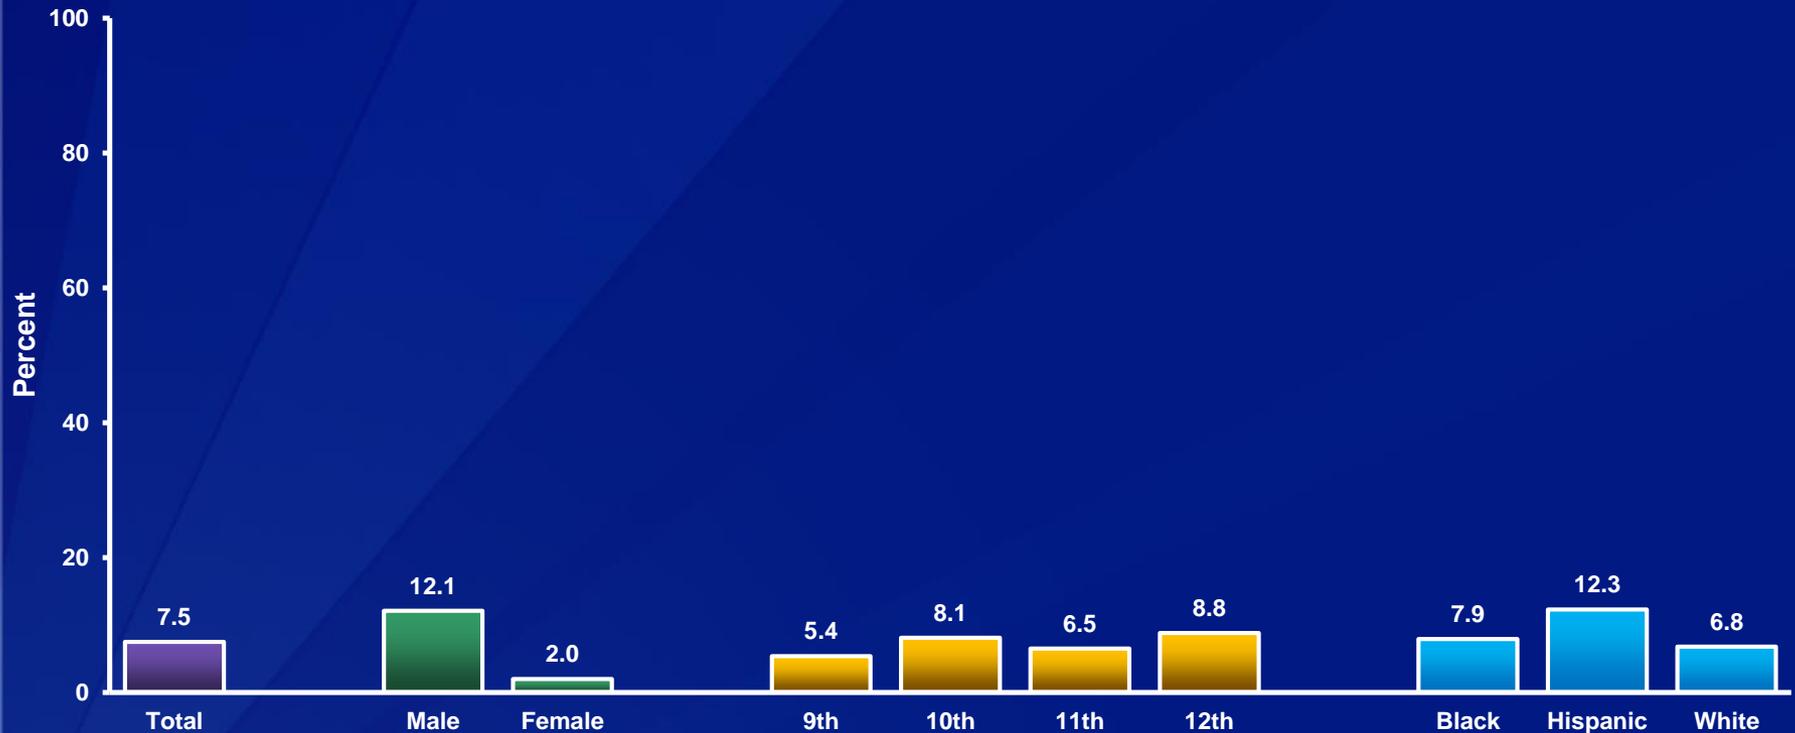

*Such as a gun, knife, or club, on at least 1 day during the 30 days before the survey

†M > F; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Carried a Gun,* by Sex,† Grade,† and Race/Ethnicity,† 2017

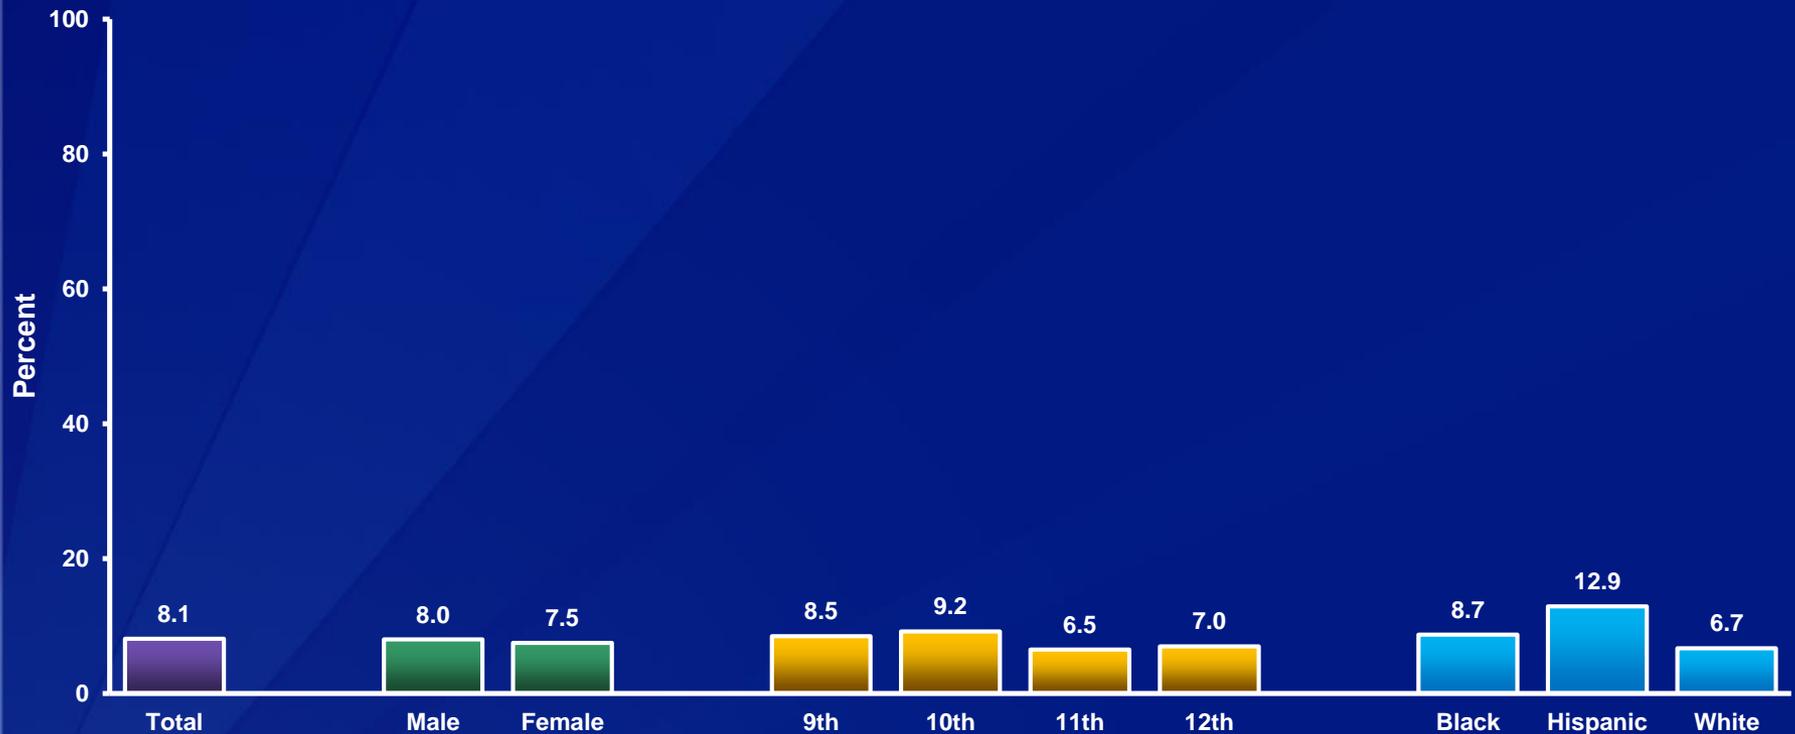

*Not counting the days when they carried a gun only for hunting or for a sport such as target shooting, on at least 1 day during the 12 months before the survey

†M > F; 10th > 9th, 12th > 9th; H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Go to School Because They Felt Unsafe at School or on Their Way to or from School,* by Sex, Grade, and Race/Ethnicity,† 2017

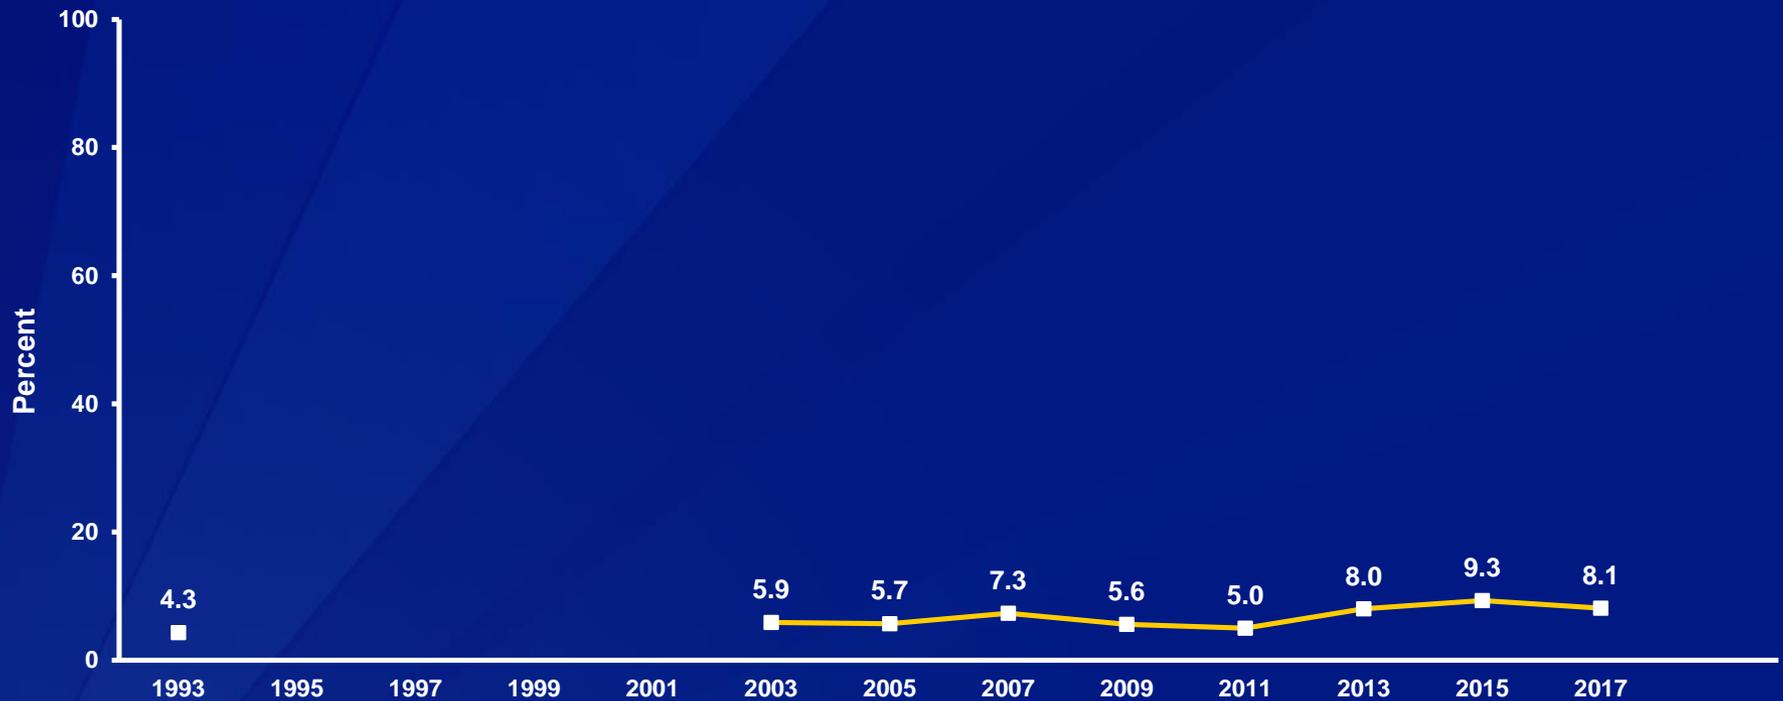

*On at least 1 day during the 30 days before the survey

†H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Go to School Because They Felt Unsafe at School or on Their Way to or from School,* 1993-2017†

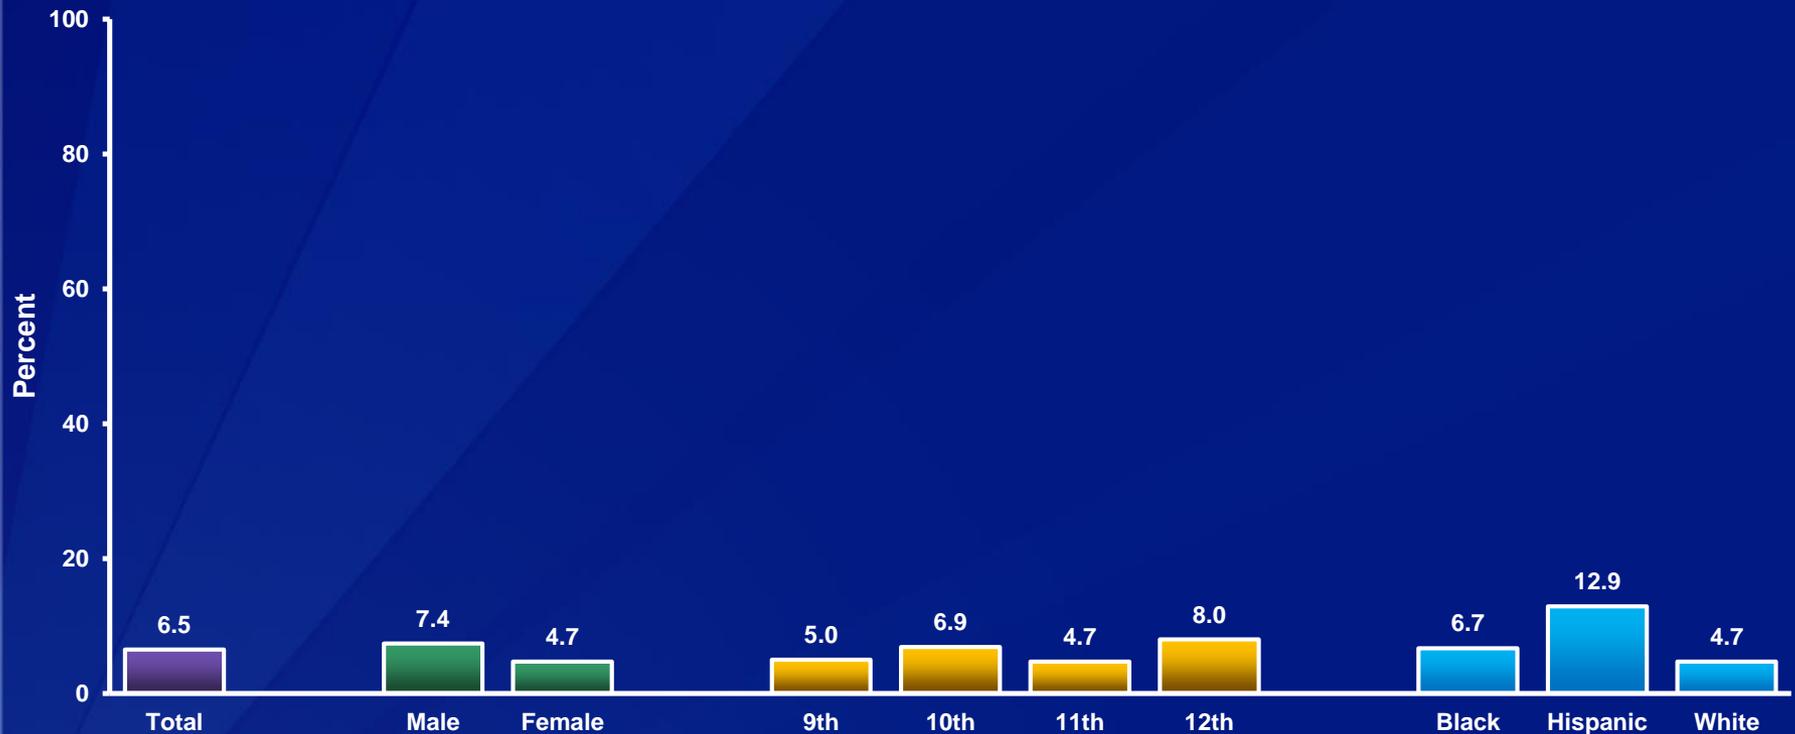

*On at least 1 day during the 30 days before the survey

†Increased 1993-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Threatened or Injured with a Weapon on School Property,* by Sex,† Grade, and Race/Ethnicity,† 2017

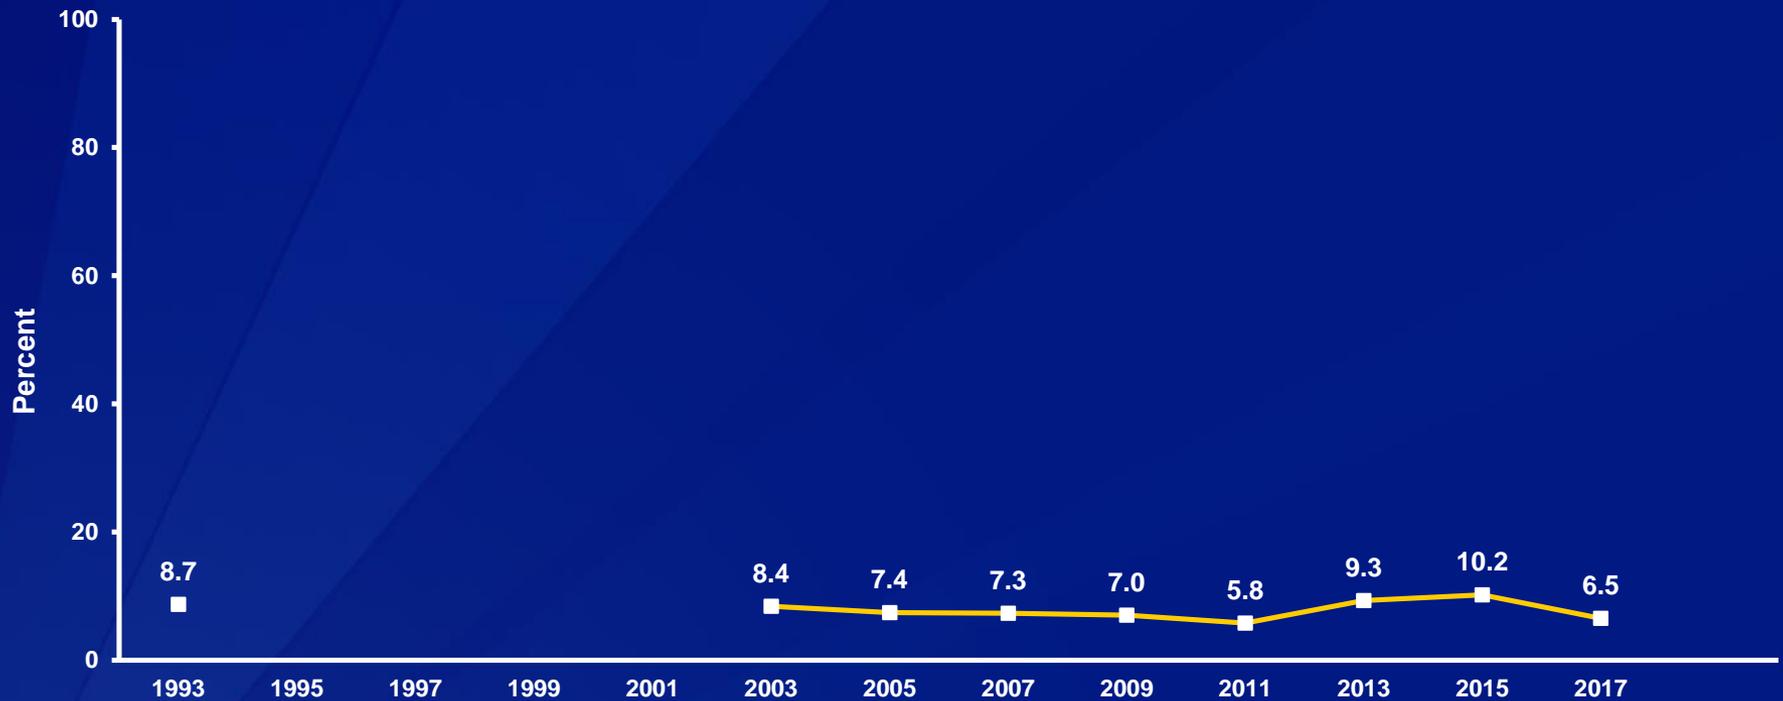

*Such as a gun, knife, or club, one or more times during the 12 months before the survey

†M > F; H > B, H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Threatened or Injured with a Weapon on School Property,* 1993-2017[†]

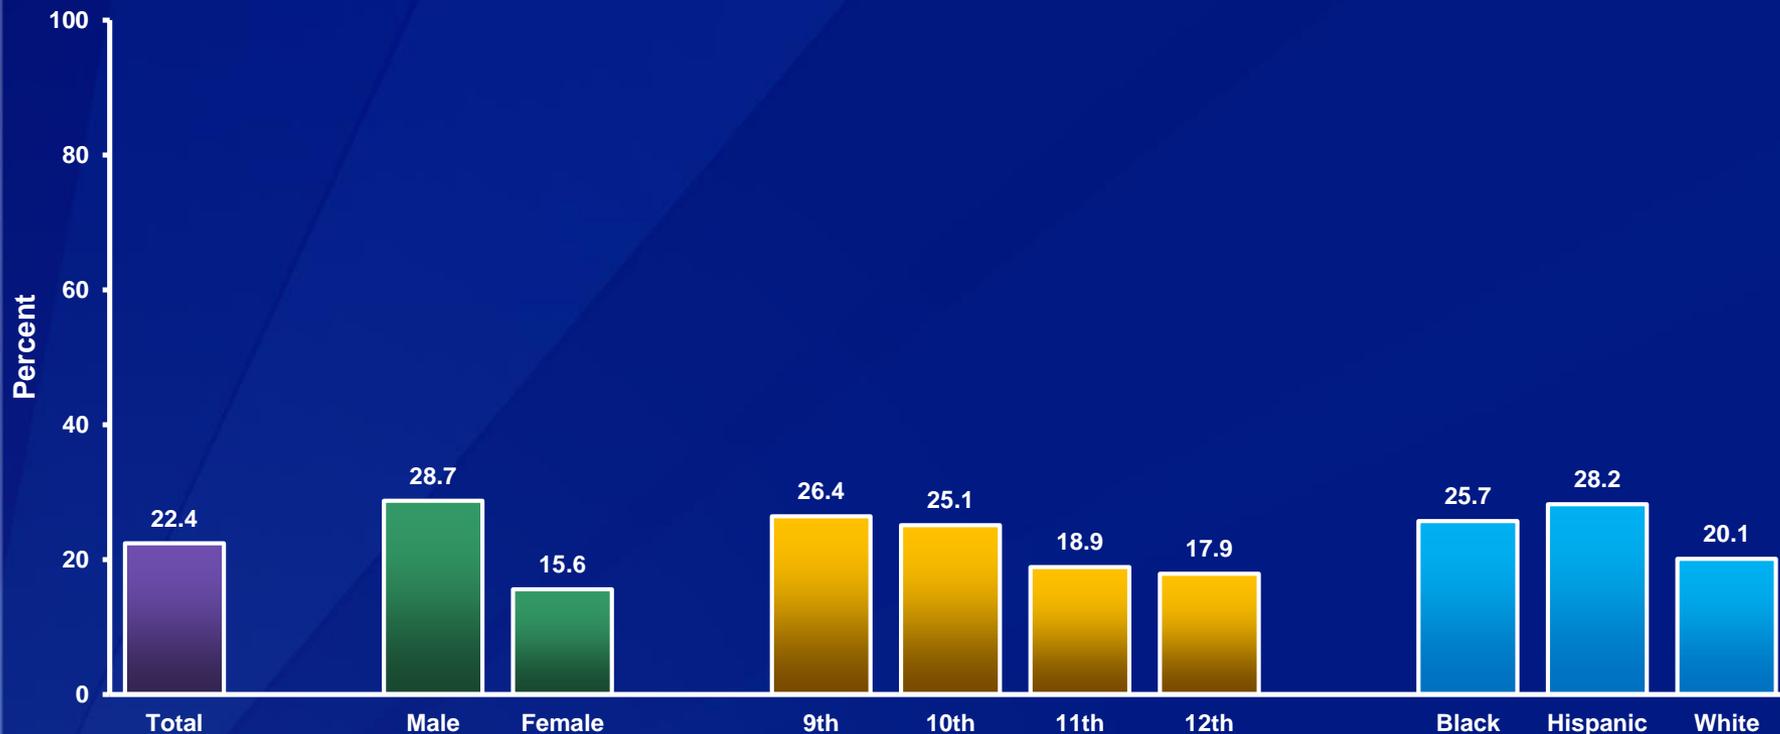

*Such as a gun, knife, or club, one or more times during the 12 months before the survey

[†]Decreased 1993-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Were in a Physical Fight,* by Sex,† Grade,† and Race/Ethnicity, 2017

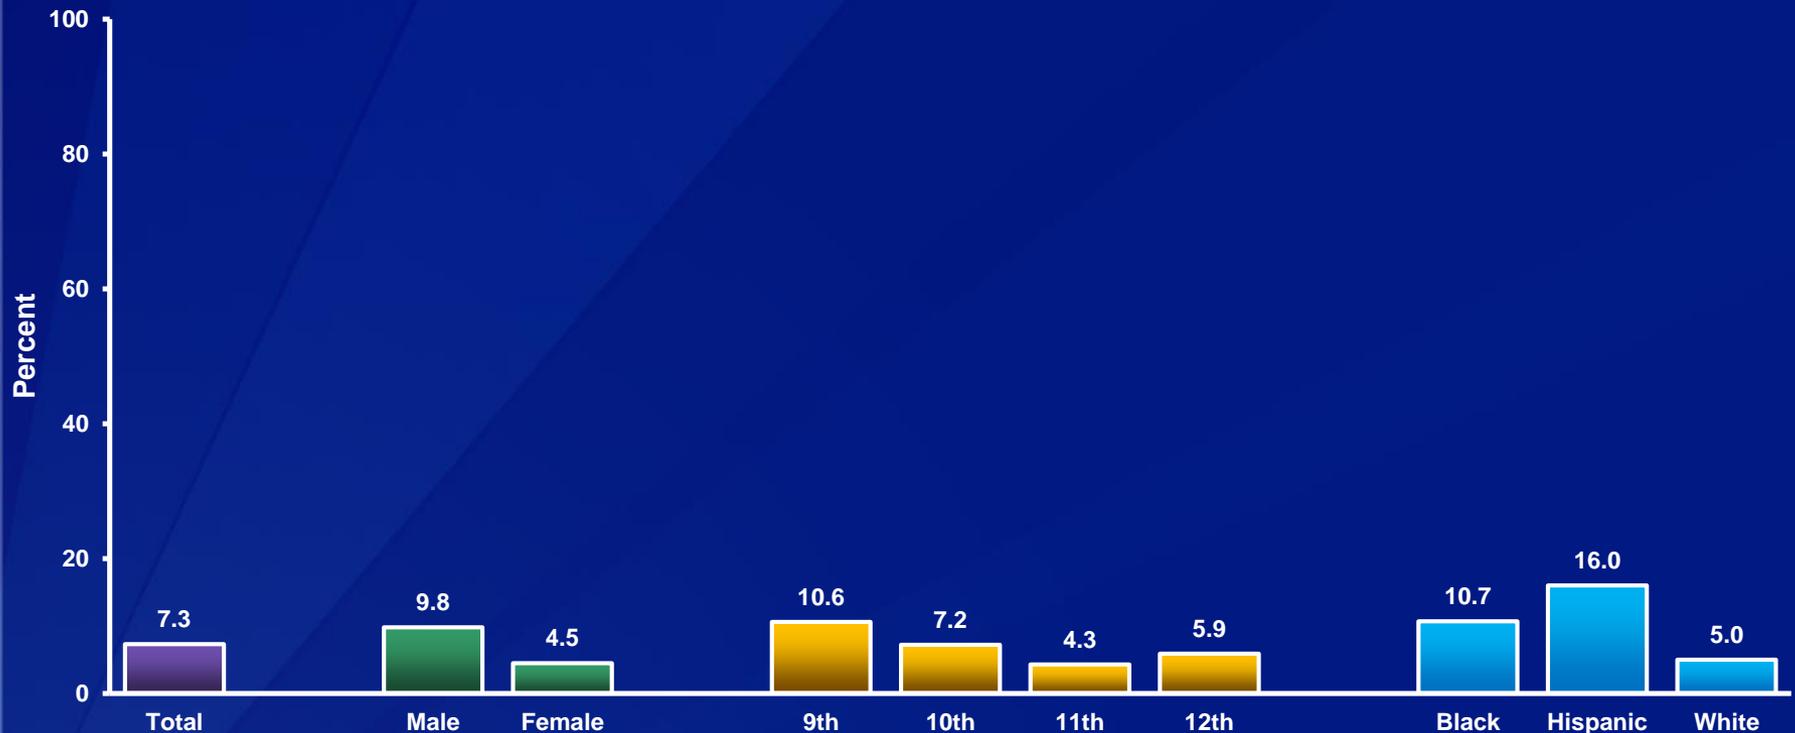

*One or more times during the 12 months before the survey

†M > F; 9th > 12th, 10th > 12th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were in a Physical Fight on School Property,* by Sex,† Grade,† and Race/Ethnicity,† 2017

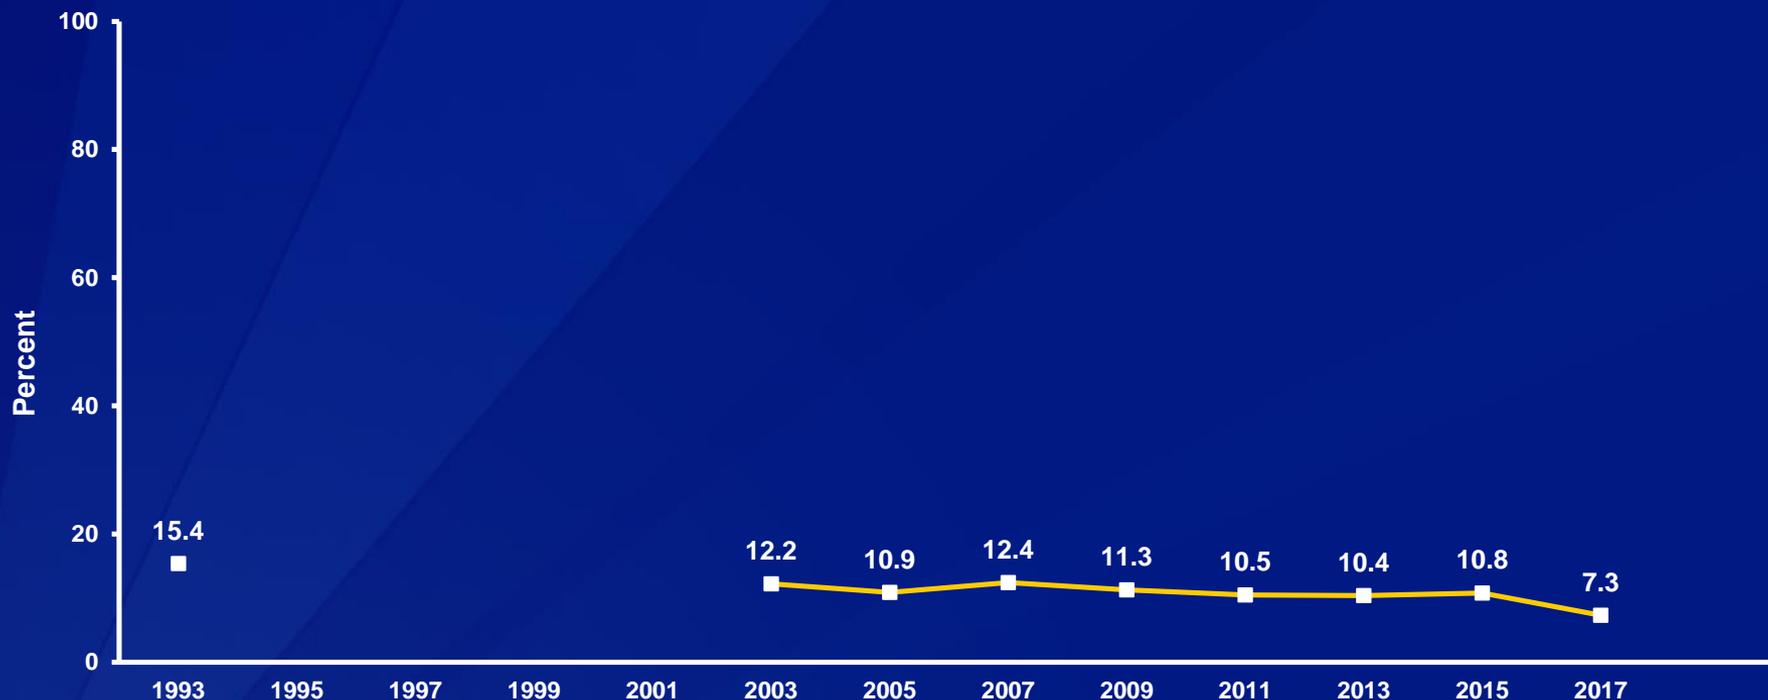

*One or more times during the 12 months before the survey

†M > F; 9th > 11th, 9th > 12th; H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were in a Physical Fight on School Property,* 1993-2017†

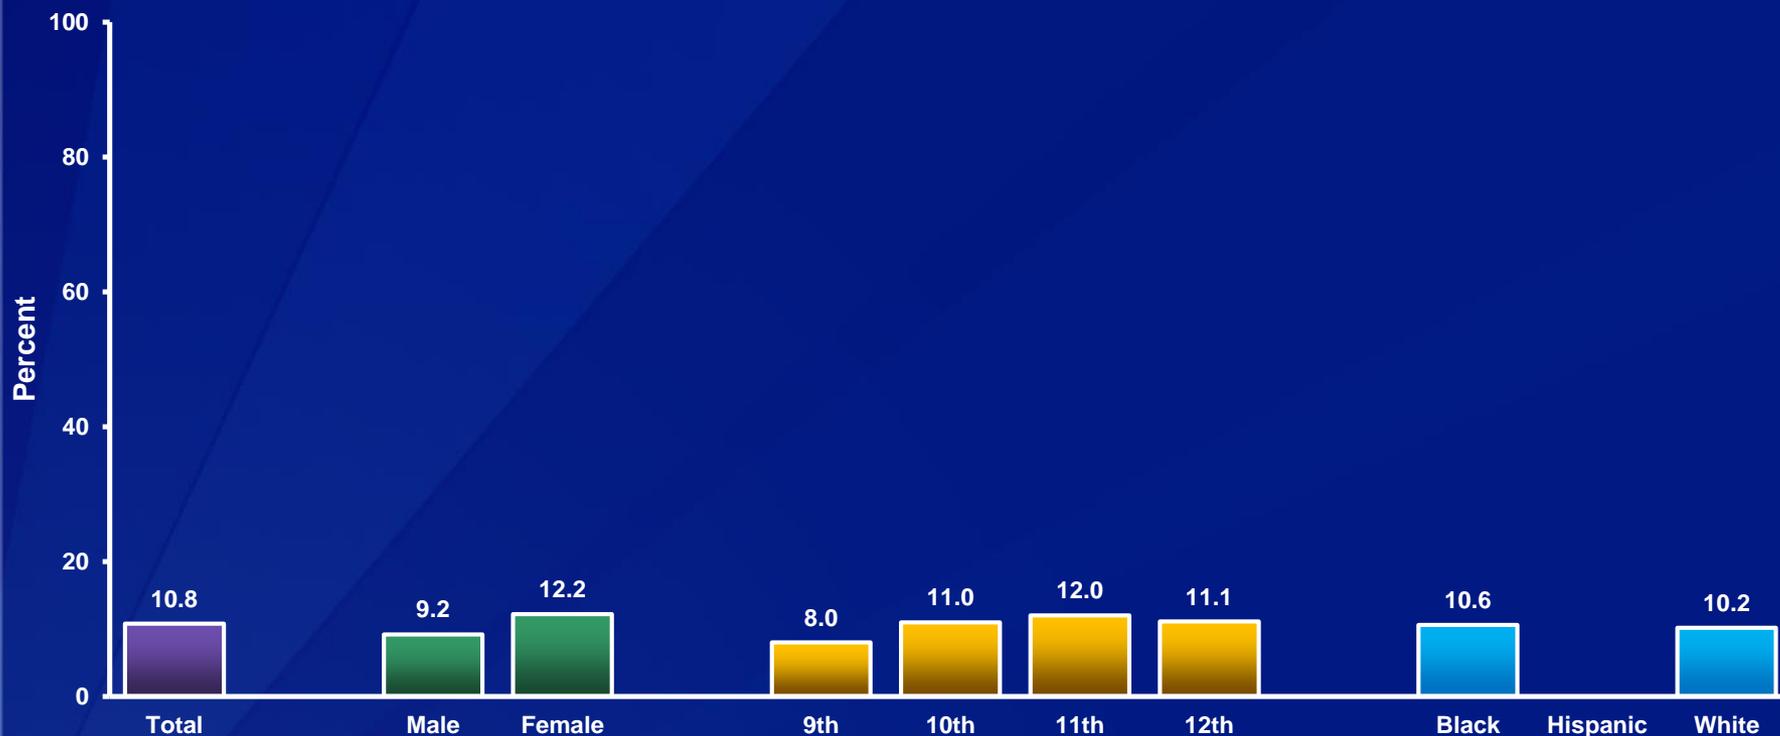

*One or more times during the 12 months before the survey

†Decreased 1993-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Experienced Physical Dating Violence,* by Sex, Grade, and Race/Ethnicity, 2017

*Being physically hurt on purpose by someone they were dating or going out with [counting such things as being hit, slammed into something, or injured with an object or weapon] one or more times during the 12 months before the survey, among students who dated or went out with someone during the 12 months before the survey

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in this subgroup.

Note: This graph contains weighted results.

Percentage of High School Students Who Experienced Physical Dating Violence,* 2013-2017[†]

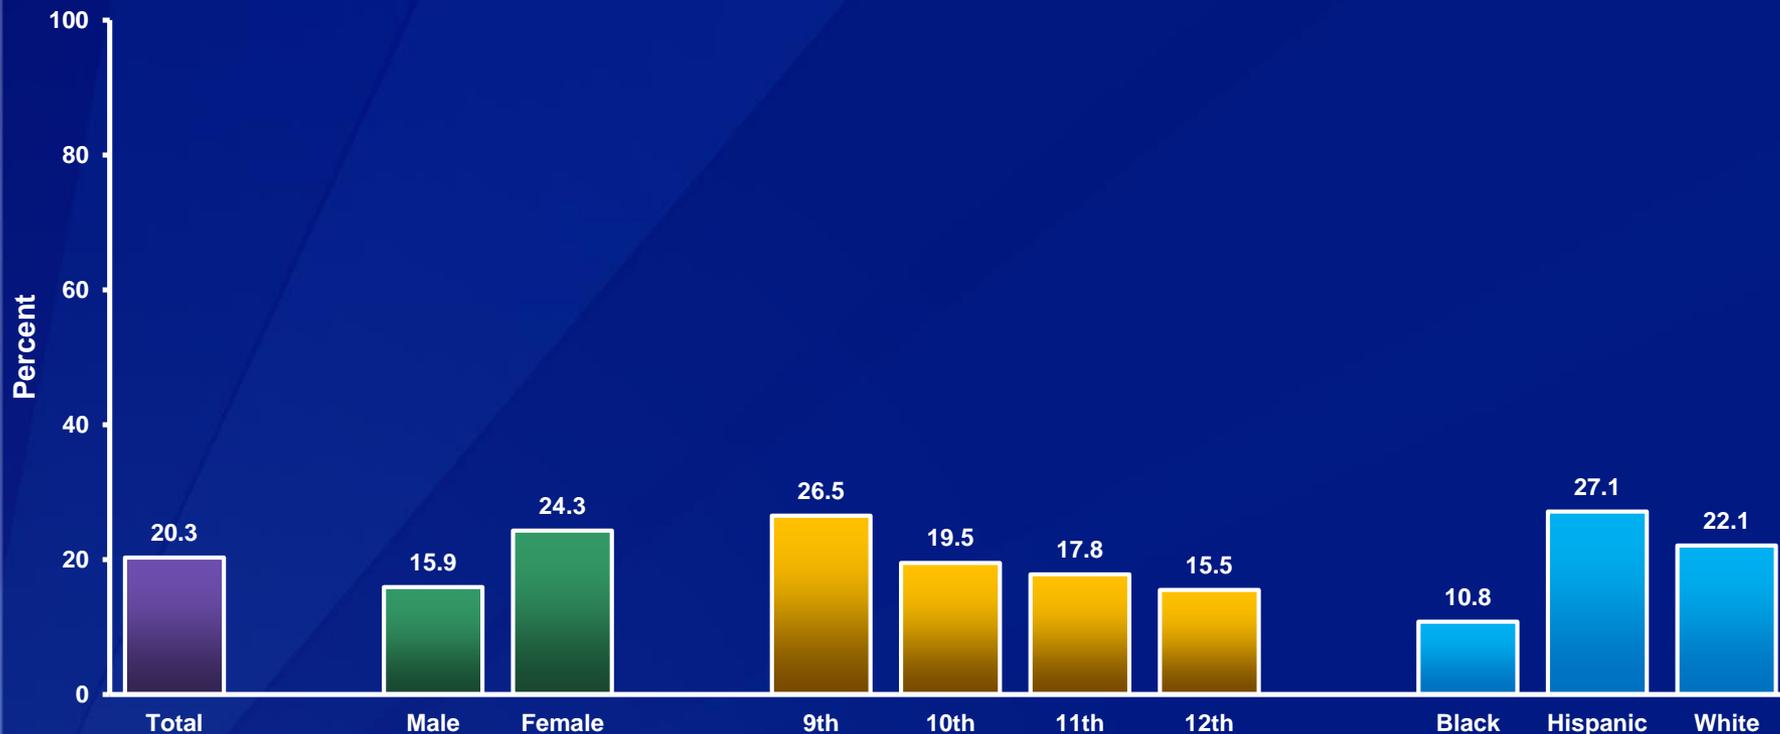

*Being physically hurt on purpose by someone they were dating or going out with [counting such things as being hit, slammed into something, or injured with an object or weapon] one or more times during the 12 months before the survey, among students who dated or went out with someone during the 12 months before the survey

[†]No change 2013-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Note: This graph contains weighted results.

Percentage of High School Students Who Were Bullied on School Property,* by Sex,[†] Grade,[†] and Race/Ethnicity,[†] 2017

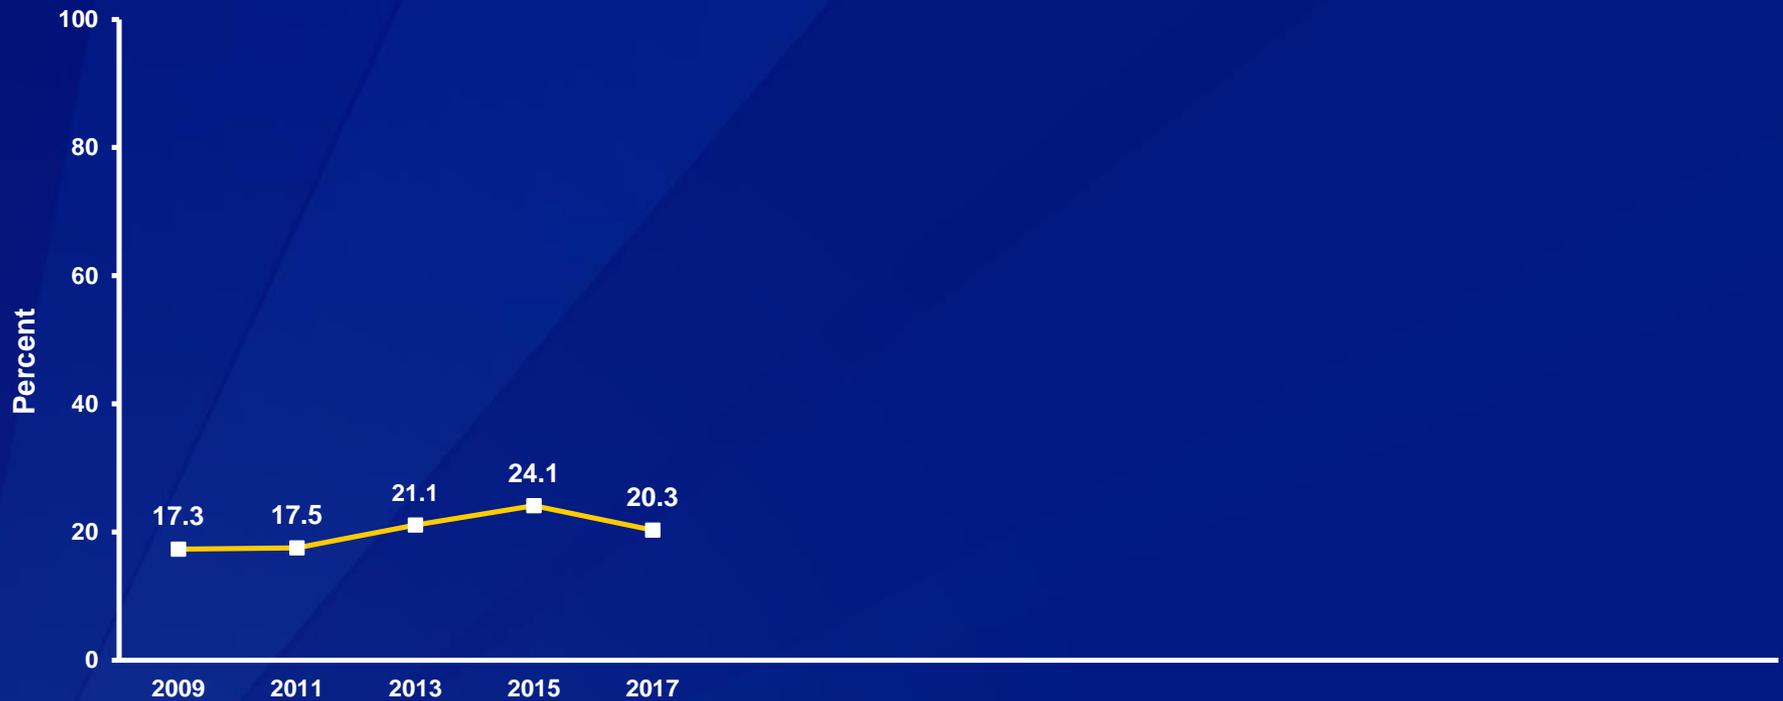

*Ever during the 12 months before the survey

[†]F > M; 9th > 11th, 9th > 12th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Bullied on School Property,* 2009-2017†

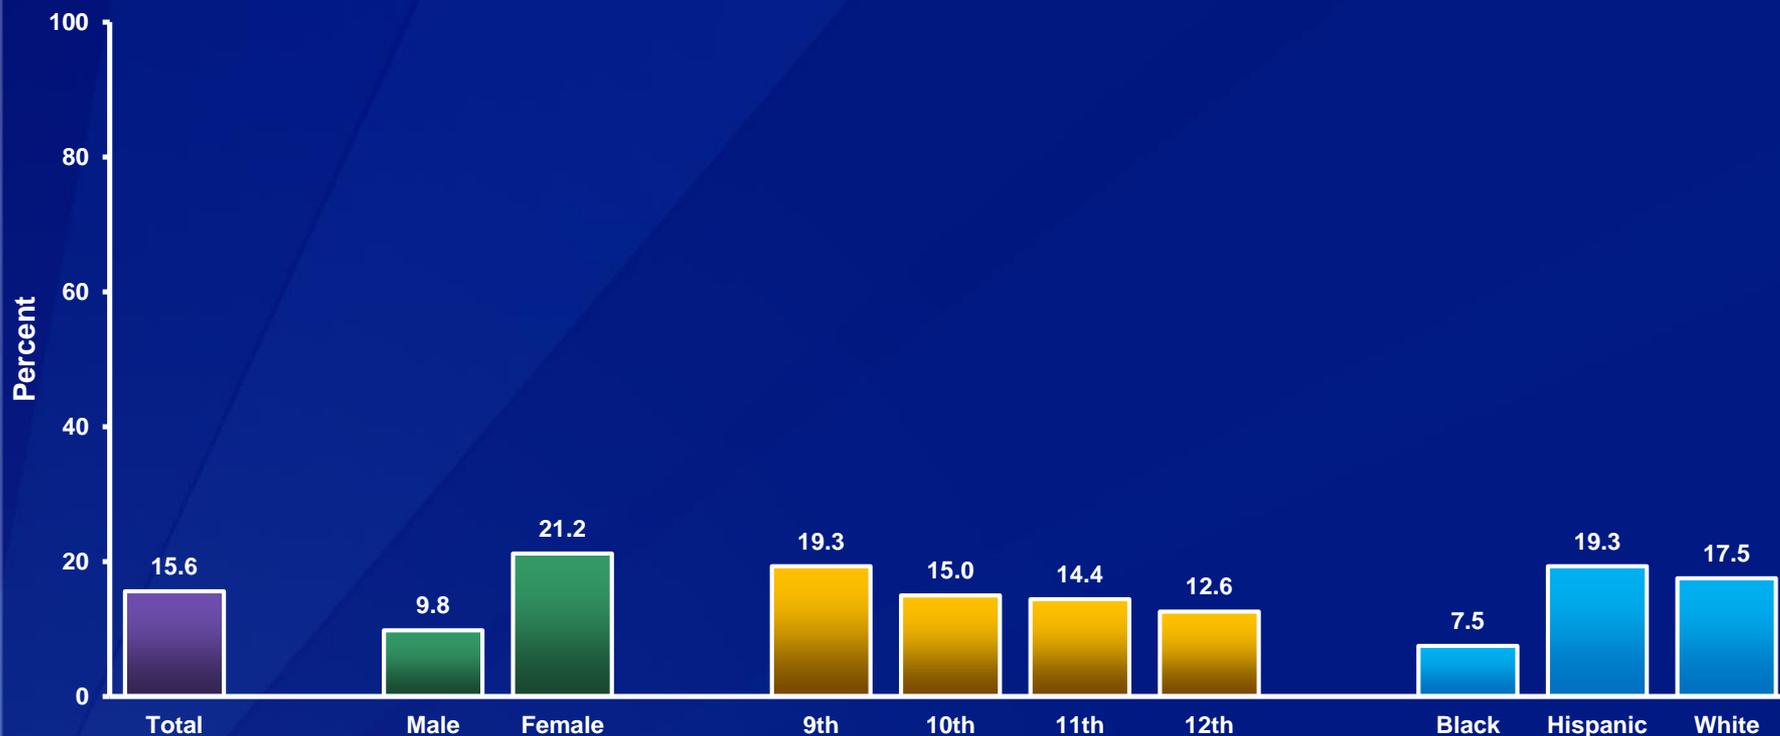

*Ever during the 12 months before the survey

†Increased 2009-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Note: This graph contains weighted results.

Percentage of High School Students Who Were Electronically Bullied,* by Sex,[†] Grade,[†] and Race/Ethnicity,[†] 2017

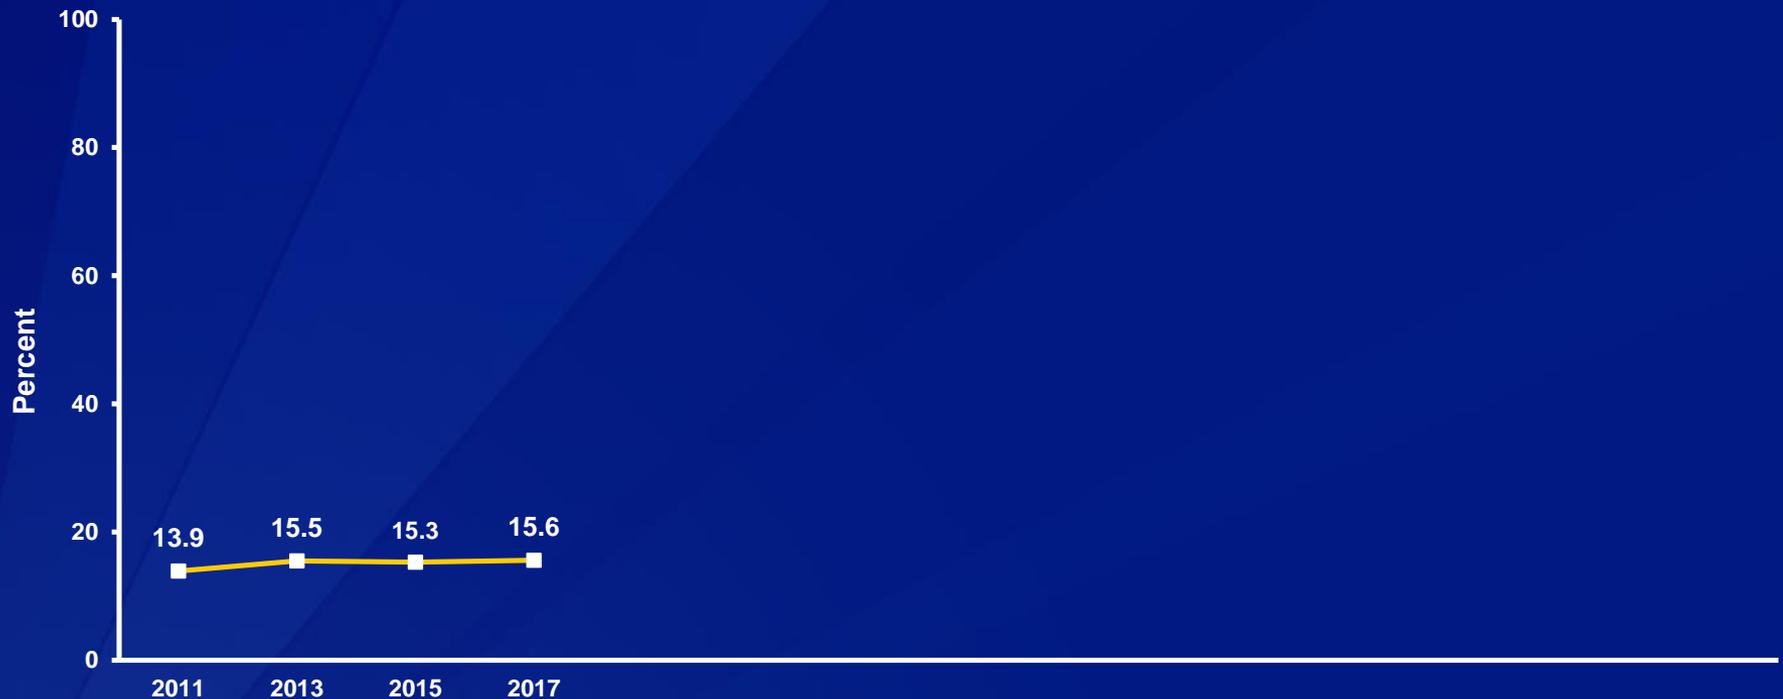

*Counting being bullied through texting, Instagram, Facebook, or other social media, ever during the 12 months before the survey

[†]F > M; 9th > 12th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Electronically Bullied,* 2011-2017†

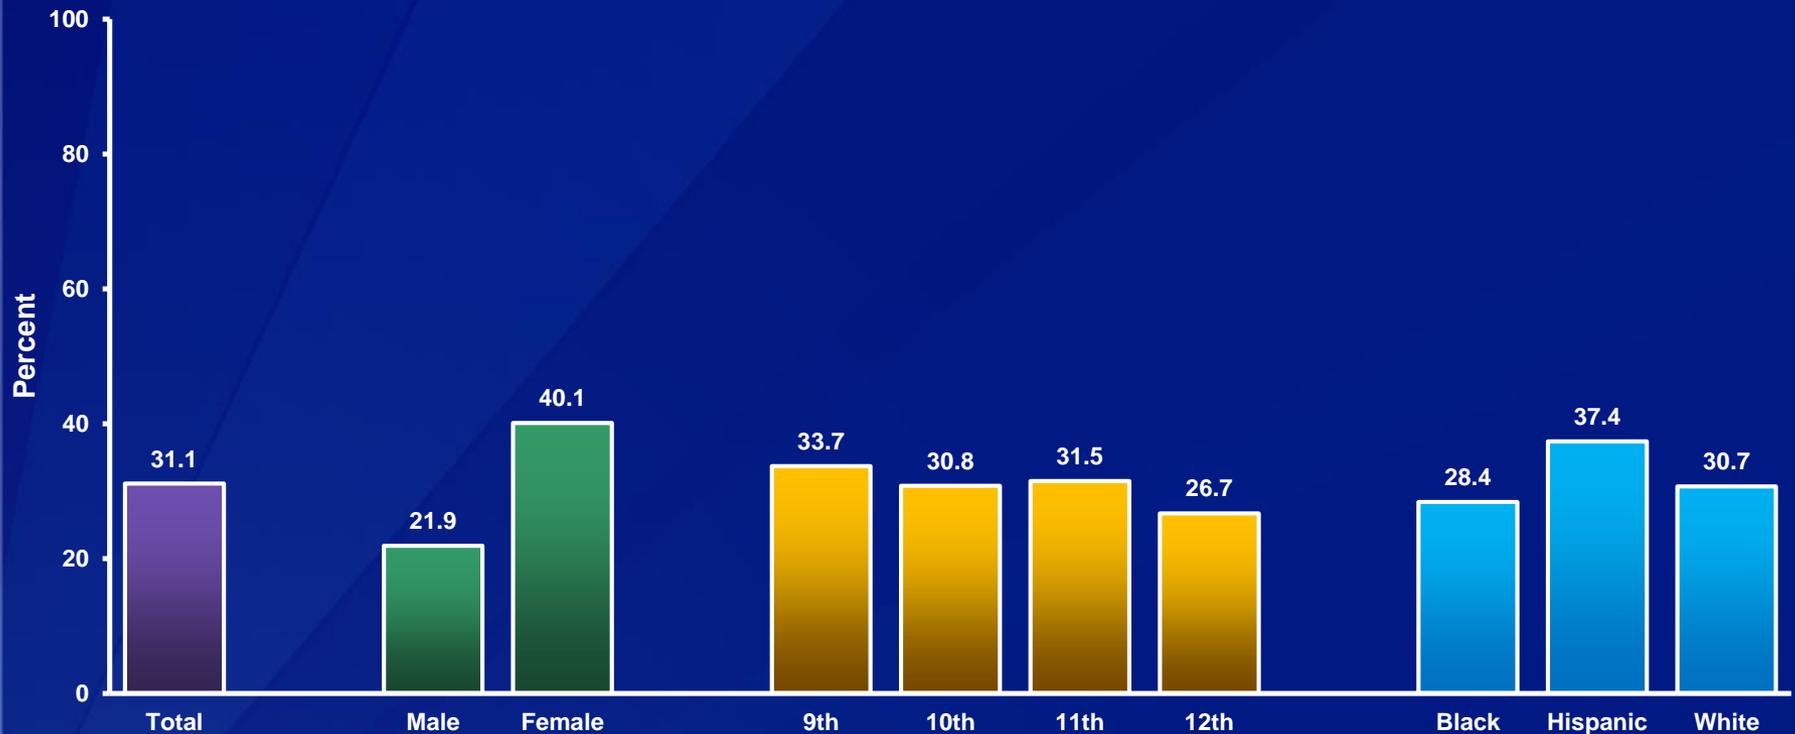

*Counting being bullied through texting, Instagram, Facebook, or other social media, ever during the 12 months before the survey

†No change 2011-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Note: This graph contains weighted results.

Percentage of High School Students Who Felt Sad or Hopeless,* by Sex,† Grade, and Race/Ethnicity, 2017

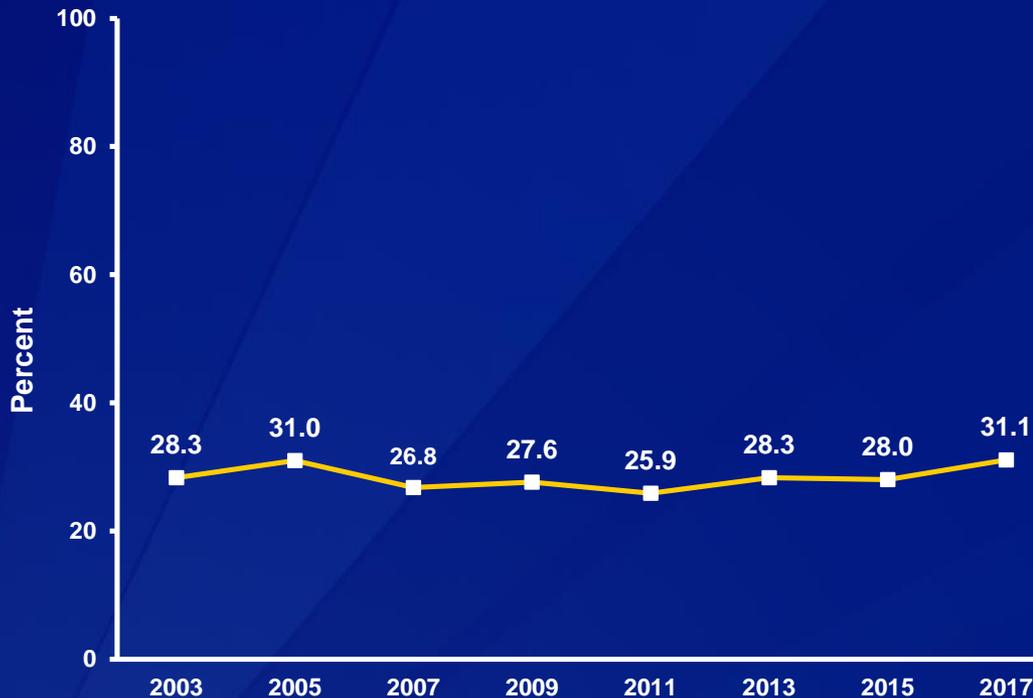

*Almost every day for ≥ 2 weeks in a row so that they stopped doing some usual activities, ever during the 12 months before the survey

†F > M (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Felt Sad or Hopeless,* 2003-2017†

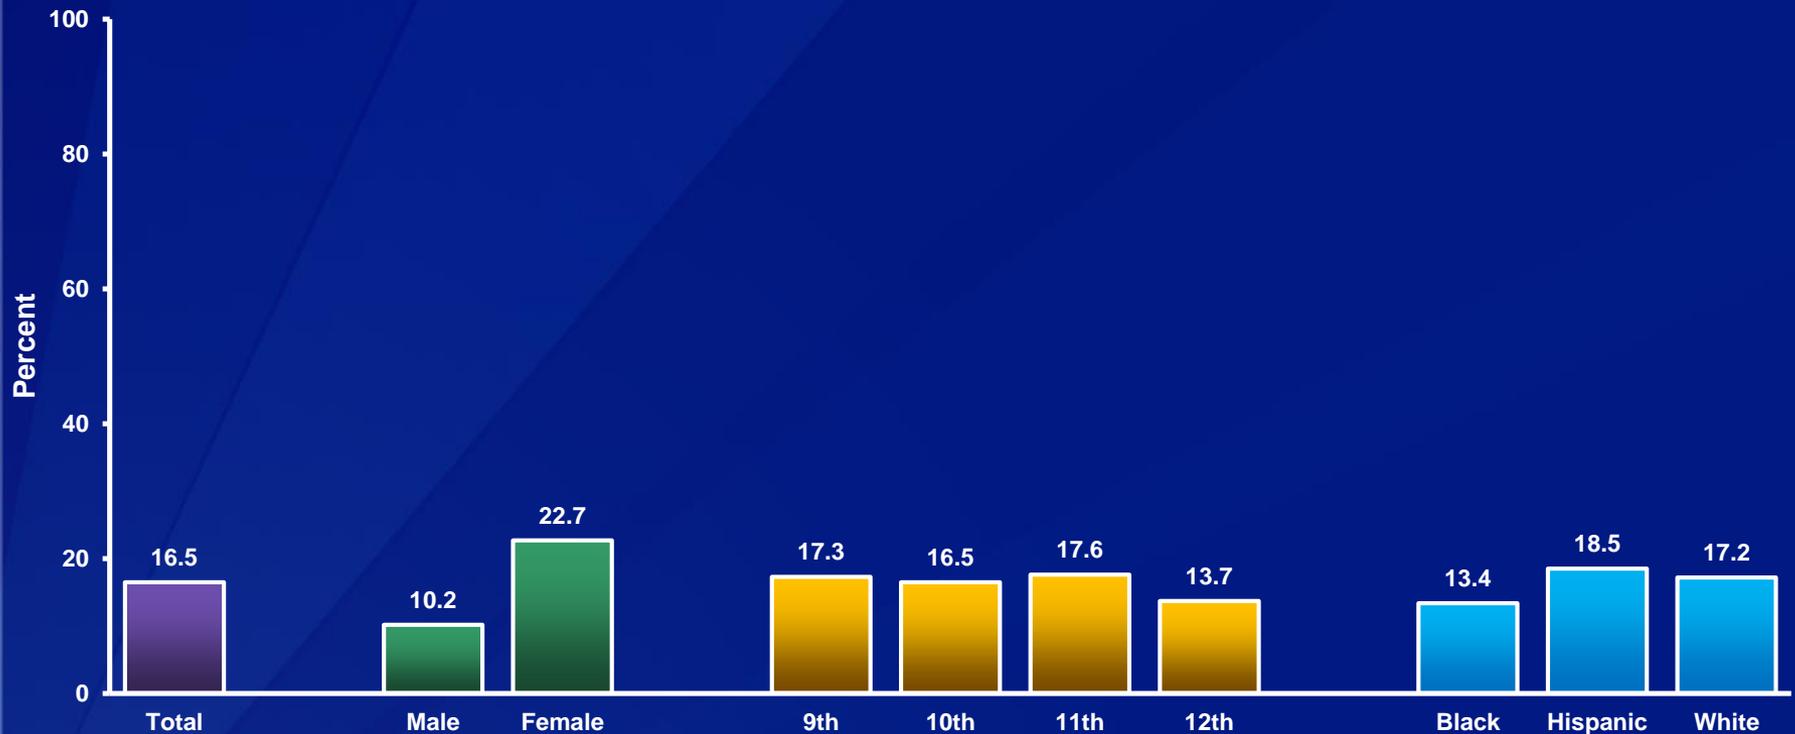

*Almost every day for ≥ 2 weeks in a row so that they stopped doing some usual activities, ever during the 12 months before the survey

†Decreased, 2003-2011, increased, 2011-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Seriously Considered Attempting Suicide,* by Sex,† Grade, and Race/Ethnicity, 2017

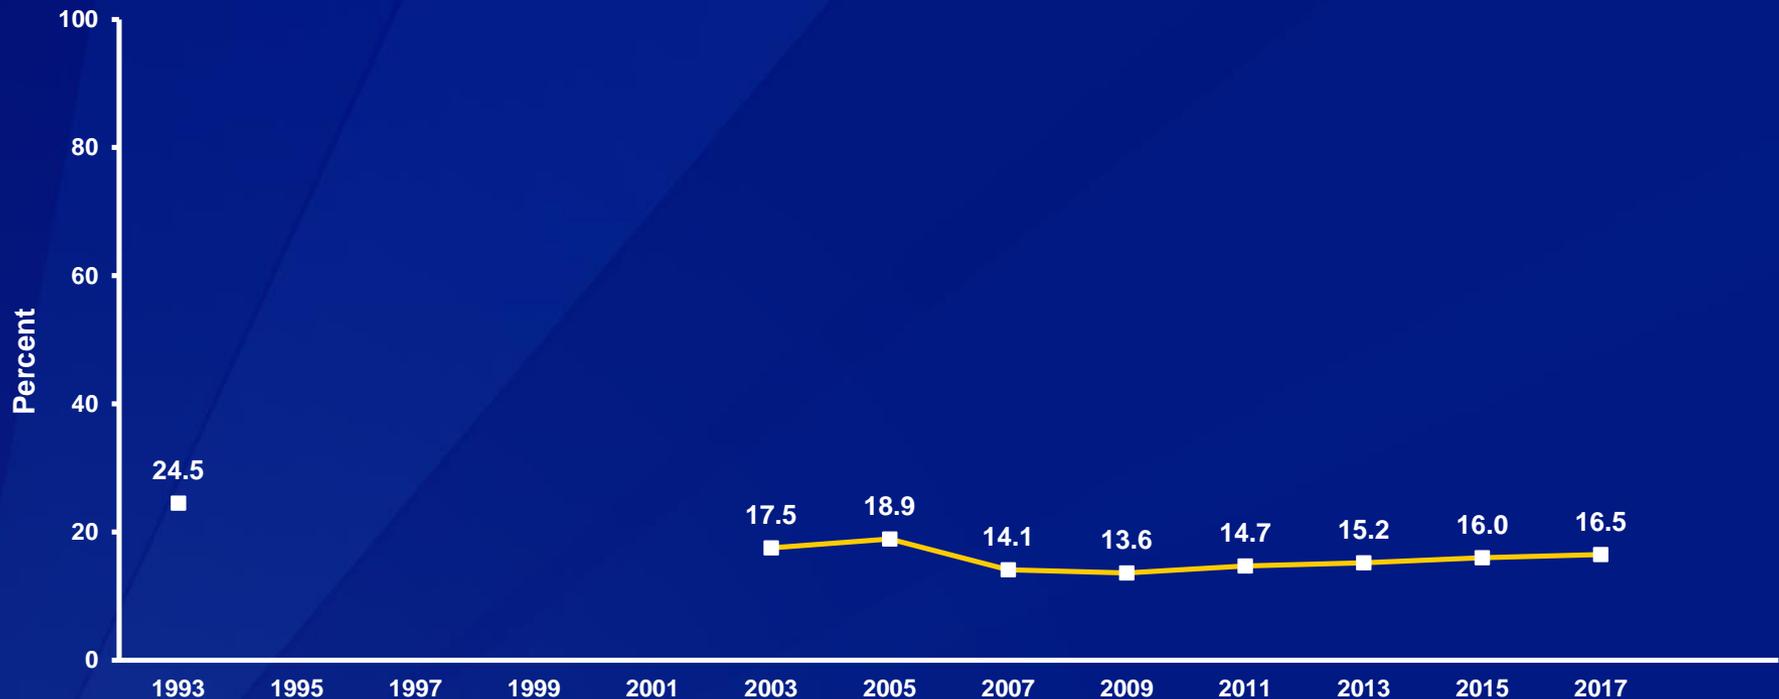

*Ever during the 12 months before the survey

†F > M (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Seriously Considered Attempting Suicide,* 1993-2017[†]

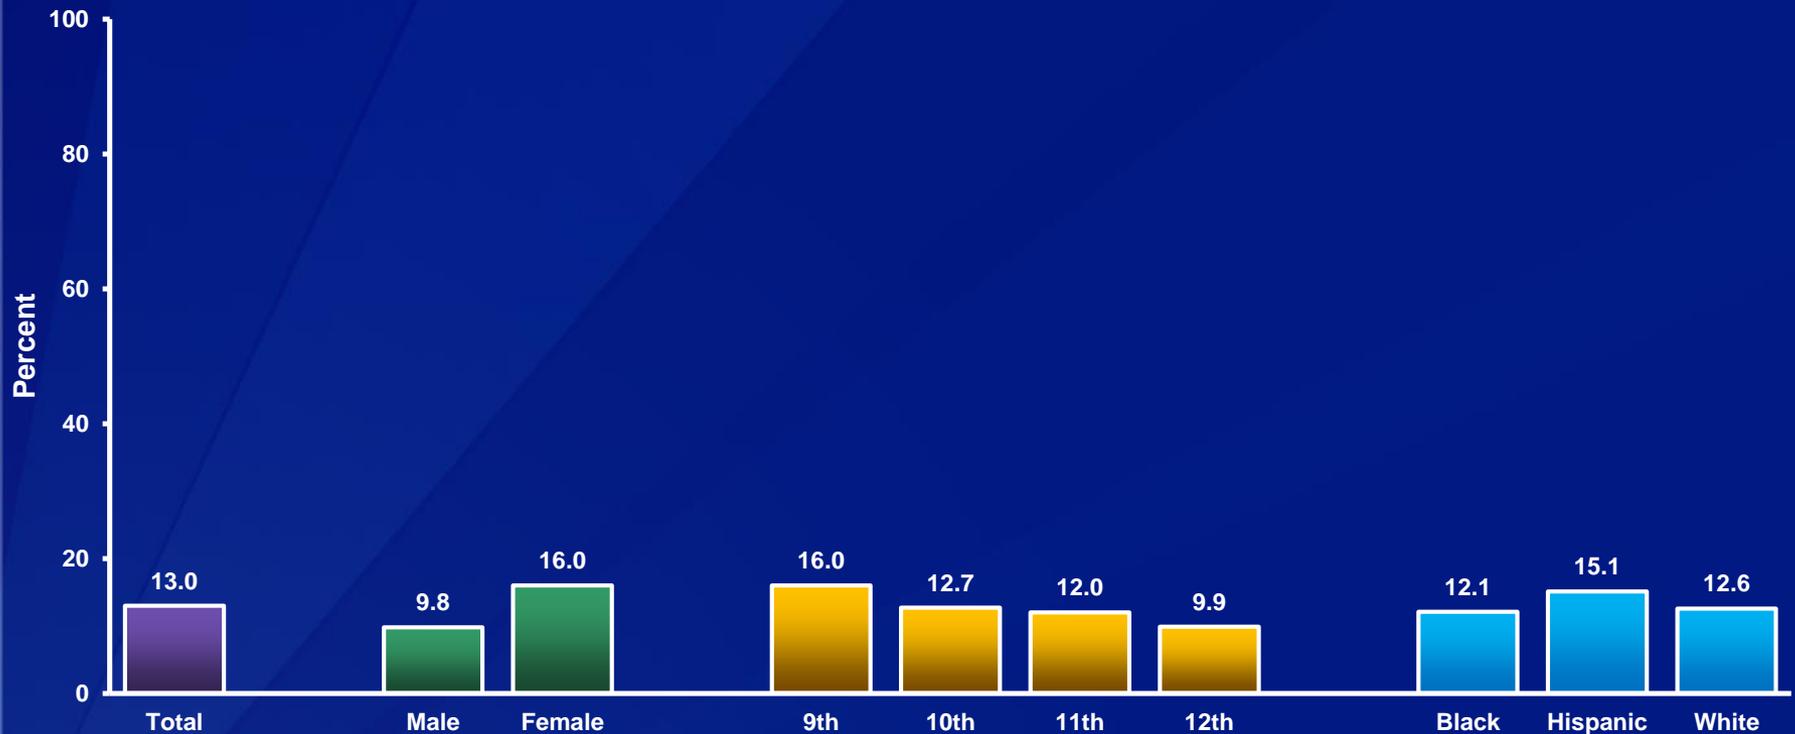

*Ever during the 12 months before the survey

[†]Decreased 1993-2017, decreased 1993-2009, increased 2009-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Made a Plan About How They Would Attempt Suicide,* by Sex,† Grade,† and Race/Ethnicity, 2017

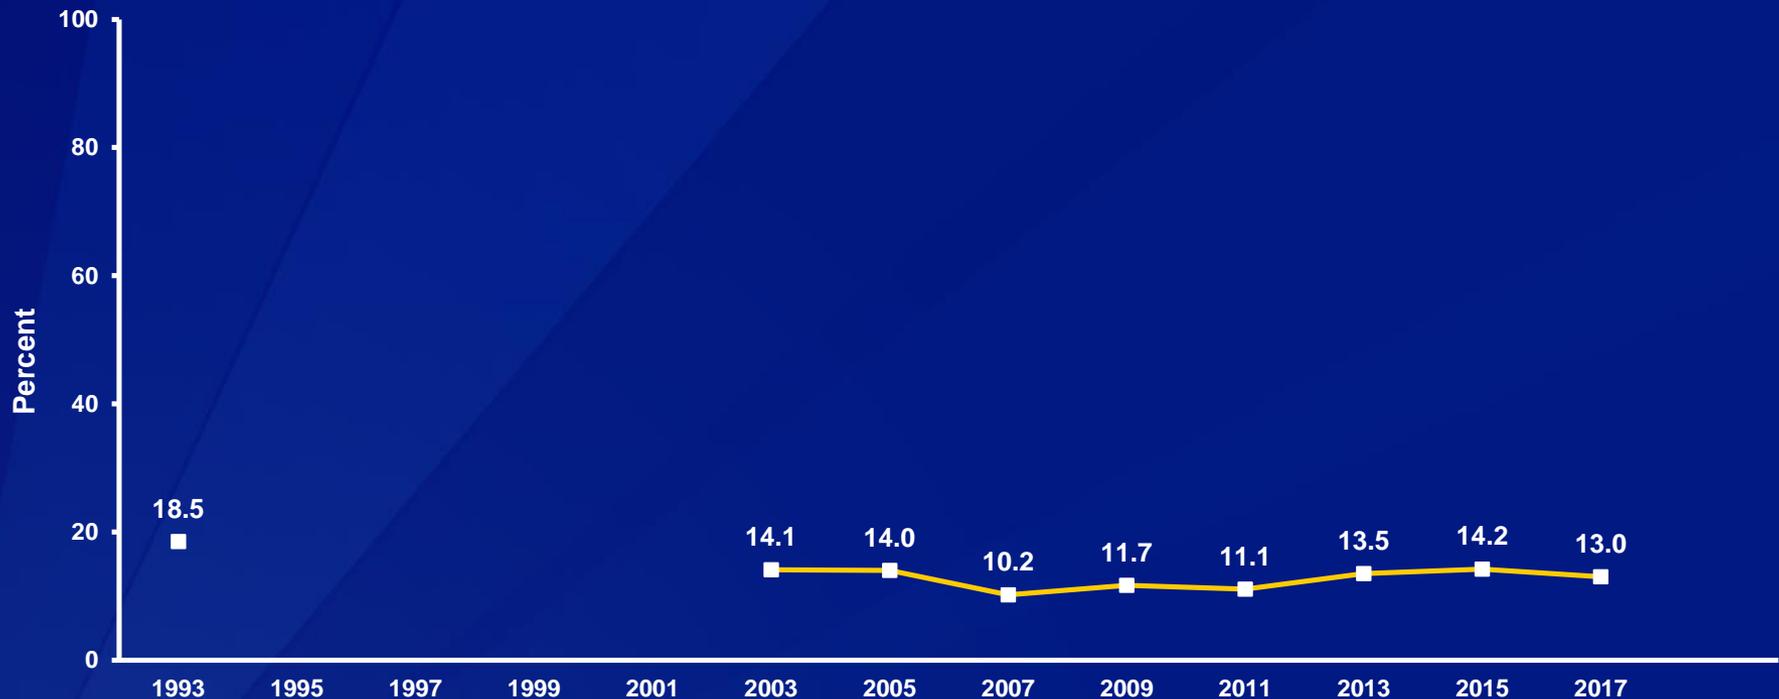

*During the 12 months before the survey

†F > M; 9th > 11th, 9th > 12th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Made a Plan About How They Would Attempt Suicide,* 1993-2017[†]

*During the 12 months before the survey

[†]Decreased 1993-2017, decreased 1993-2009, no change 2009-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Attempted Suicide,* by Sex,† Grade, and Race/Ethnicity,† 2017

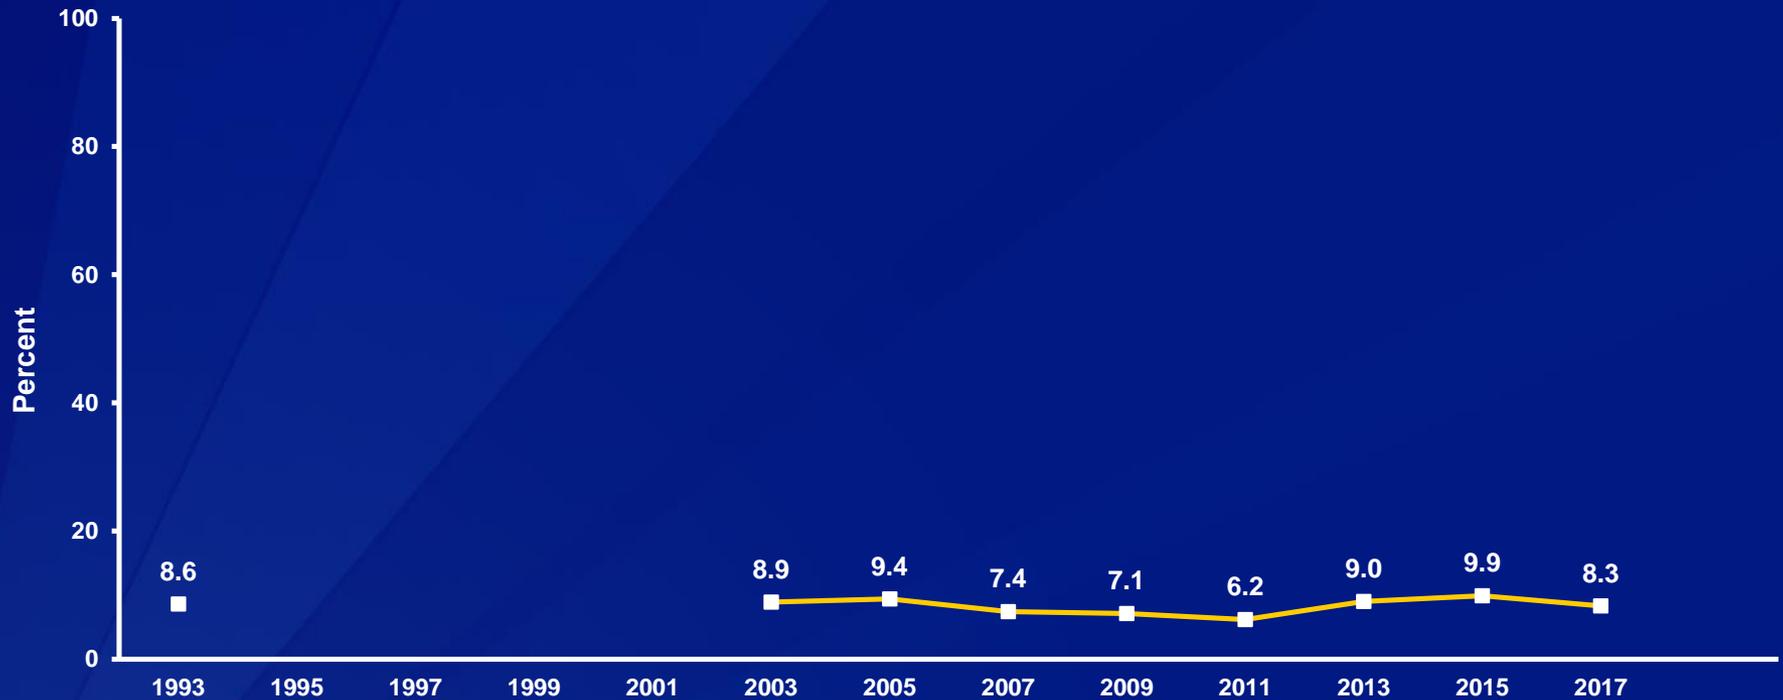

*One or more times during the 12 months before the survey

†F > M; H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Attempted Suicide,* 1993-2017†

*One or more times during the 12 months before the survey

†No change 1993-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Had a Suicide Attempt That Resulted in an Injury, Poisoning, or Overdose That Had to Be Treated by a Doctor or Nurse,* by Sex, Grade, and Race/Ethnicity,† 2017

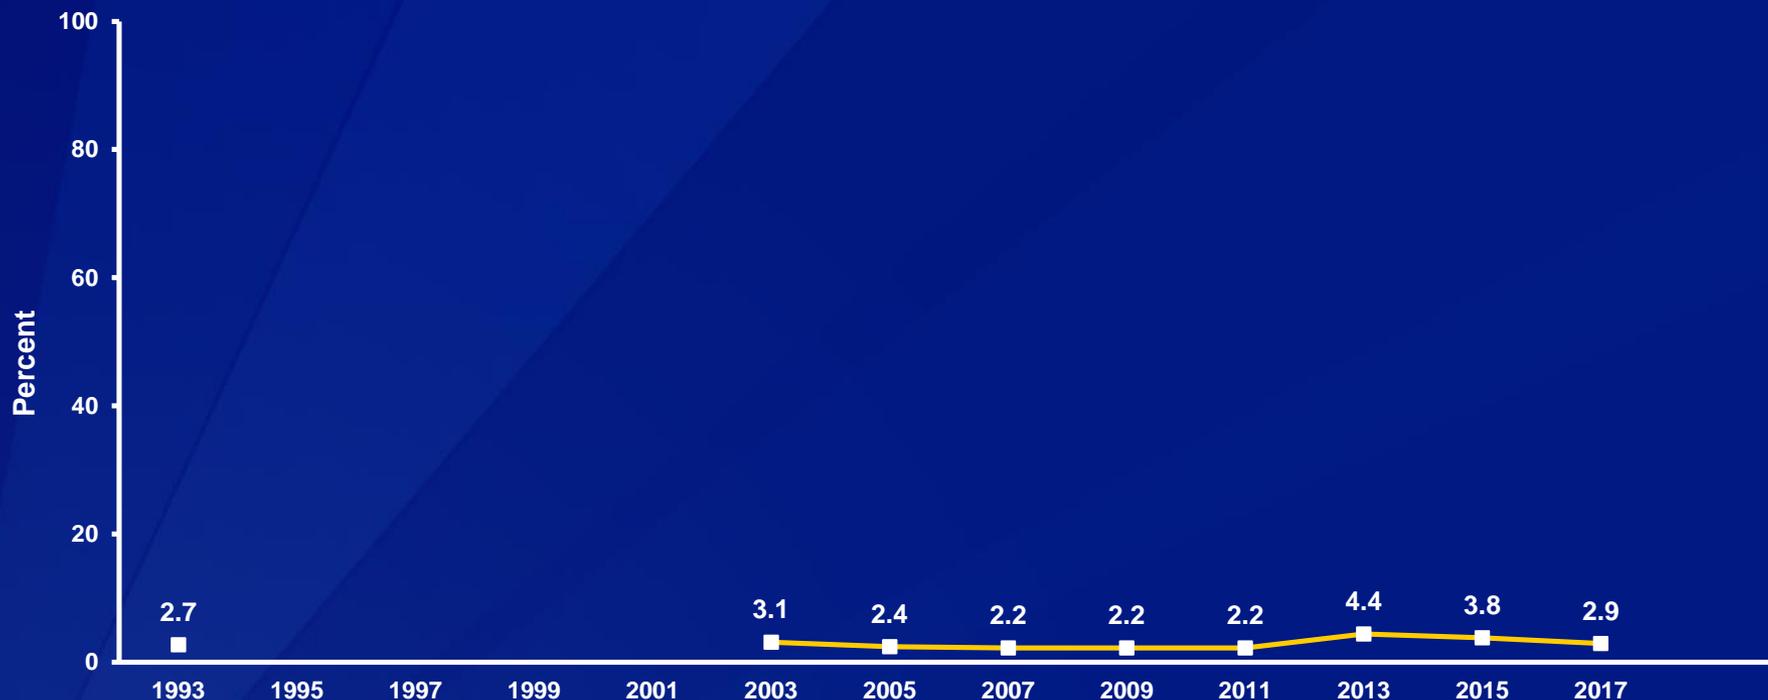

*During the 12 months before the survey

†H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Had a Suicide Attempt That Resulted in an Injury, Poisoning, or Overdose That Had to Be Treated by a Doctor or Nurse,* 1993-2017†

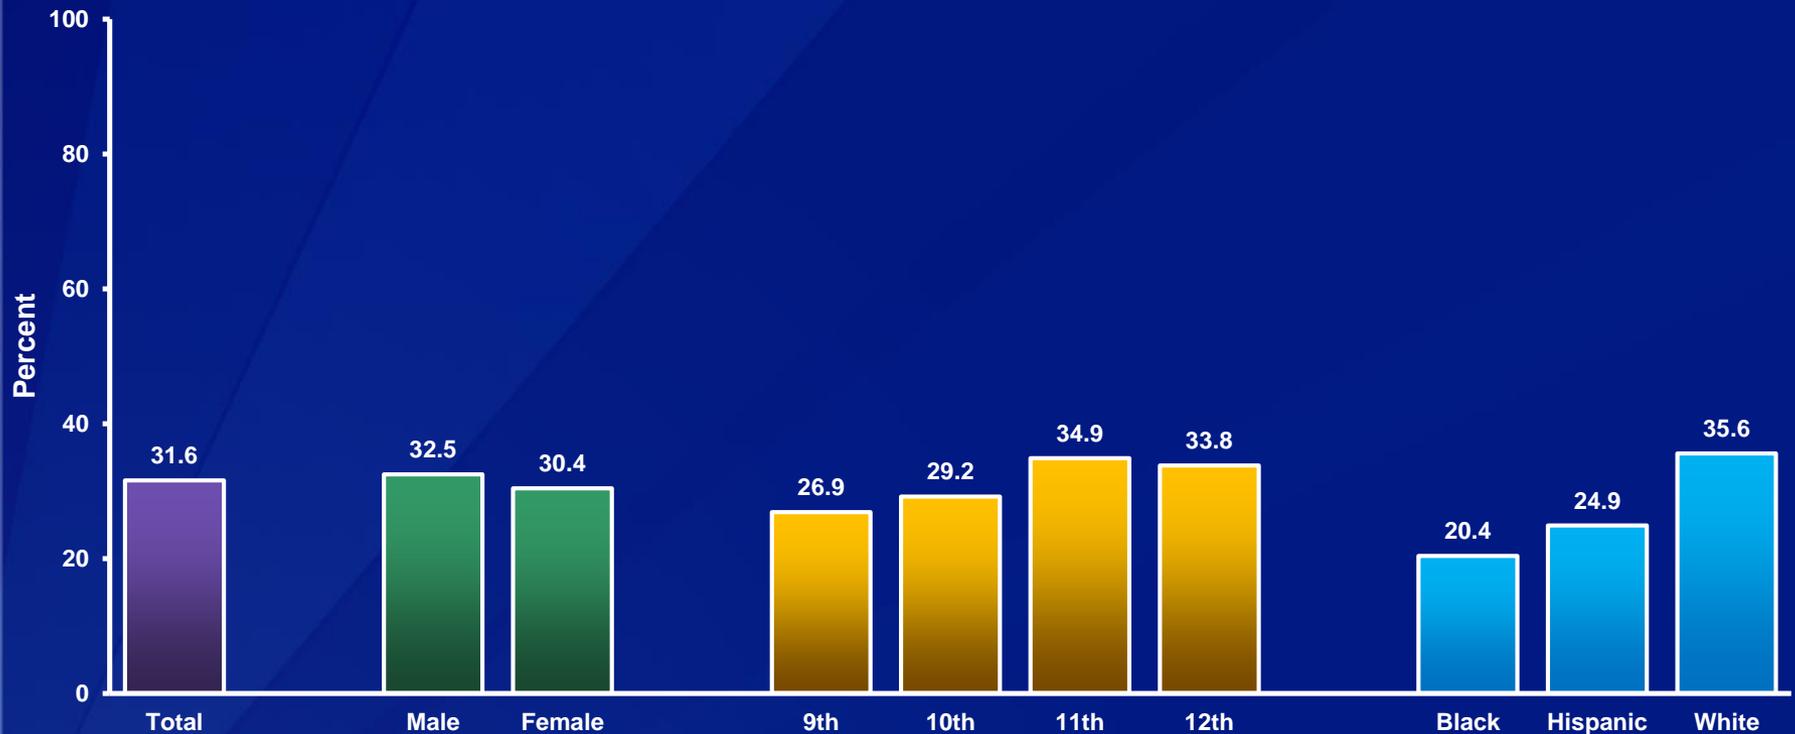

*During the 12 months before the survey

†No change 1993-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Tried Cigarette Smoking,* by Sex, Grade, and Race/Ethnicity,† 2017

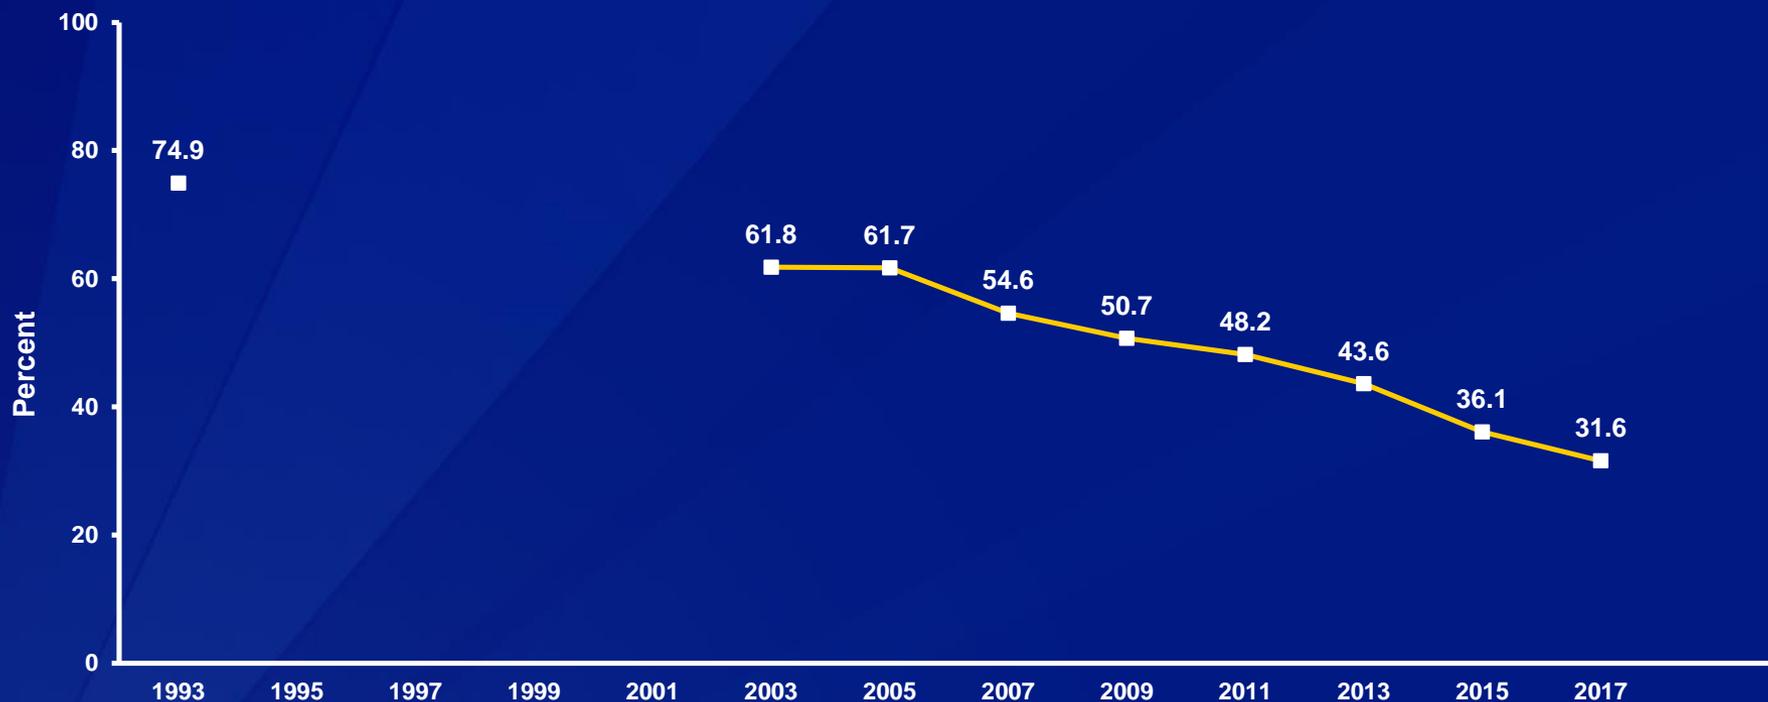

*Even one or two puffs

†W > B, W > H (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Tried Cigarette Smoking,* 1993-2017†

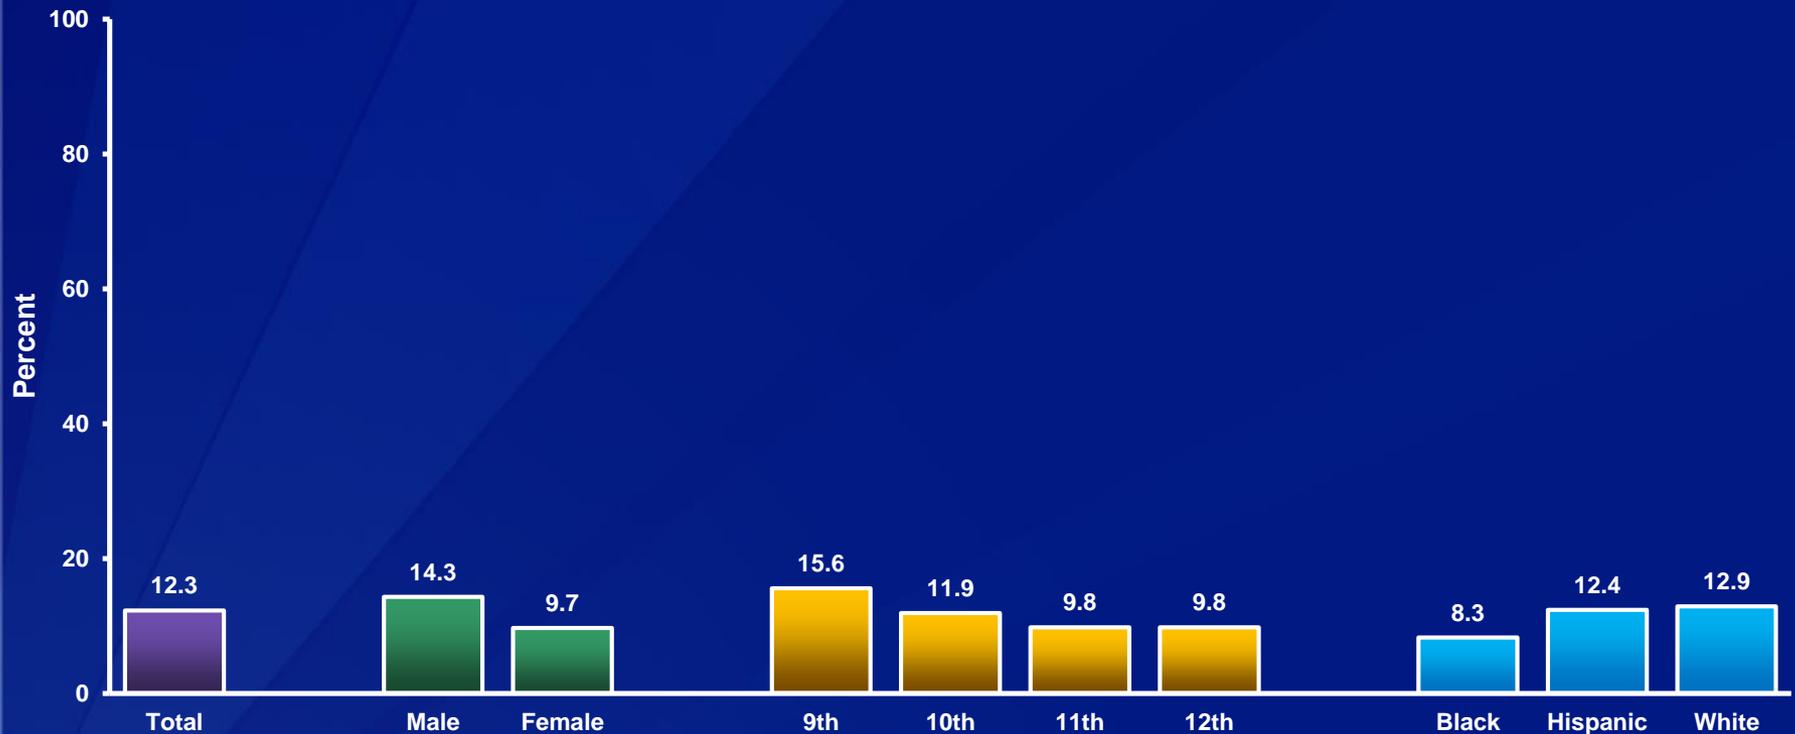

*Even one or two puffs

†Decreased 1993-2017, decreased 1993-2011, decreased 2011-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who First Tried Cigarette Smoking Before Age 13 Years,* by Sex,† Grade, and Race/Ethnicity,† 2017

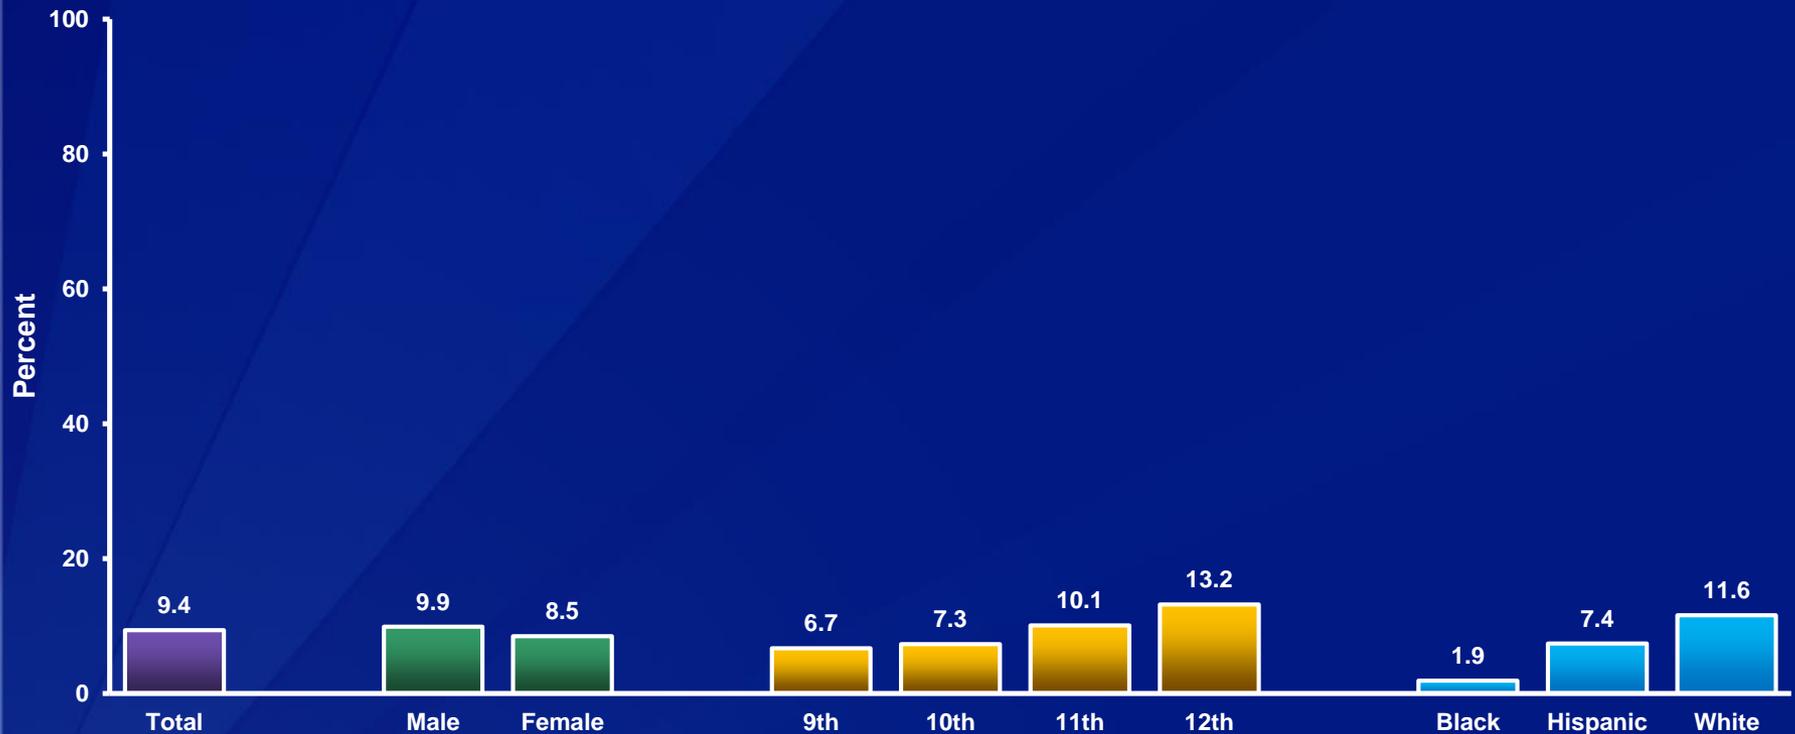

*Even one or two puffs

†M > F; W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes,* by Sex, Grade, and Race/Ethnicity,† 2017

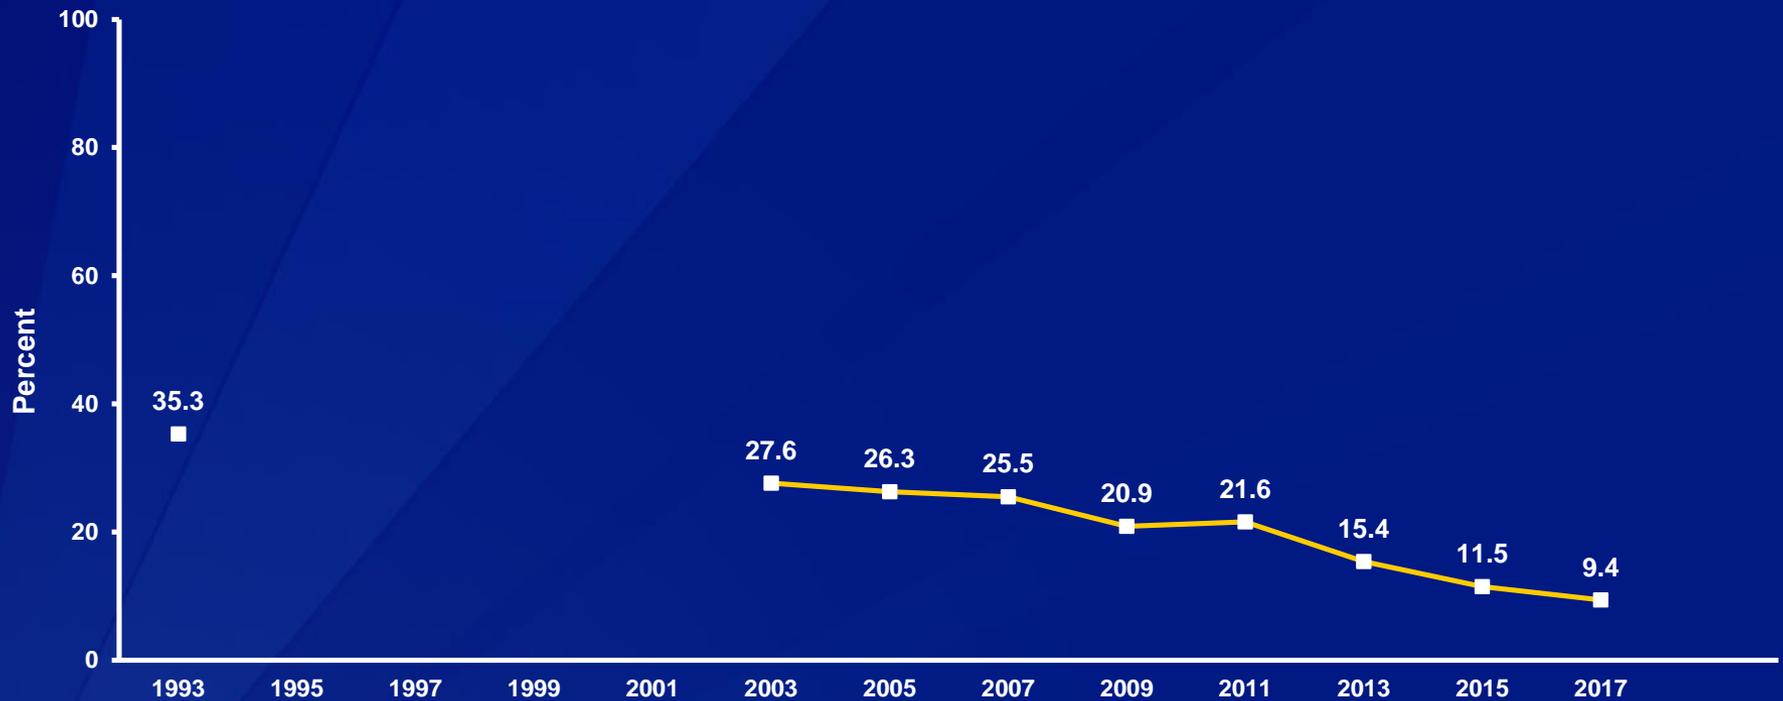

*On at least 1 day during the 30 days before the survey

†H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes,* 1993-2017†

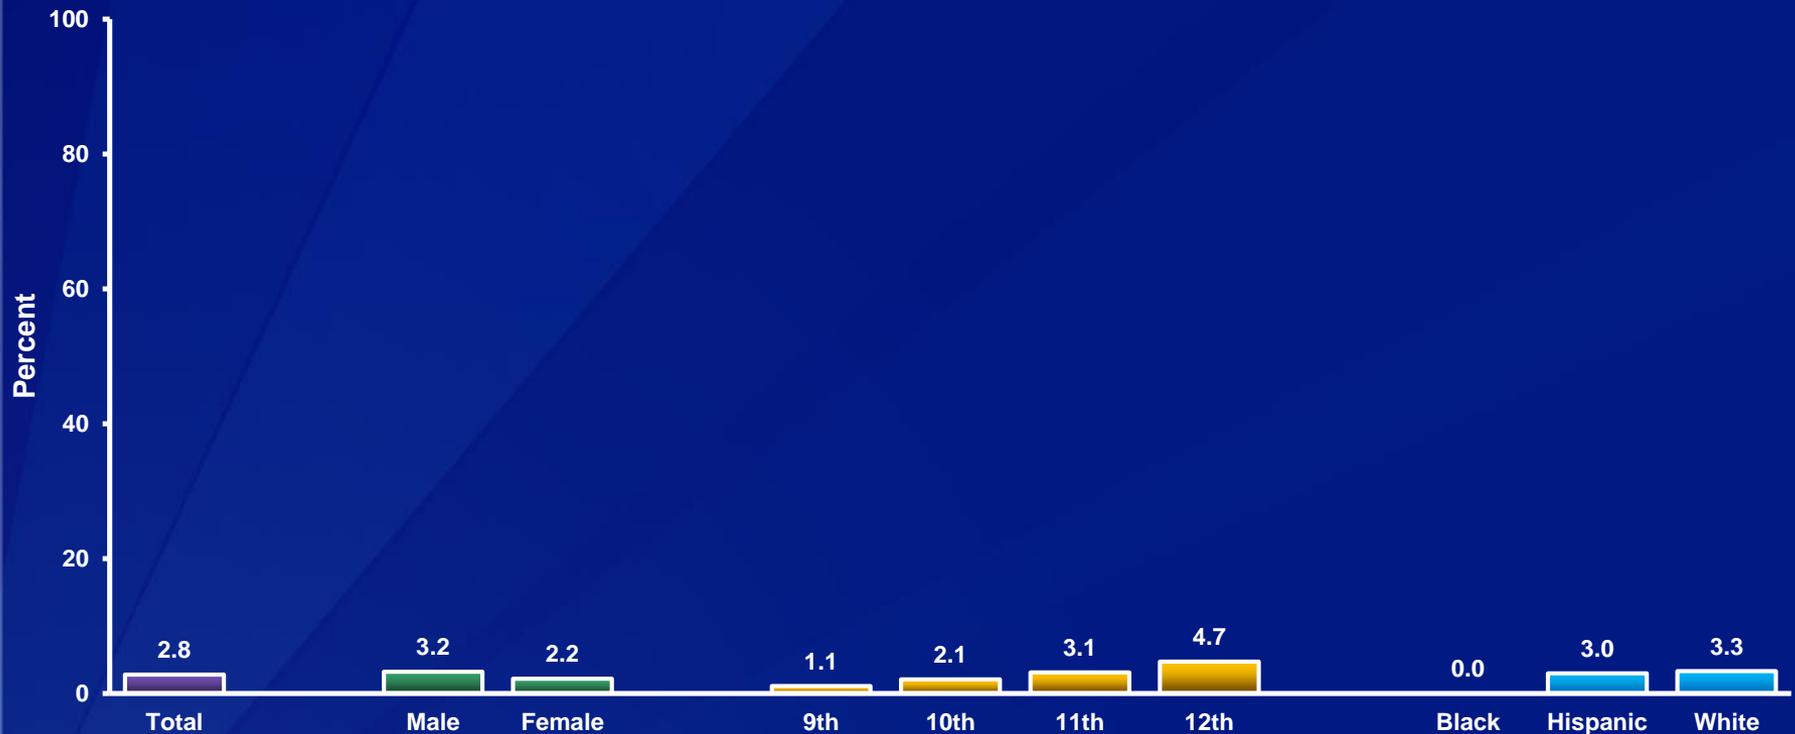

*On at least 1 day during the 30 days before the survey

†Decreased 1993-2017, decreased 1993-2011, decreased 2011-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes Frequently,* by Sex, Grade,† and Race/Ethnicity,† 2017

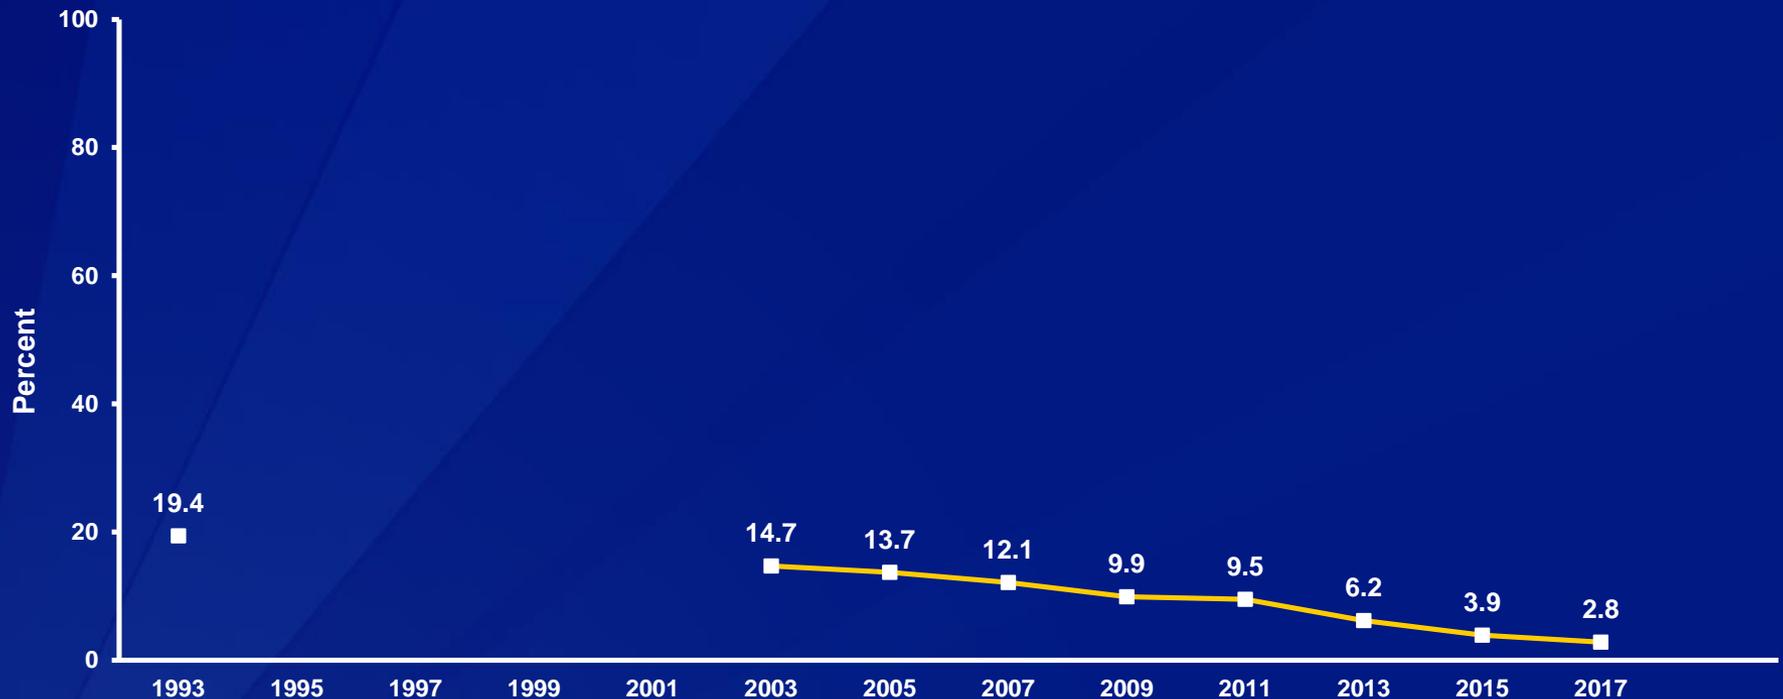

*On 20 or more days during the 30 days before the survey

†12th > 9th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes Frequently,* 1993-2017†

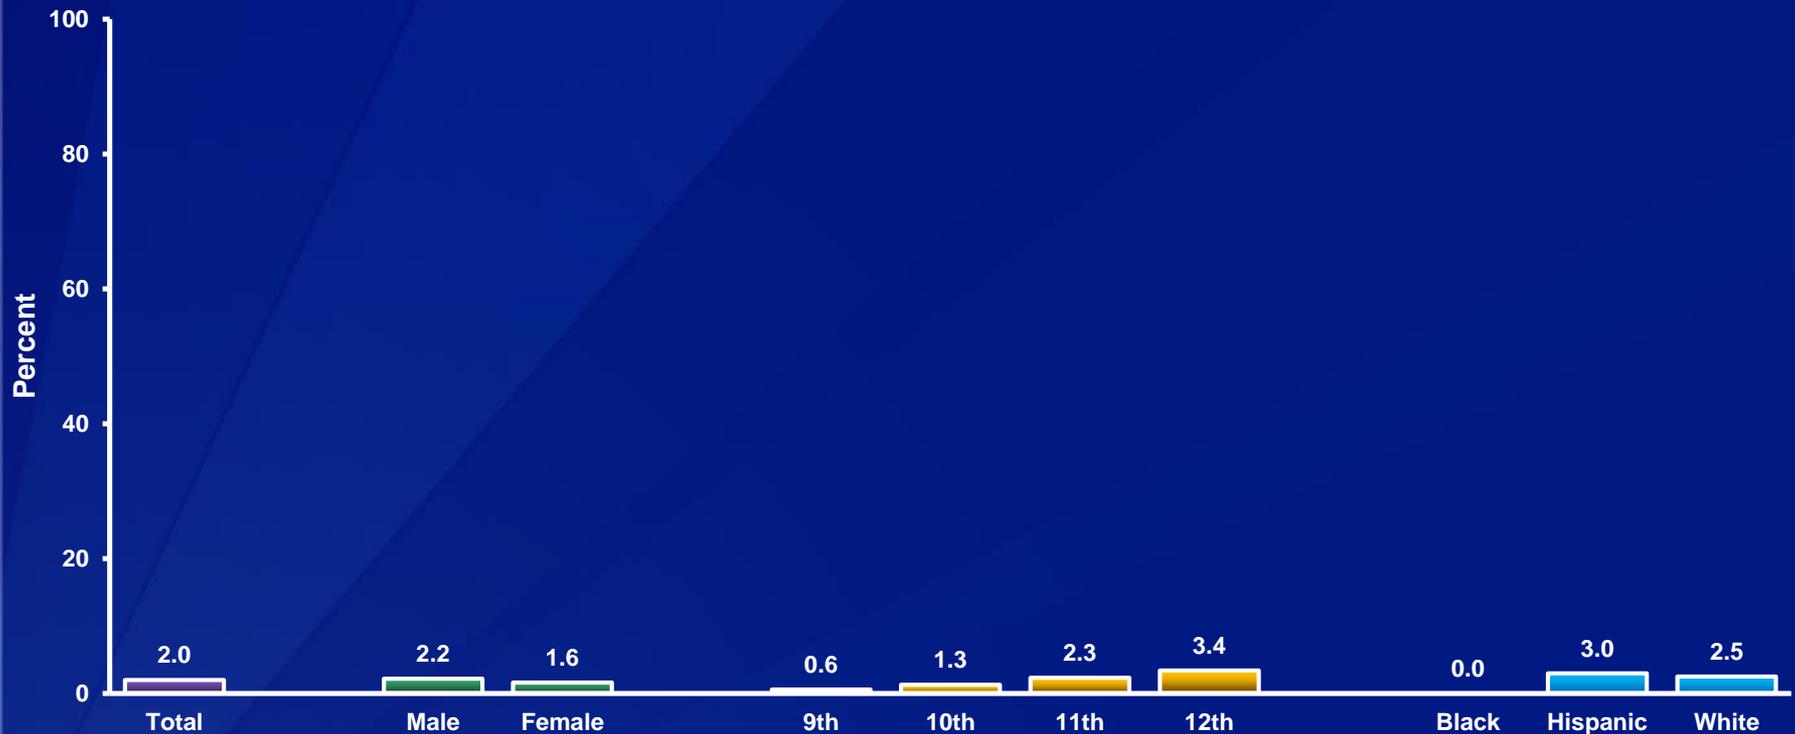

*On 20 or more days during the 30 days before the survey

†Decreased 1993-2017, decreased 1993-2011, decreased 2011-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes Daily,* by Sex, Grade,[†] and Race/Ethnicity,[†] 2017

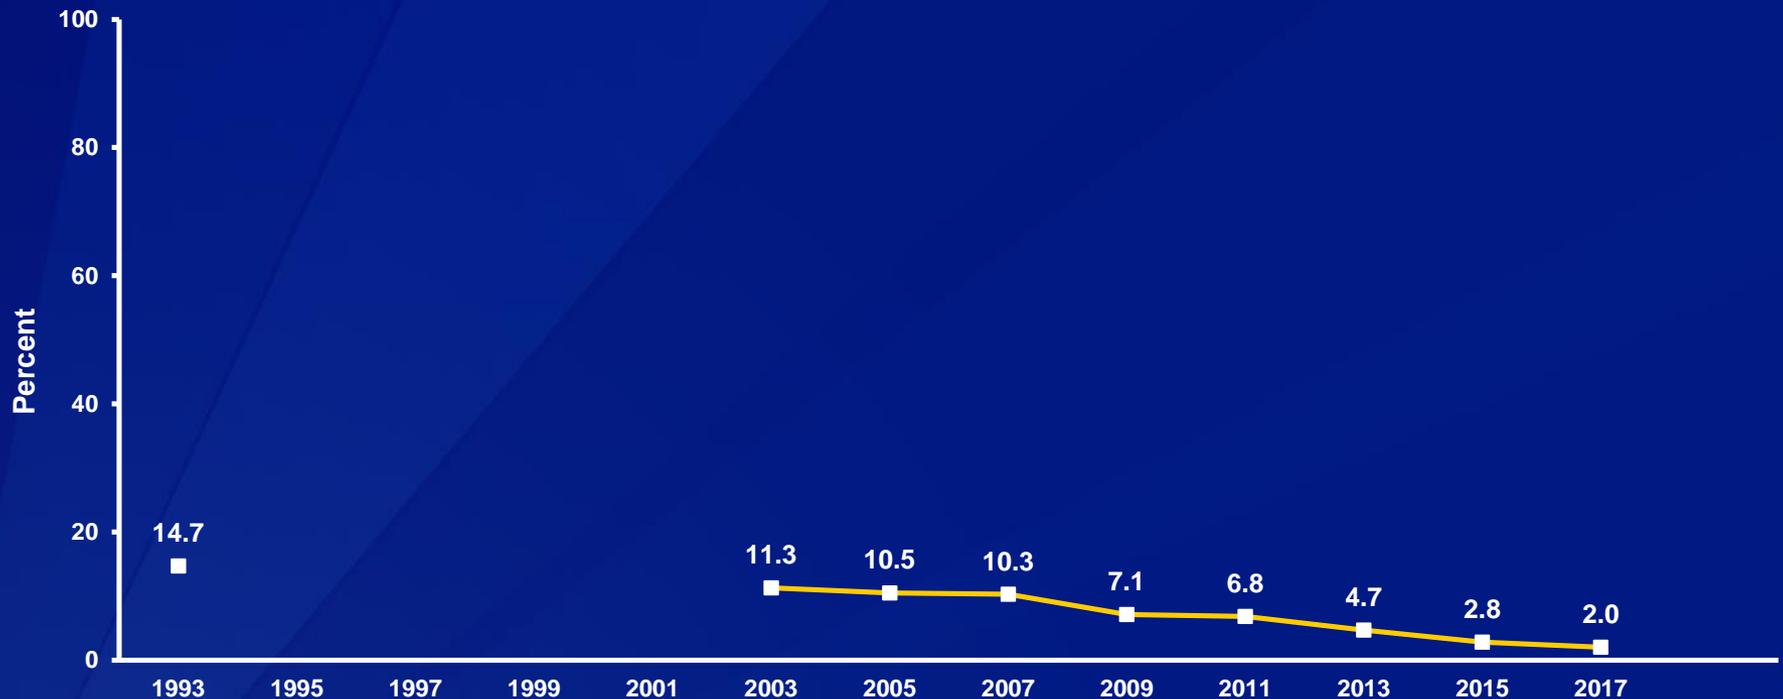

*On all 30 days during the 30 days before the survey

[†]12th > 9th, 12th > 10th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes Daily,* 1993-2017†

*On all 30 days during the 30 days before the survey

†Decreased 1993-2017, decreased 1993-2007, decreased 2007-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

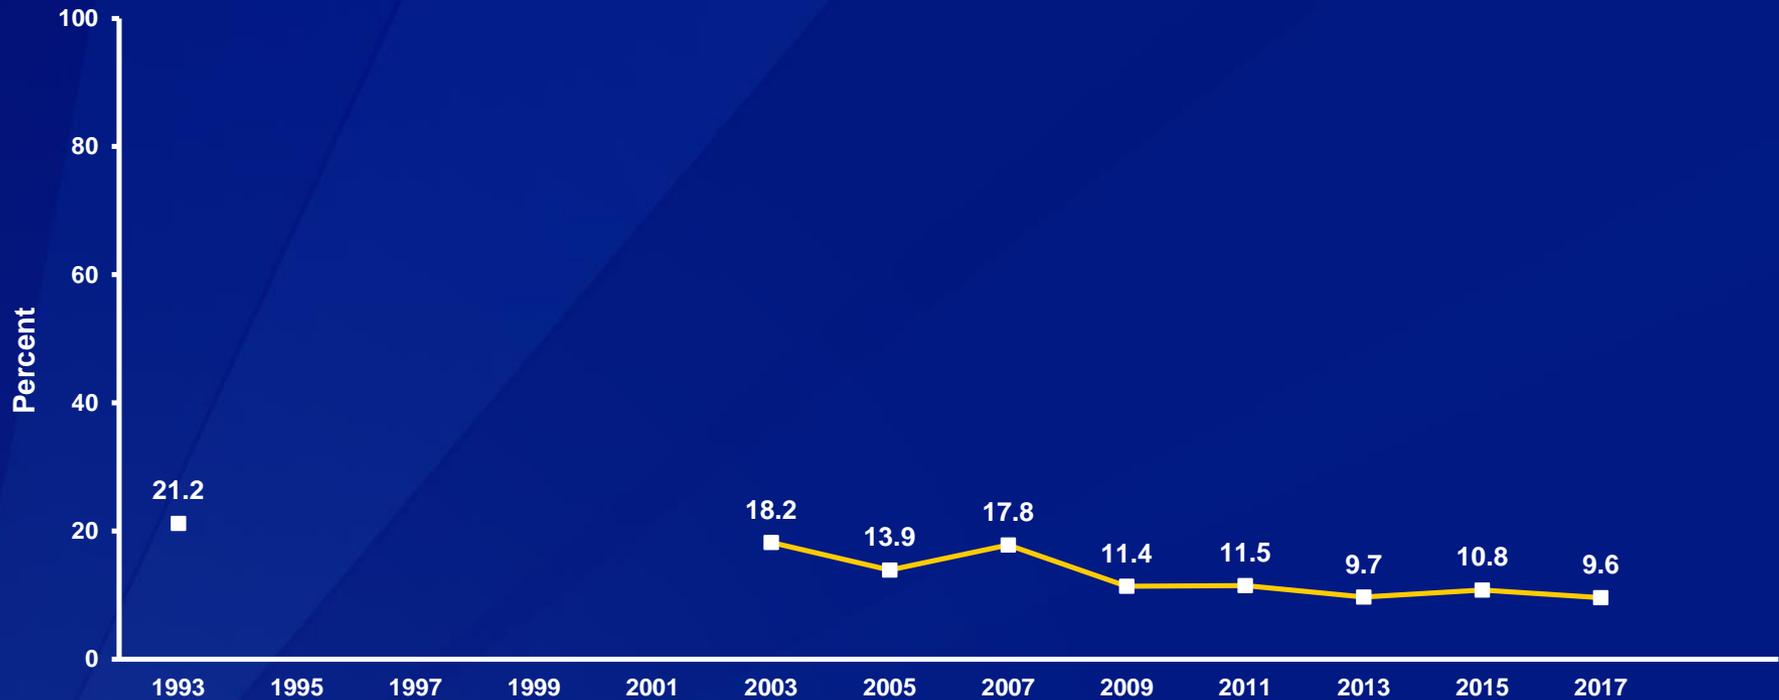

Note: This graph contains weighted results.

Percentage of High School Students Who Smoked More Than 10 Cigarettes Per Day,* by Sex, Grade, and Race/Ethnicity, 2017

*On the days they smoked during the 30 days before the survey, among students who currently smoked cigarettes
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
Missing bar indicates fewer than 100 students in this subgroup.
Note: This graph contains weighted results.

Percentage of High School Students Who Smoked More Than 10 Cigarettes Per Day,* 1993-2017[†]

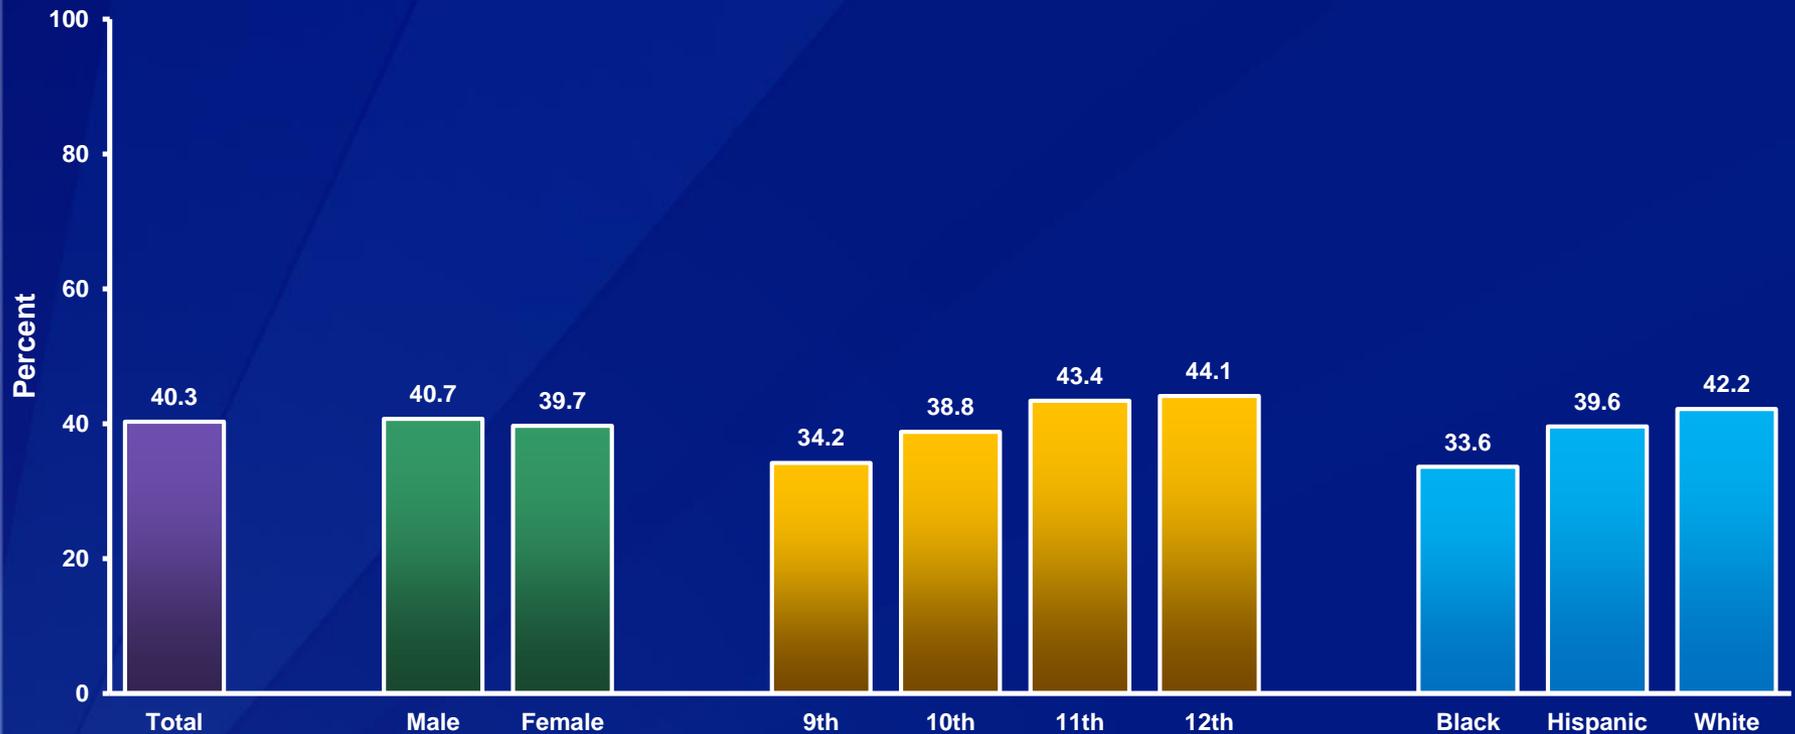

*On the days they smoked during the 30 days before the survey, among students who currently smoked cigarettes

[†]Decreased 1993-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Used an Electronic Vapor Product,* by Sex, Grade,† and Race/Ethnicity, 2017

*Including e-cigarettes, e-cigars, e-pipes, vape pipes, vaping pens, e-hookahs, and hookah pens [such as blu, NJOY, Vuse, MarkTen, Logic, Vapin Plus, eGo, and Halo]

†12th > 9th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Used an Electronic Vapor Product,* 2015-2017†

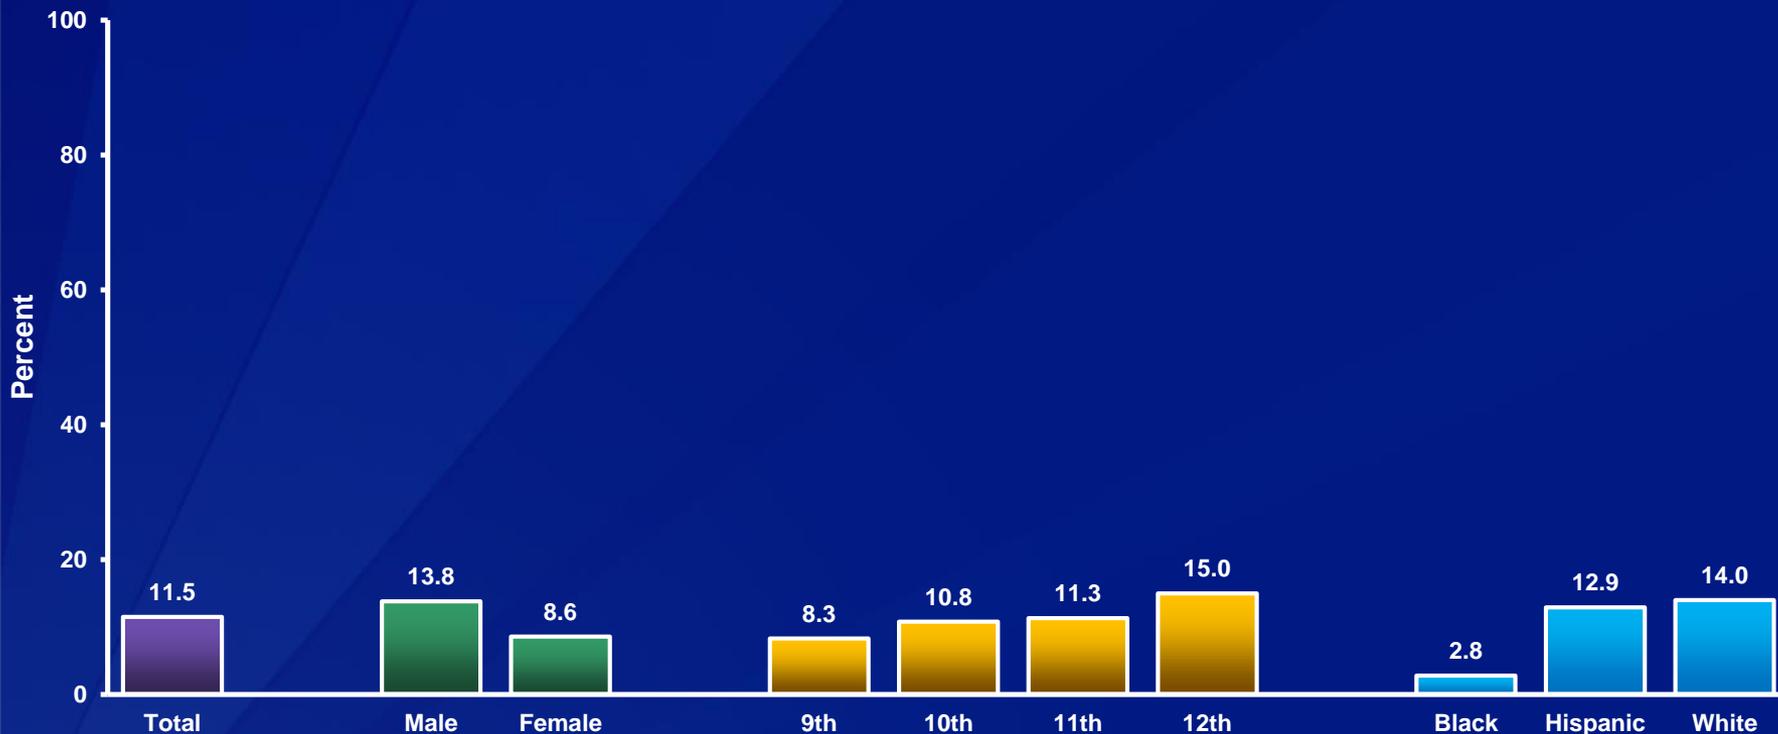

*Including e-cigarettes, e-cigars, e-pipes, vape pipes, vaping pens, e-hookahs, and hookah pens [such as blu, NJOY, Vuse, MarkTen, Logic, Vapin Plus, eGo, and Halo]

†No change 2015-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Used an Electronic Vapor Product,* by Sex,† Grade, and Race/Ethnicity,† 2017

*Including e-cigarettes, e-cigars, e-pipes, vape pipes, vaping pens, e-hookahs, and hookah pens [such as blu, NJOY, Vuse, MarkTen, Logic, Vapin Plus, eGo, and Halo], on at least 1 day during the 30 days before the survey

†M > F; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Used an Electronic Vapor Product,* 2015-2017[†]

*Including e-cigarettes, e-cigars, e-pipes, vape pipes, vaping pens, e-hookahs, and hookah pens [such as blu, NJOY, Vuse, MarkTen, Logic, Vapin Plus, eGo, and Halo], on at least 1 day during the 30 days before the survey

[†]Decreased 2015-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Note: This graph contains weighted results.

Percentage of High School Students Who Usually Got Their Own Electronic Vapor Products by Buying Them in a Store,* by Sex, Grade, and Race/Ethnicity, 2017

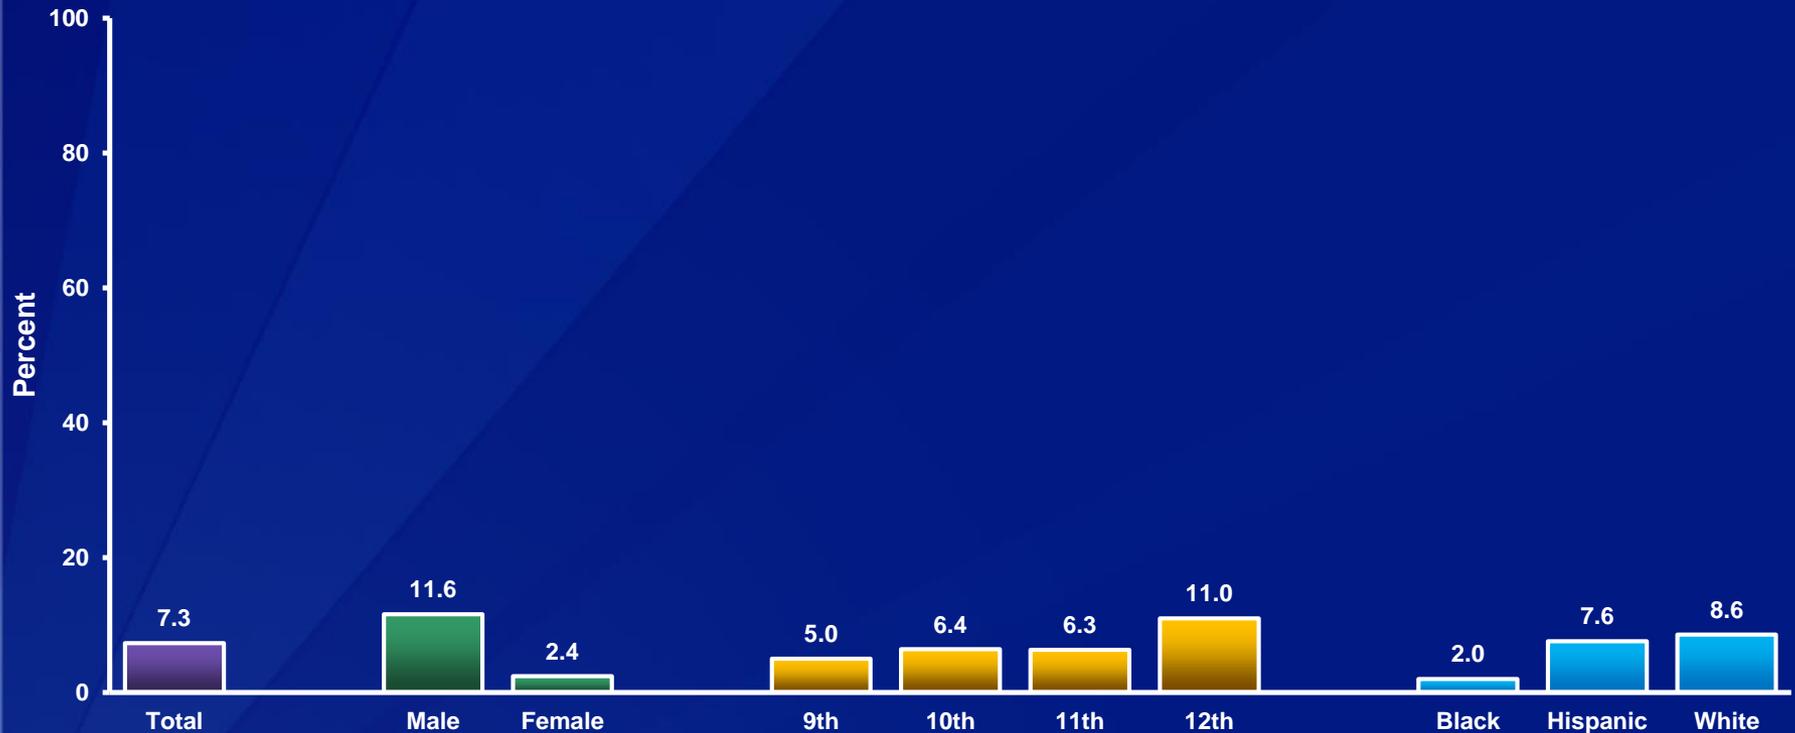

*Such as a convenience store, supermarket, discount store, gas station, or vape store, during the 30 days before the survey, among students who currently used electronic vapor products and who were aged <18 years

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in this subgroup.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Used Smokeless Tobacco,* by Sex,† Grade,† and Race/Ethnicity,† 2017

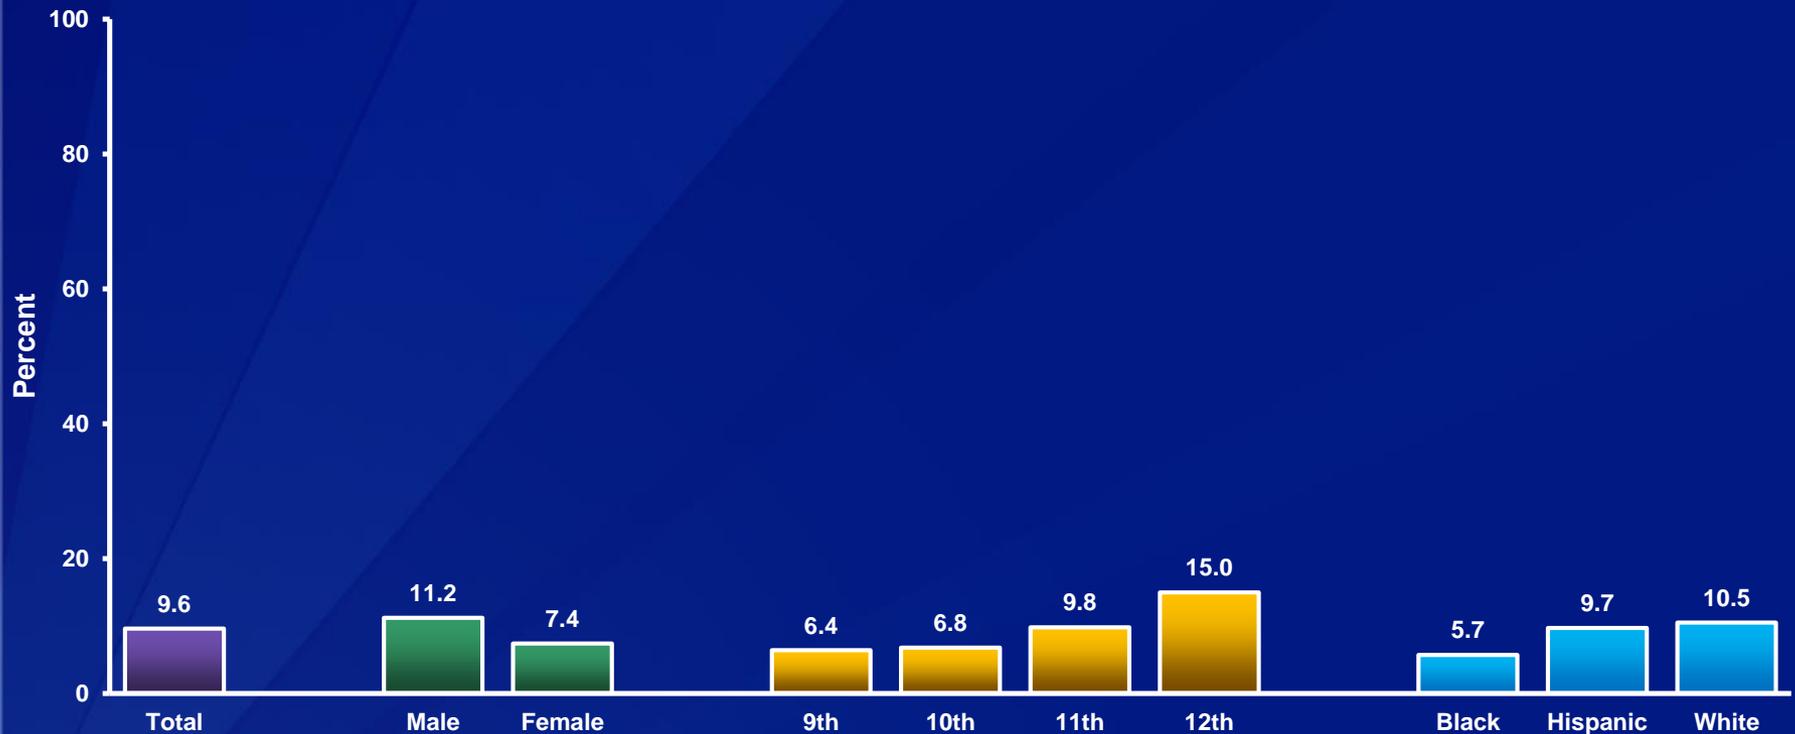

*Chewing tobacco, snuff, dip, snus, or dissolvable tobacco products [such as Redman, Levi Garrett, Beechnut, Skoal, Skoal Bandits, Copenhagen, Camel Snus, Marlboro Snus, General Snus, Ariva, Stonewall, or Camel Orbs], not counting any electronic vapor products, on at least 1 day during the 30 days before the survey

†M > F; 12th > 11th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigars,* by Sex,[†] Grade,[†] and Race/Ethnicity,[†] 2017

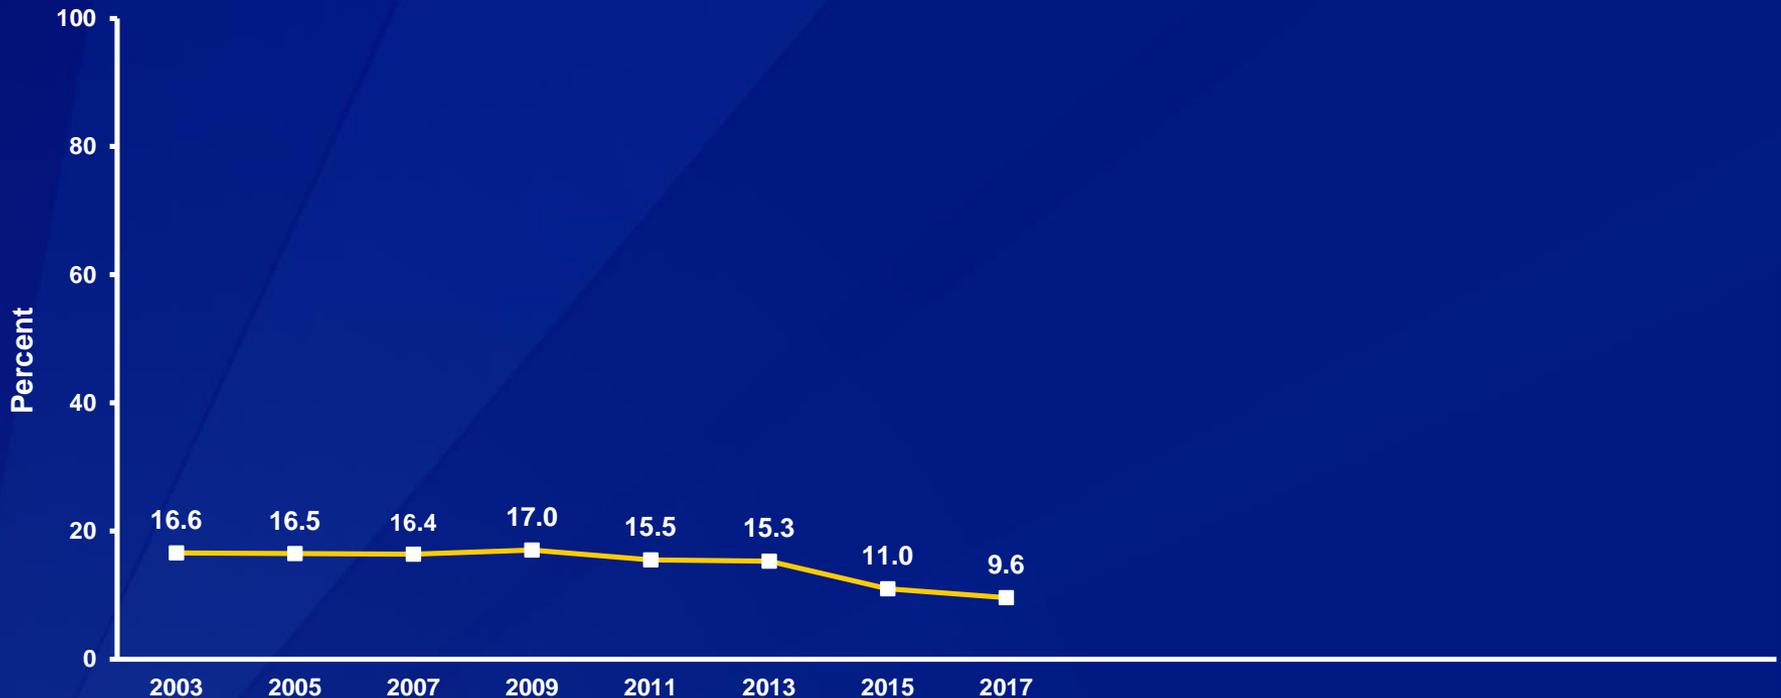

*Cigars, cigarillos, or little cigars, on at least 1 day during the 30 days before the survey

[†]M > F; 12th > 9th, 12th > 10th; W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigars,* 2003-2017†

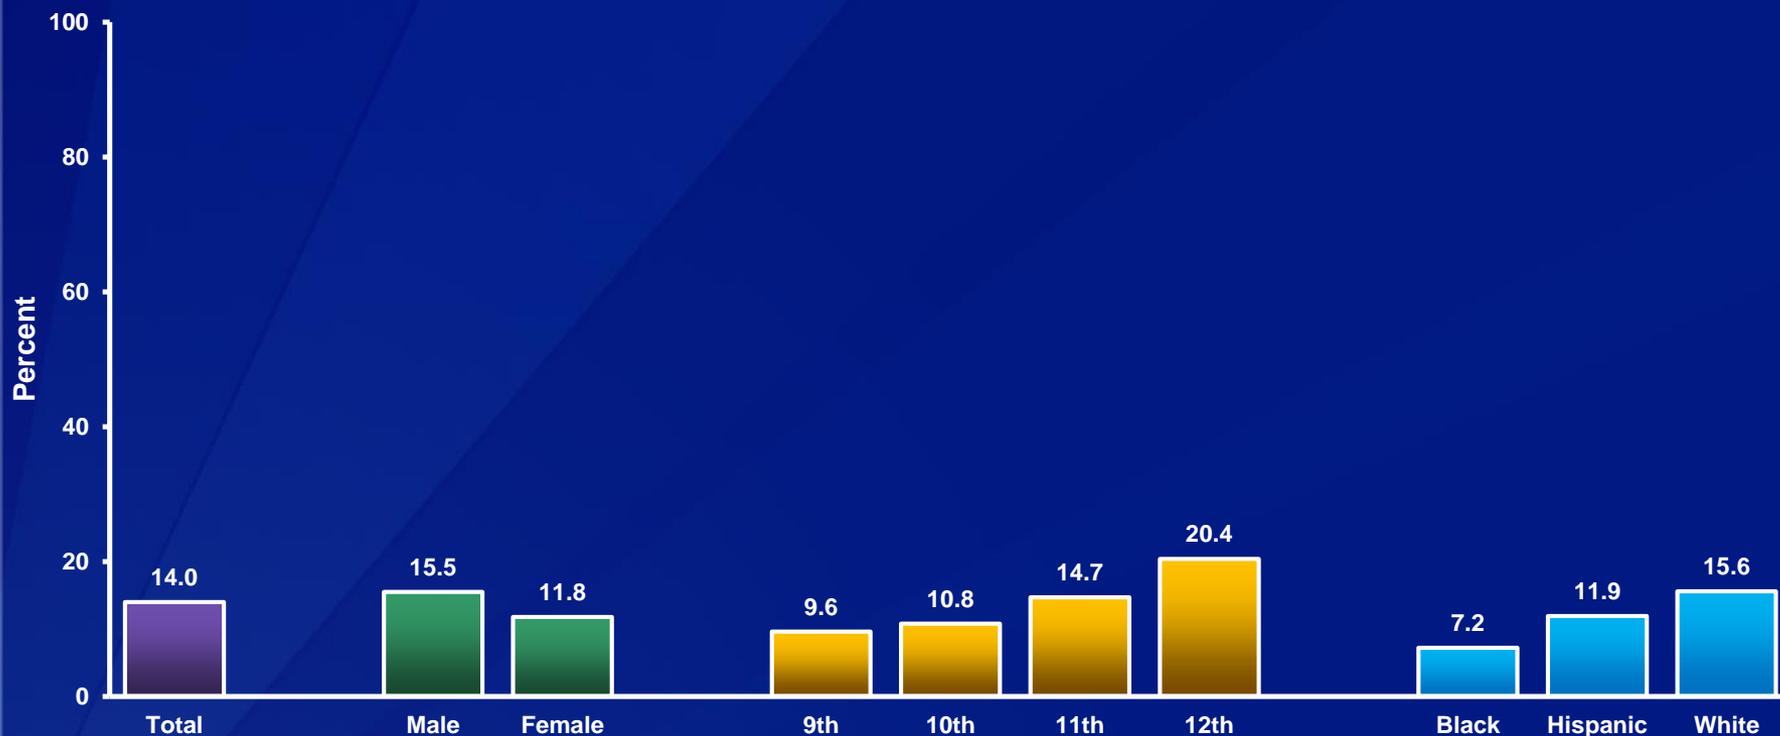

*Cigars, cigarillos, or little cigars, on at least 1 day during the 30 days before the survey

†Decreased 2003-2017, no change 2003-2013, decreased 2013-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes or Cigars,* by Sex,† Grade,† and Race/Ethnicity,† 2017

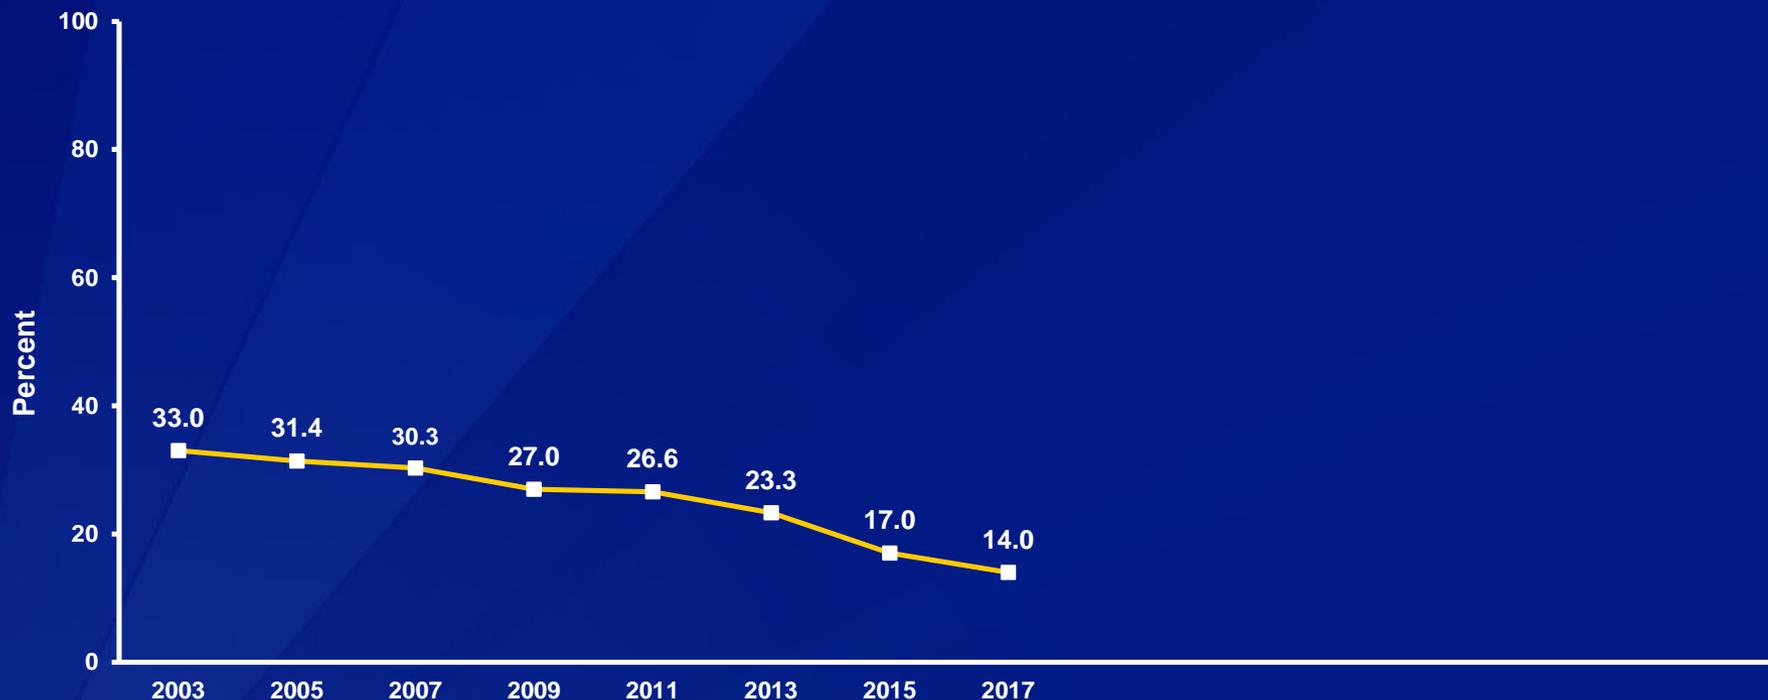

*On at least 1 day during the 30 days before the survey

†M > F; 12th > 9th, 12th > 10th, 12th > 11th; W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes or Cigars,* 2003-2017†

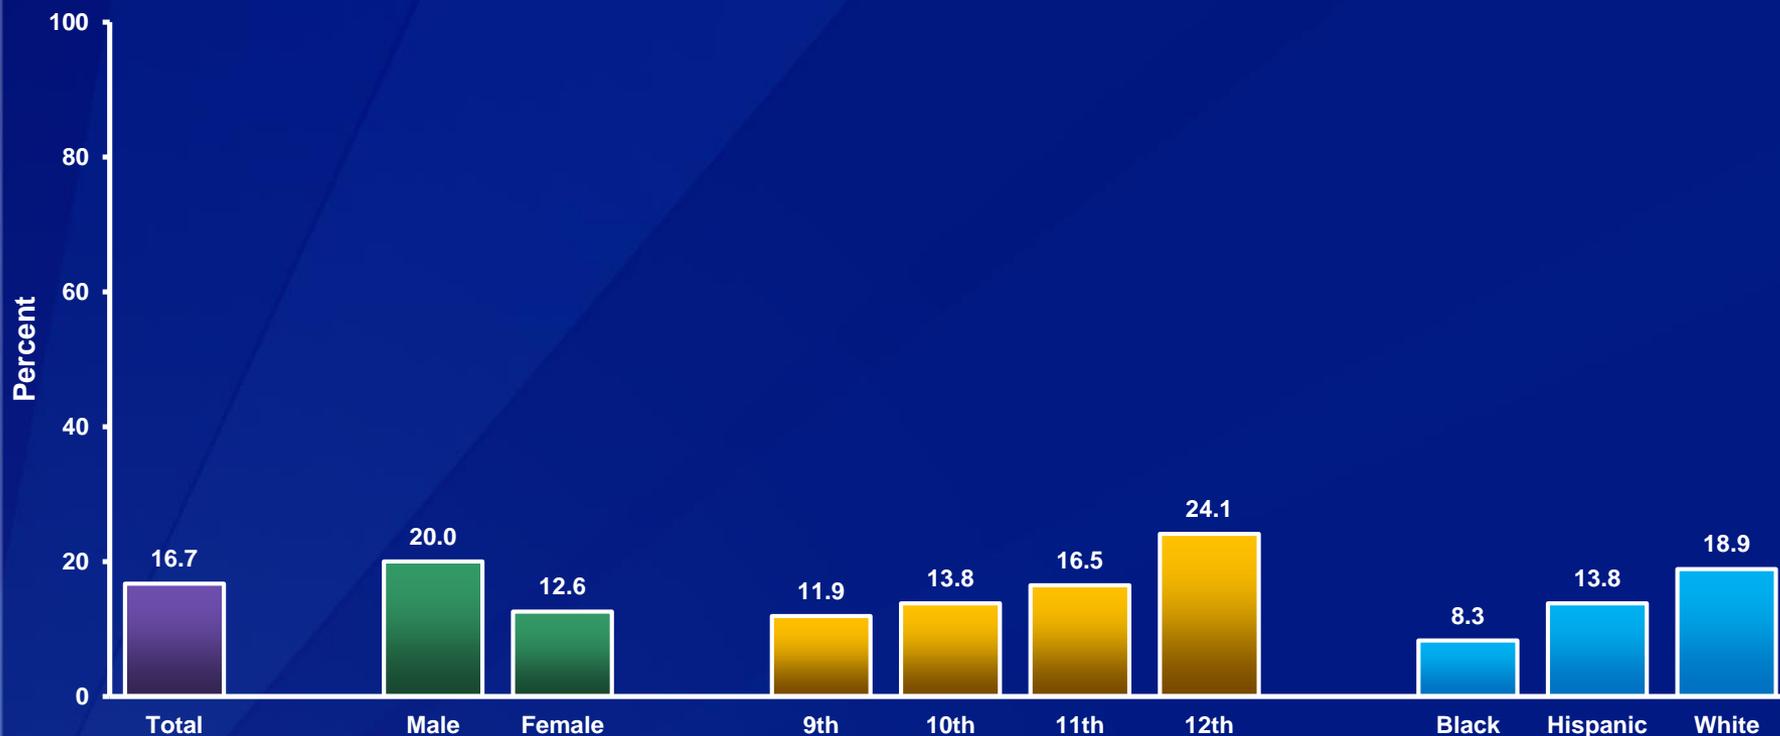

*On at least 1 day during the 30 days before the survey

†Decreased 2003-2017, decreased 2003-2013, decreased 2013-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes or Cigars or Used Smokeless Tobacco,* by Sex,† Grade,† and Race/Ethnicity,† 2017

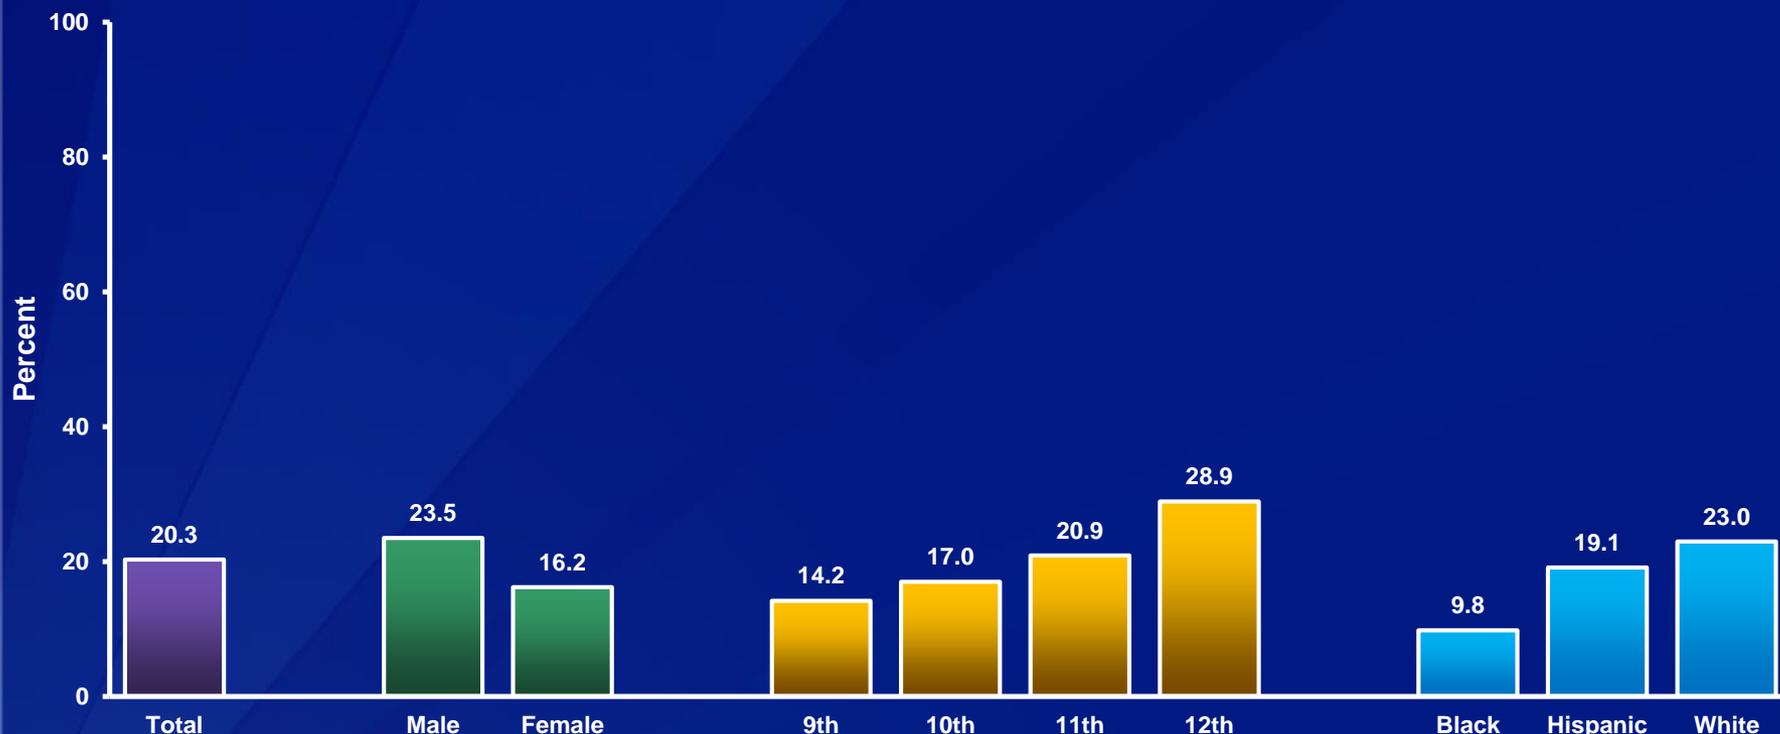

*On at least 1 day during the 30 days before the survey

†M > F; 12th > 9th, 12th > 10th, 12th > 11th; W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Smoked Cigarettes or Cigars or Used Smokeless Tobacco or Electronic Vapor Products,* by Sex,[†] Grade,[†] and Race/Ethnicity,[†] 2017

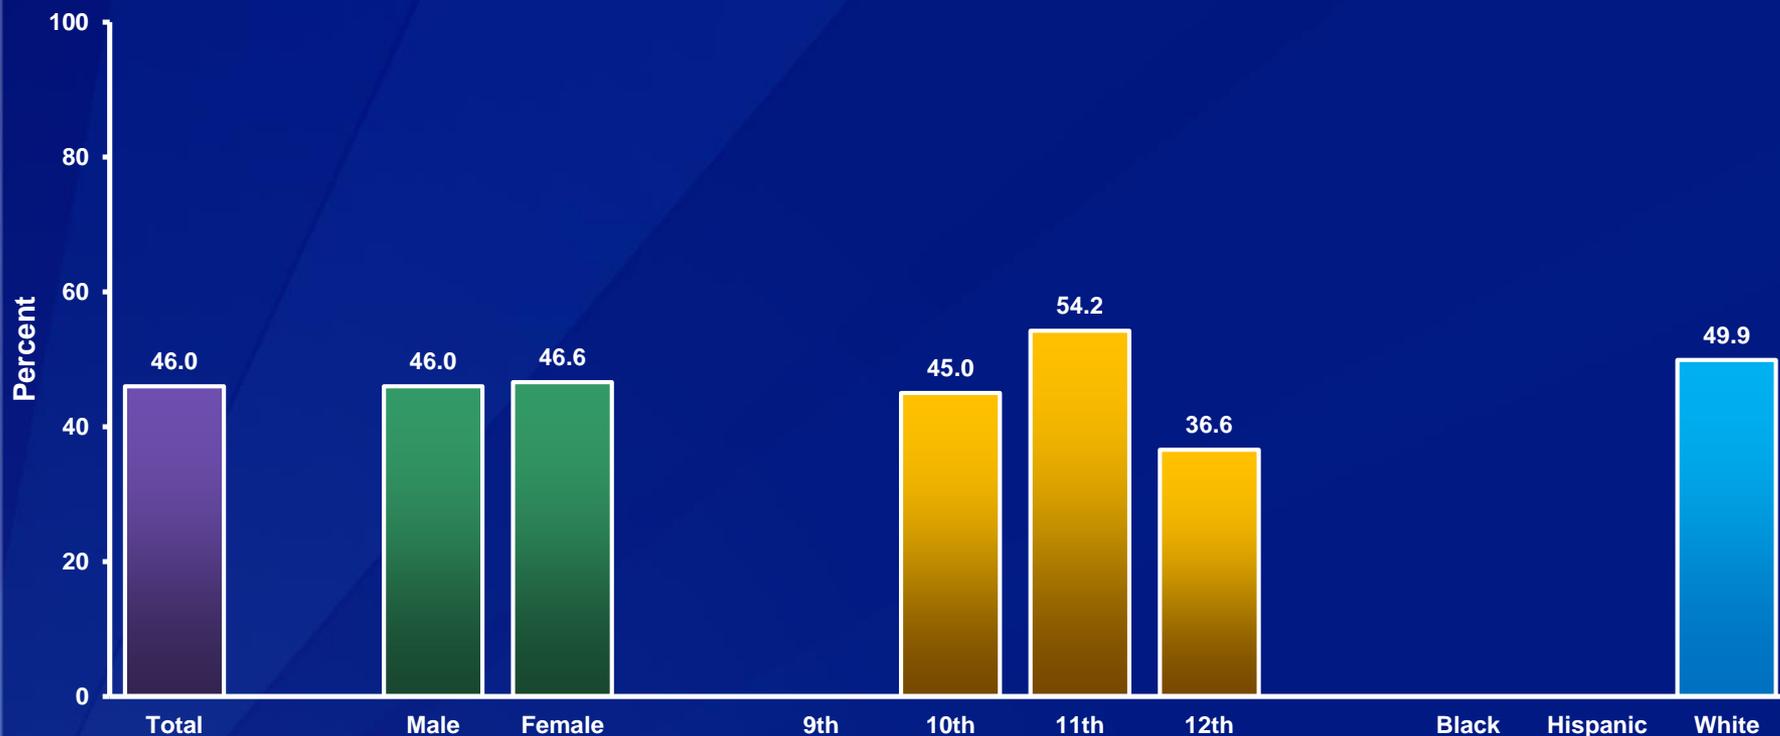

*On at least 1 day during the 30 days before the survey

[†]M > F; 11th > 9th, 12th > 9th, 12th > 10th, 12th > 11th; H > B, W > B (Based on t-test analysis, p < 0.05.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Tried to Quit Using All Tobacco Products,* by Sex, Grade, and Race/Ethnicity, 2017

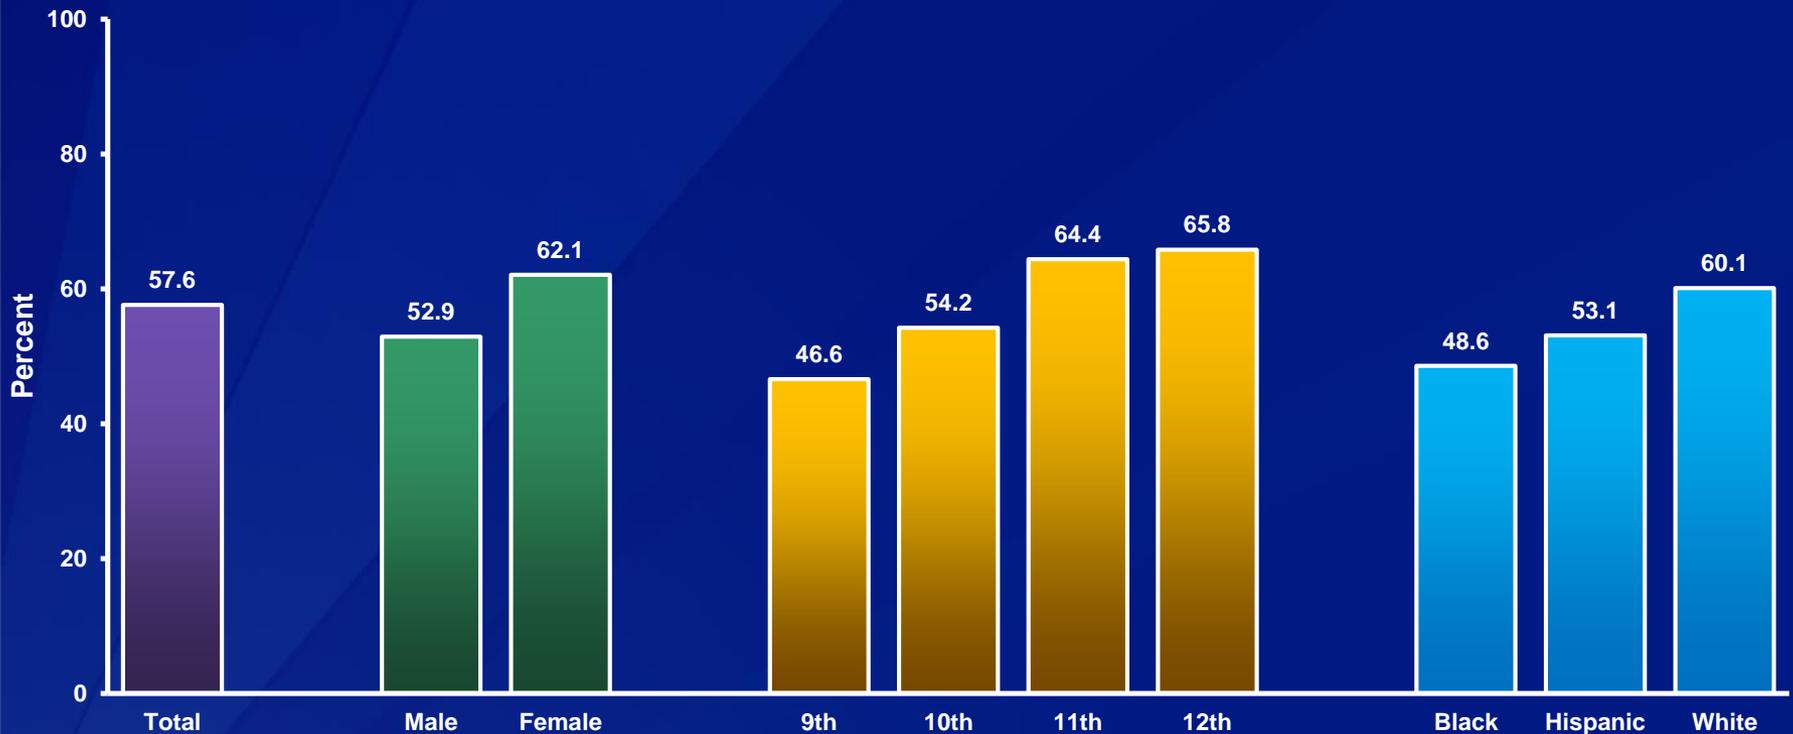

*Including cigarettes, cigars, smokeless tobacco, shisha or hookah tobacco, and electronic vapor products, ever during the 12 months before the survey, among students who used any tobacco products during the 12 months before the survey

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Missing bar indicates fewer than 100 students in this subgroup.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Drank Alcohol,* by Sex,† Grade,† and Race/Ethnicity, 2017

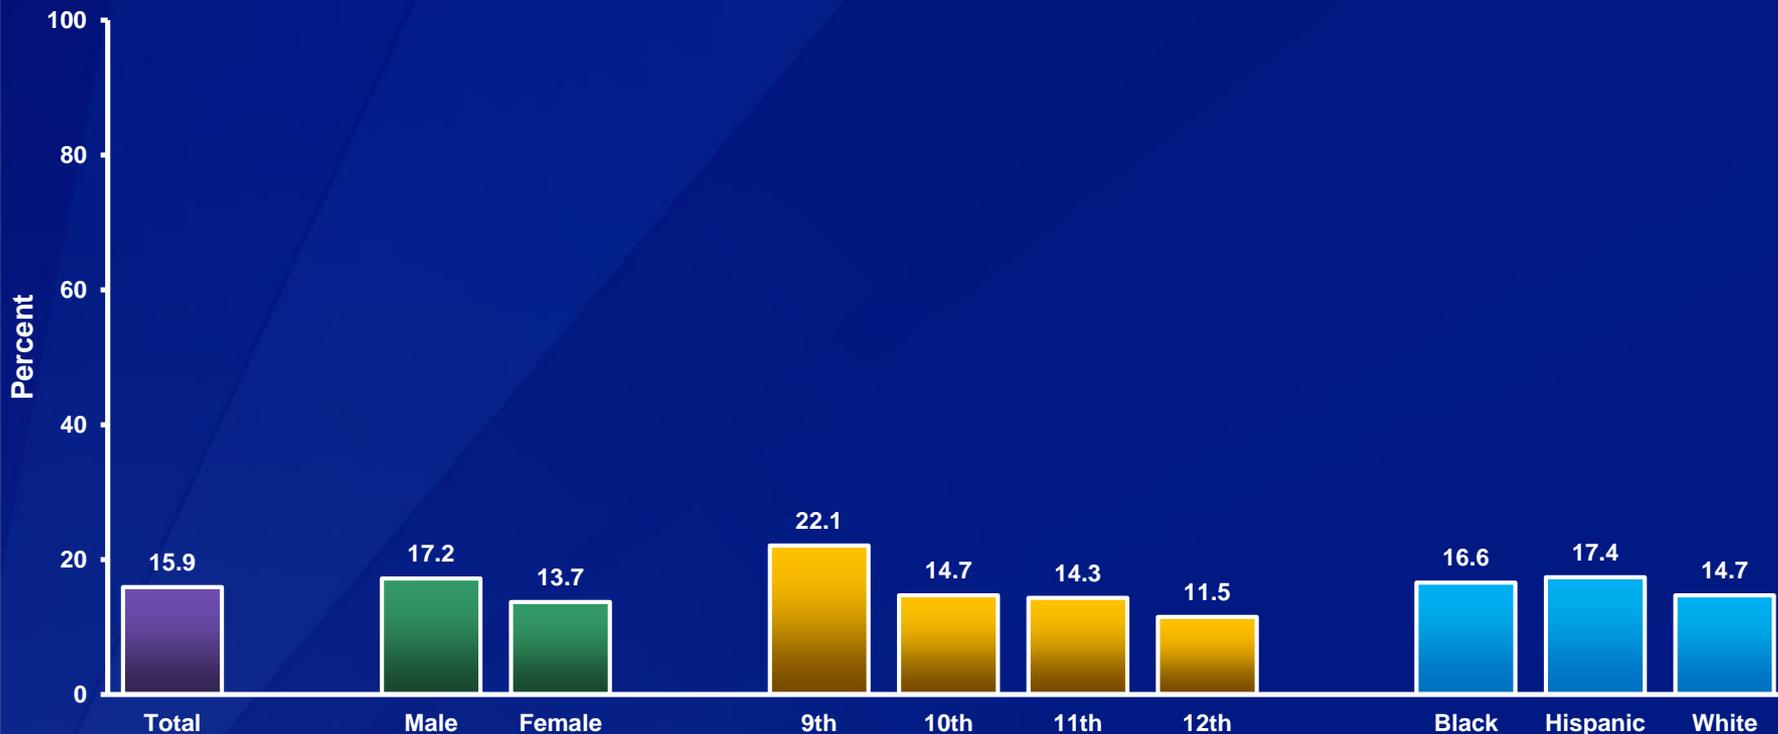

*At least one drink of alcohol, on at least 1 day during their life

†F > M; 11th > 9th, 11th > 10th, 12th > 9th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Had Their First Drink of Alcohol Before Age 13 Years,* by Sex,† Grade,† and Race/Ethnicity, 2017

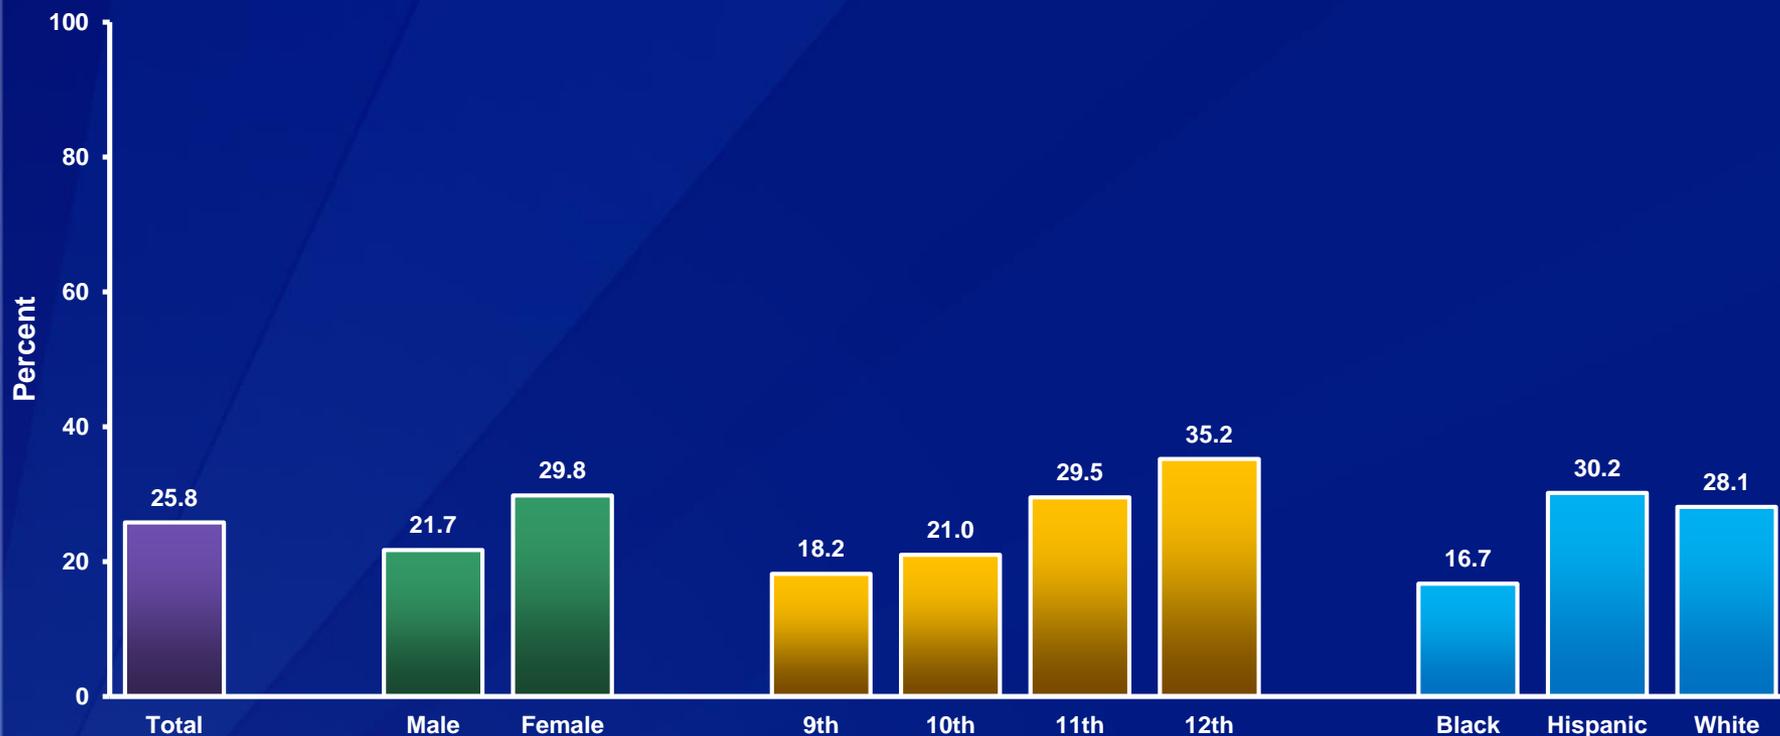

*Other than a few sips

†M > F; 9th > 10th, 9th > 11th, 9th > 12th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Drank Alcohol,* by Sex,[†] Grade,[†] and Race/Ethnicity,[†] 2017

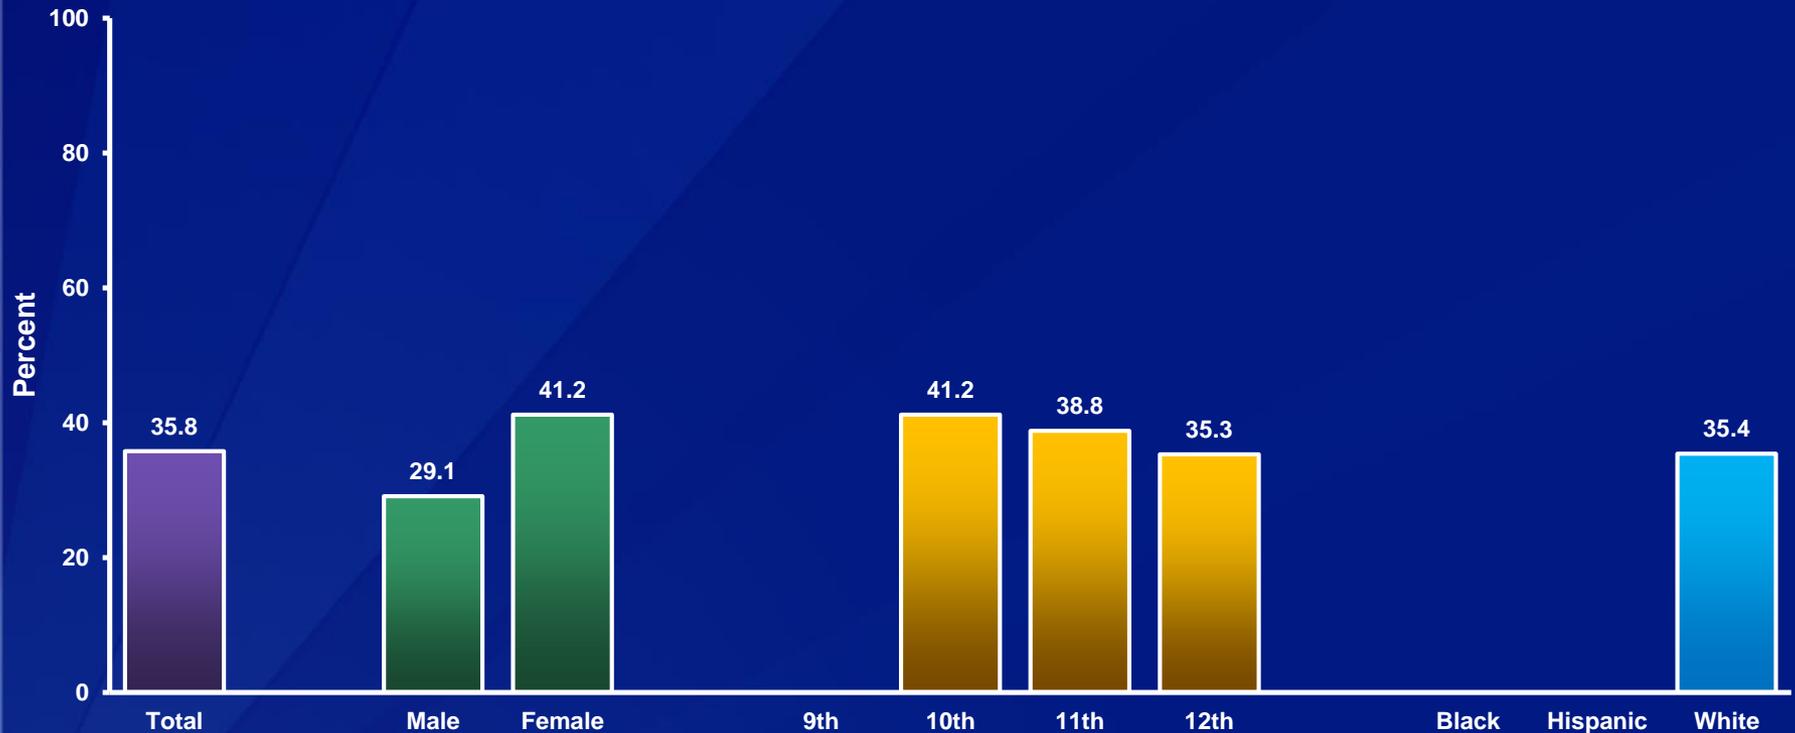

*At least one drink of alcohol, on at least 1 day during the 30 days before the survey

[†]F > M; 11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

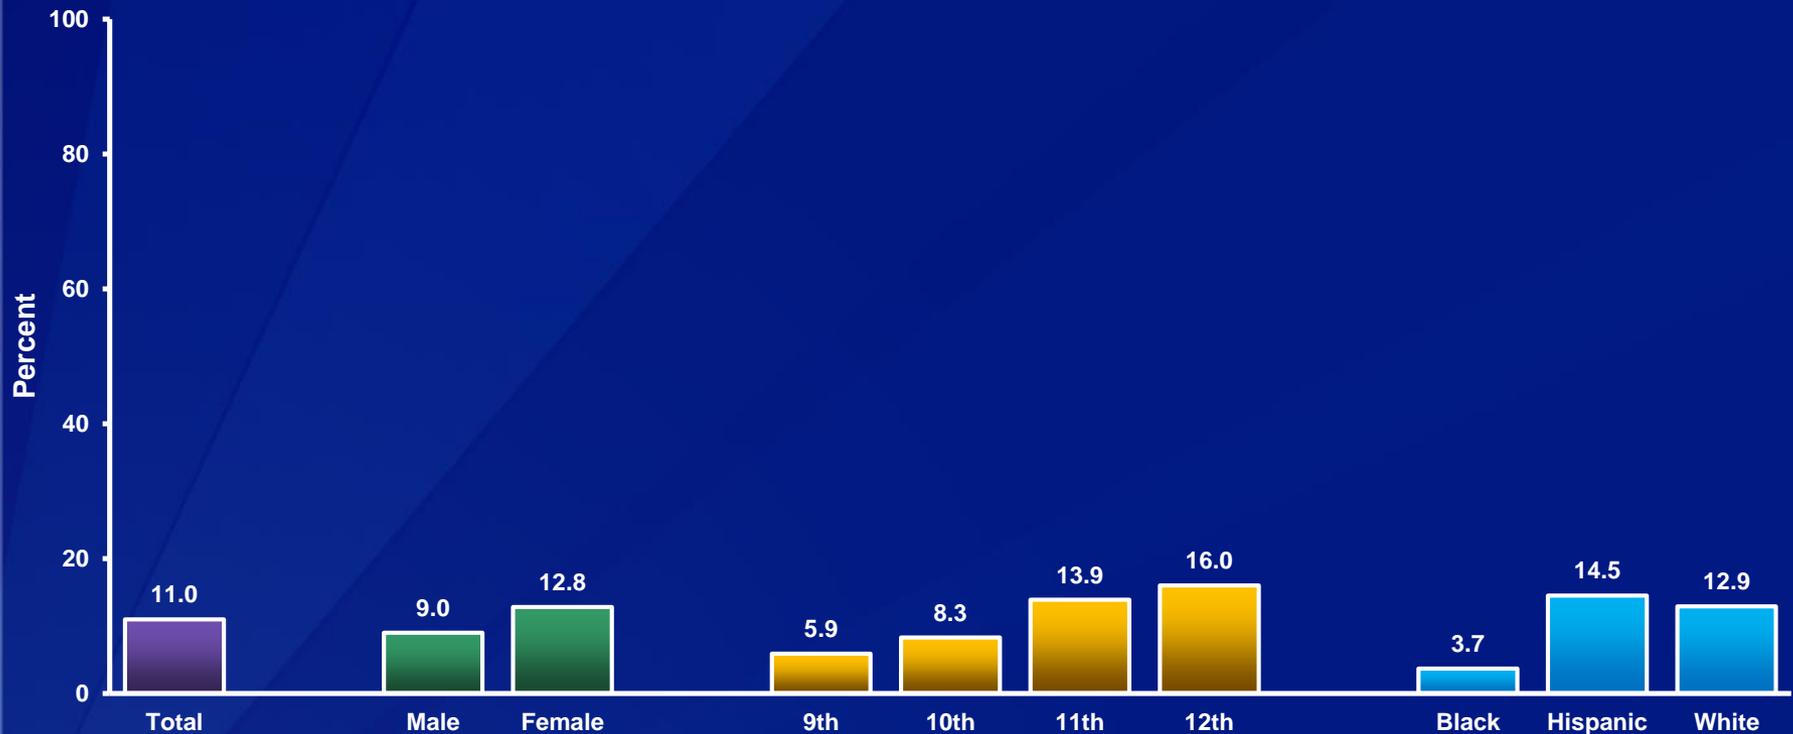

Note: This graph contains weighted results.

Percentage of High School Students Who Usually Got the Alcohol They Drank by Someone Giving It to Them,* by Sex, Grade, and Race/Ethnicity, 2017

*During the 30 days before the survey, among students who currently drank alcohol
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
Missing bar indicates fewer than 100 students in this subgroup.
Note: This graph contains weighted results.

Percentage of High School Students Who Currently Were Binge Drinking,* by Sex, Grade,† and Race/Ethnicity,† 2017

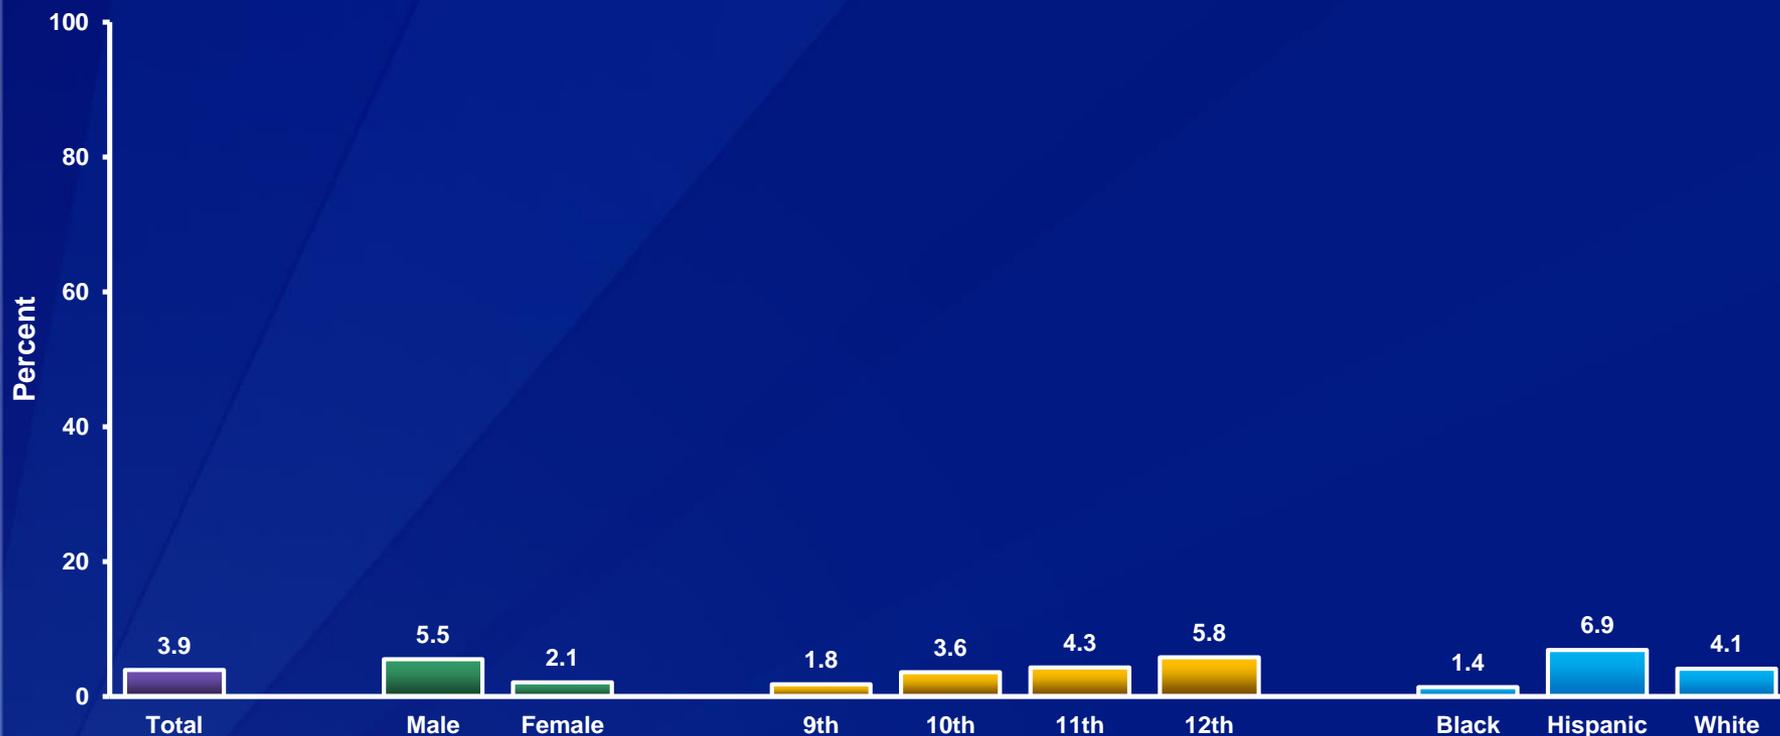

*Had four or more drinks of alcohol in a row for female students or five or more drinks of alcohol in a row for male students, within a couple of hours, on at least 1 day during the 30 days before the survey

†11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Reported That the Largest Number of Drinks They Had in a Row Was 10 or More,* by Sex,[†] Grade,[†] and Race/Ethnicity,[†] 2017

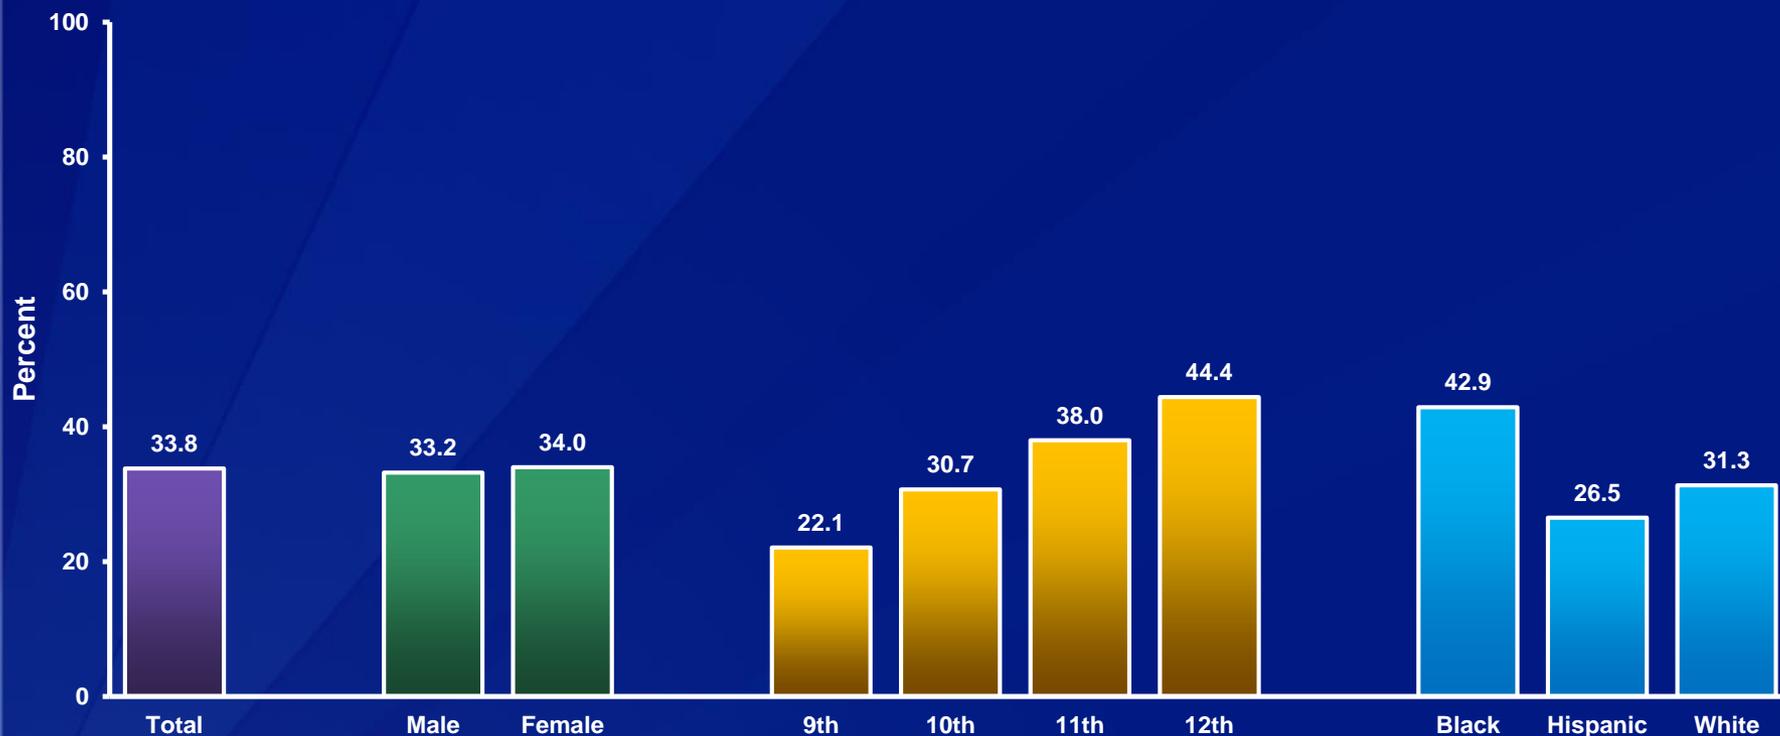

*Within a couple of hours, during the 30 days before the survey

[†]M > F; 12th > 9th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Used Marijuana,* by Sex, Grade,† and Race/Ethnicity,† 2017

*One or more times during their life

†10th > 9th, 11th > 9th, 12th > 9th, 12th > 10th; B > H, B > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Tried Marijuana for the First Time Before Age 13 Years, by Sex,* Grade, and Race/Ethnicity, 2017

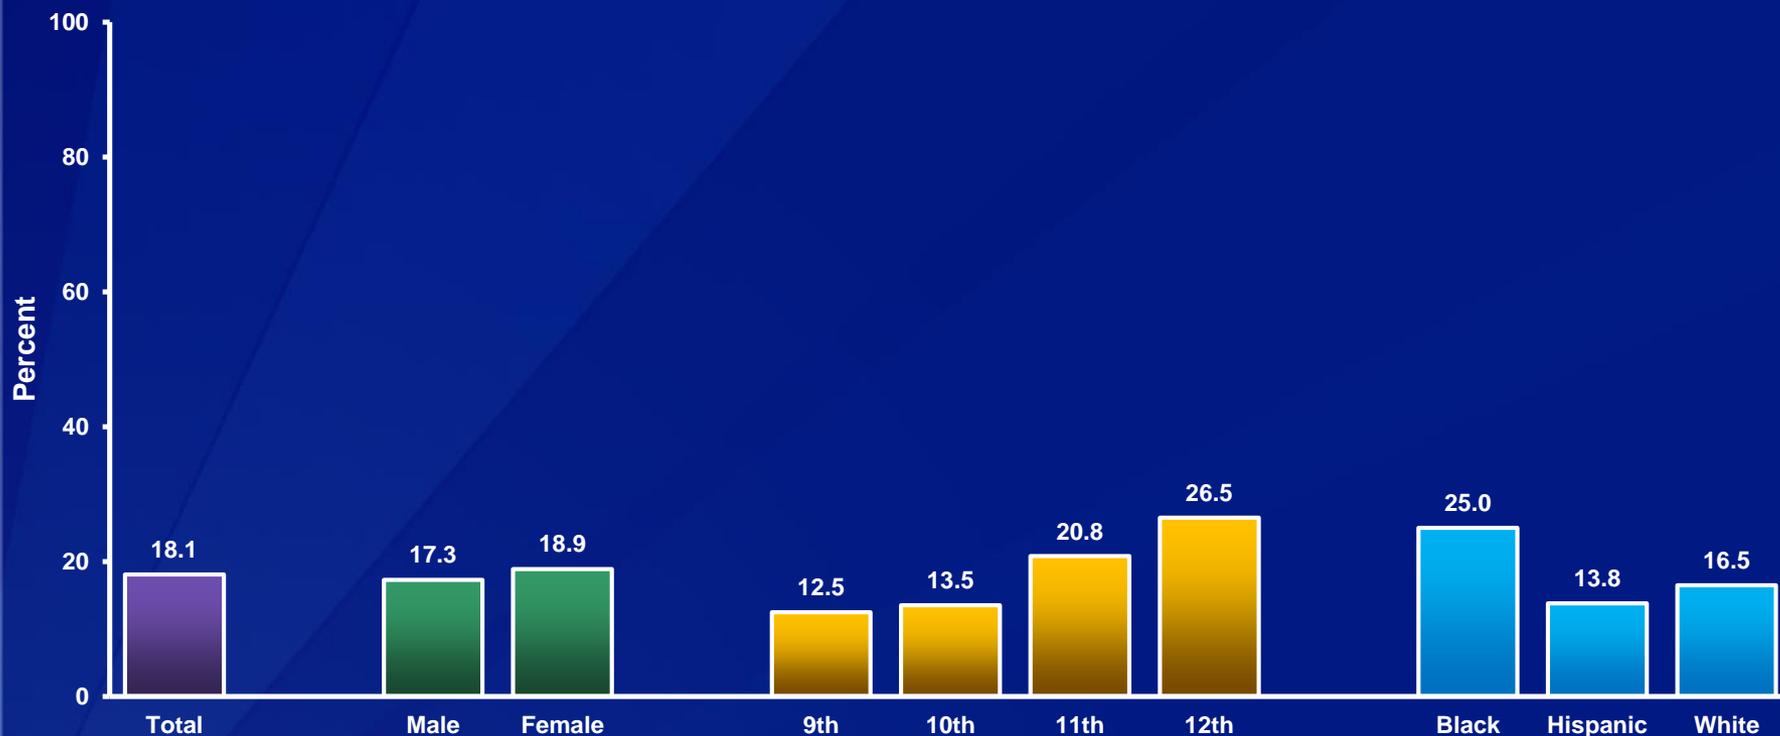

*M > F (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Currently Used Marijuana,* by Sex, Grade,† and Race/Ethnicity,† 2017

*One or more times during the 30 days before the survey

†11th > 9th, 11th > 10th, 12th > 9th, 12th > 10th; B > H, B > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Used Cocaine,* by Sex,† Grade, and Race/Ethnicity, 2017

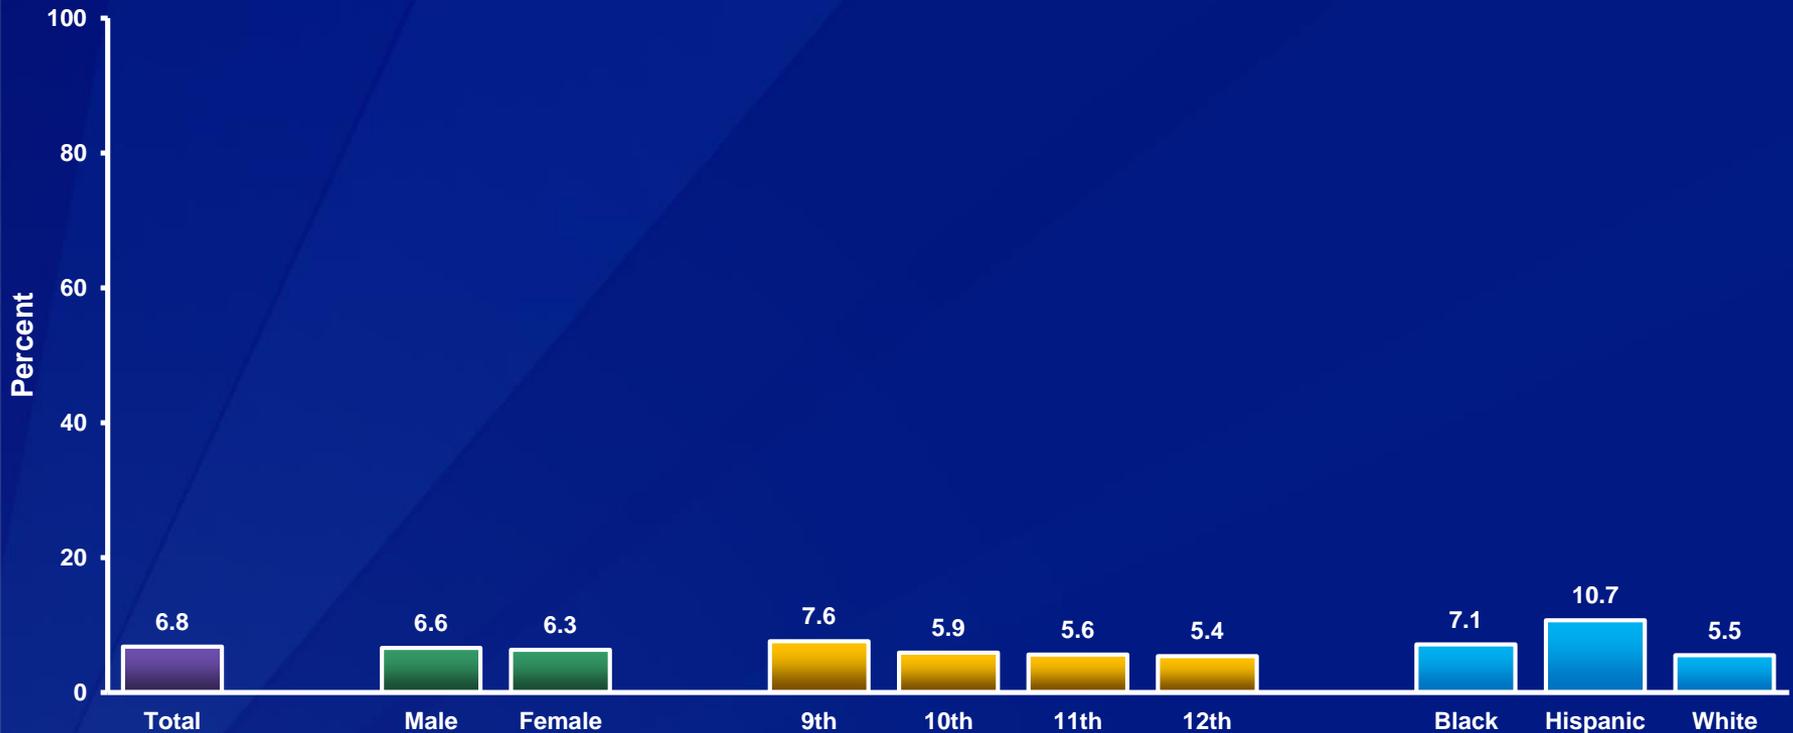

*Any form of cocaine, including powder, crack, or freebase, one or more times during their life

†M > F (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Used Inhalants,* by Sex, Grade, and Race/Ethnicity,† 2017

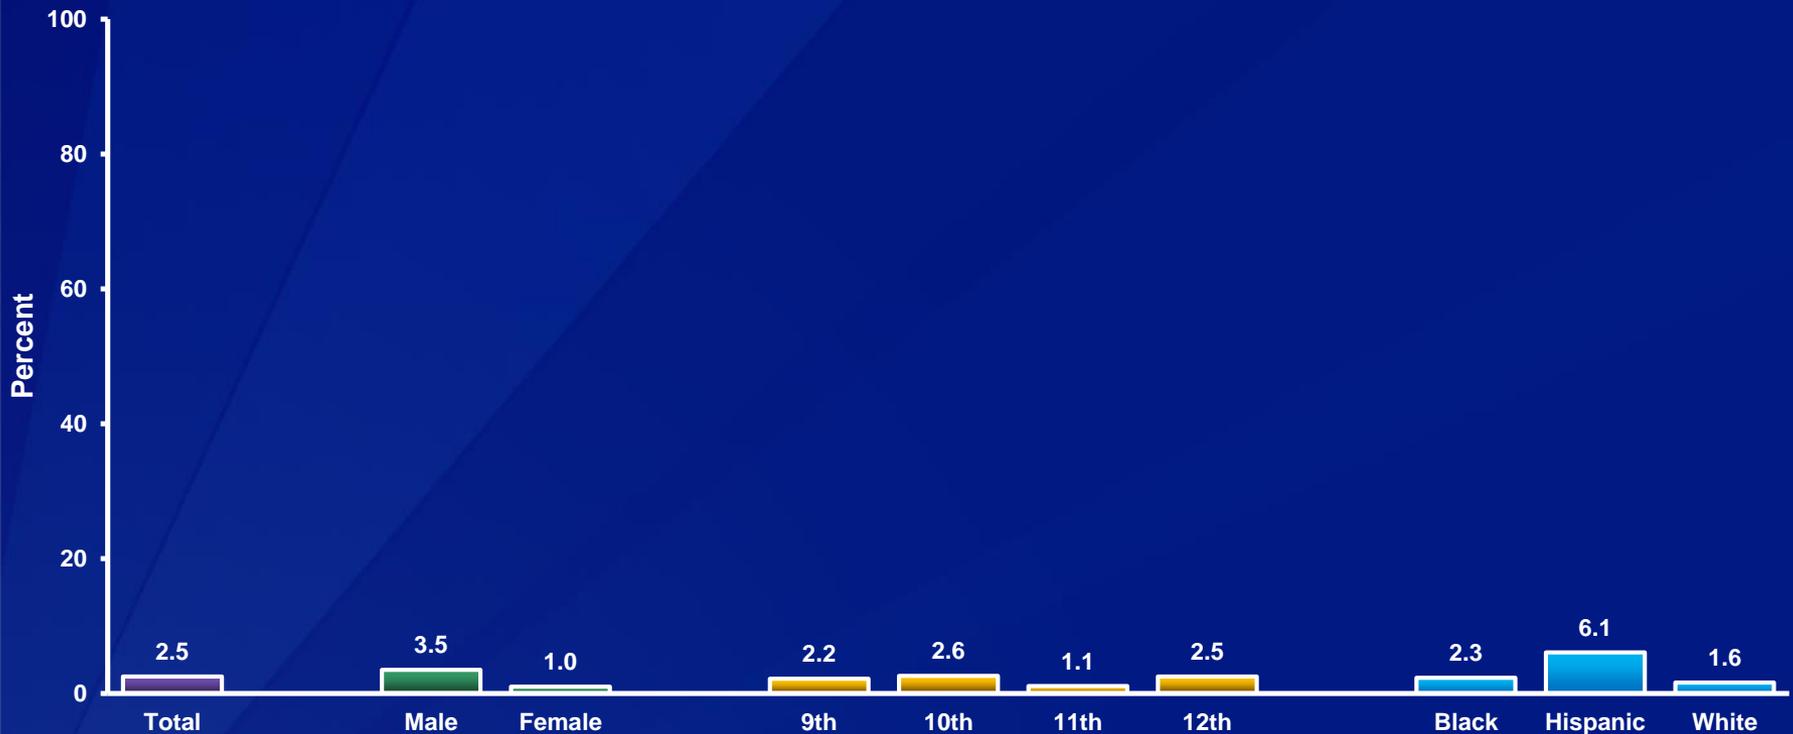

*Sniffed glue, breathed the contents of aerosol spray cans, or inhaled any paints or sprays to get high, one or more times during their life

†H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Used Heroin,* by Sex,† Grade, and Race/Ethnicity,† 2017

*Also called "smack," "junk," or "China White," one or more times during their life

†M > F; H > B, H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Used Methamphetamines,* by Sex,† Grade, and Race/Ethnicity, 2017

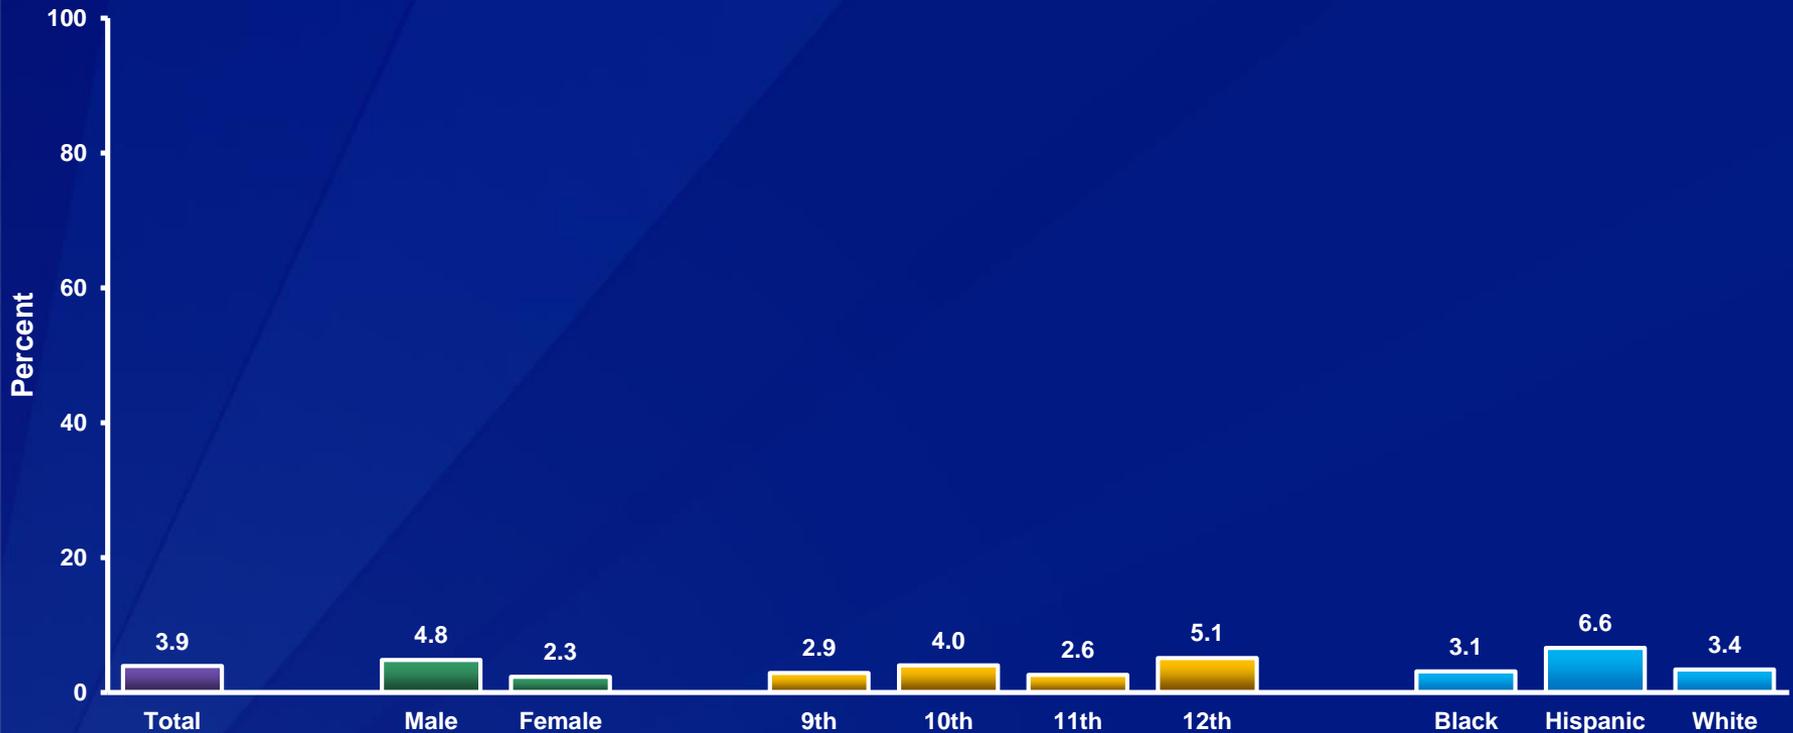

*Also called "speed," "crystal," "crank," or "ice," one or more times during their life

†M > F (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Used Ecstasy,* by Sex,† Grade, and Race/Ethnicity,† 2017

*Also called "MDMA," one or more times during their life

†M > F; H > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Used Synthetic Marijuana,* by Sex,[†] Grade,[†] and Race/Ethnicity, 2017

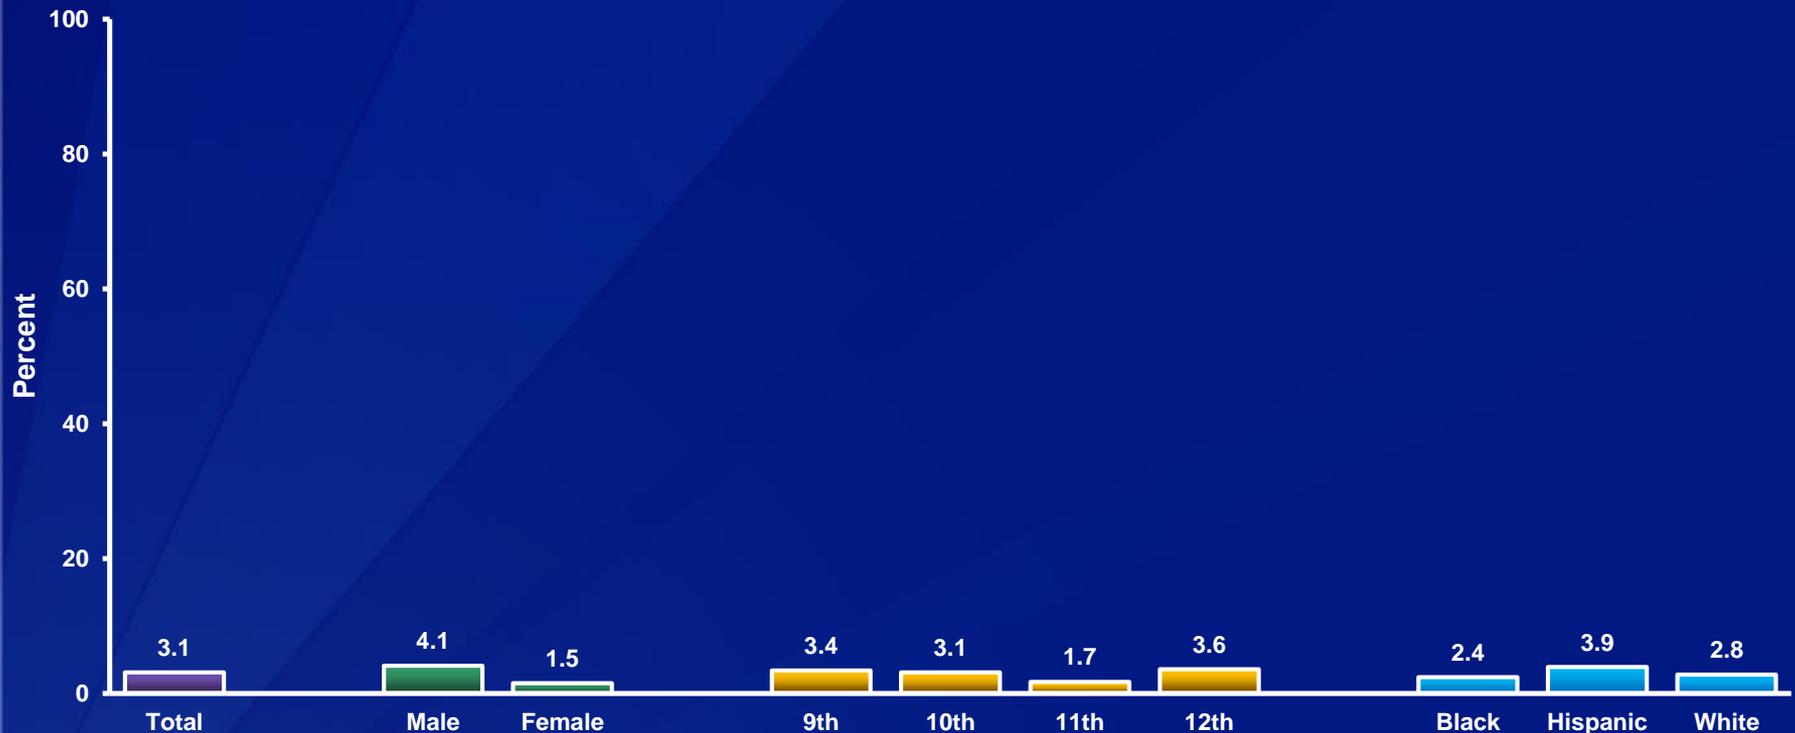

*Also called "K2," "Spice," "fake weed," "King Kong," "Yucatan Fire," "Skunk," or "Moon Rocks," one or more times during their life

[†]M > F; 12th > 11th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Took Steroids Without a Doctor's Prescription,* by Sex,[†] Grade, and Race/Ethnicity, 2017

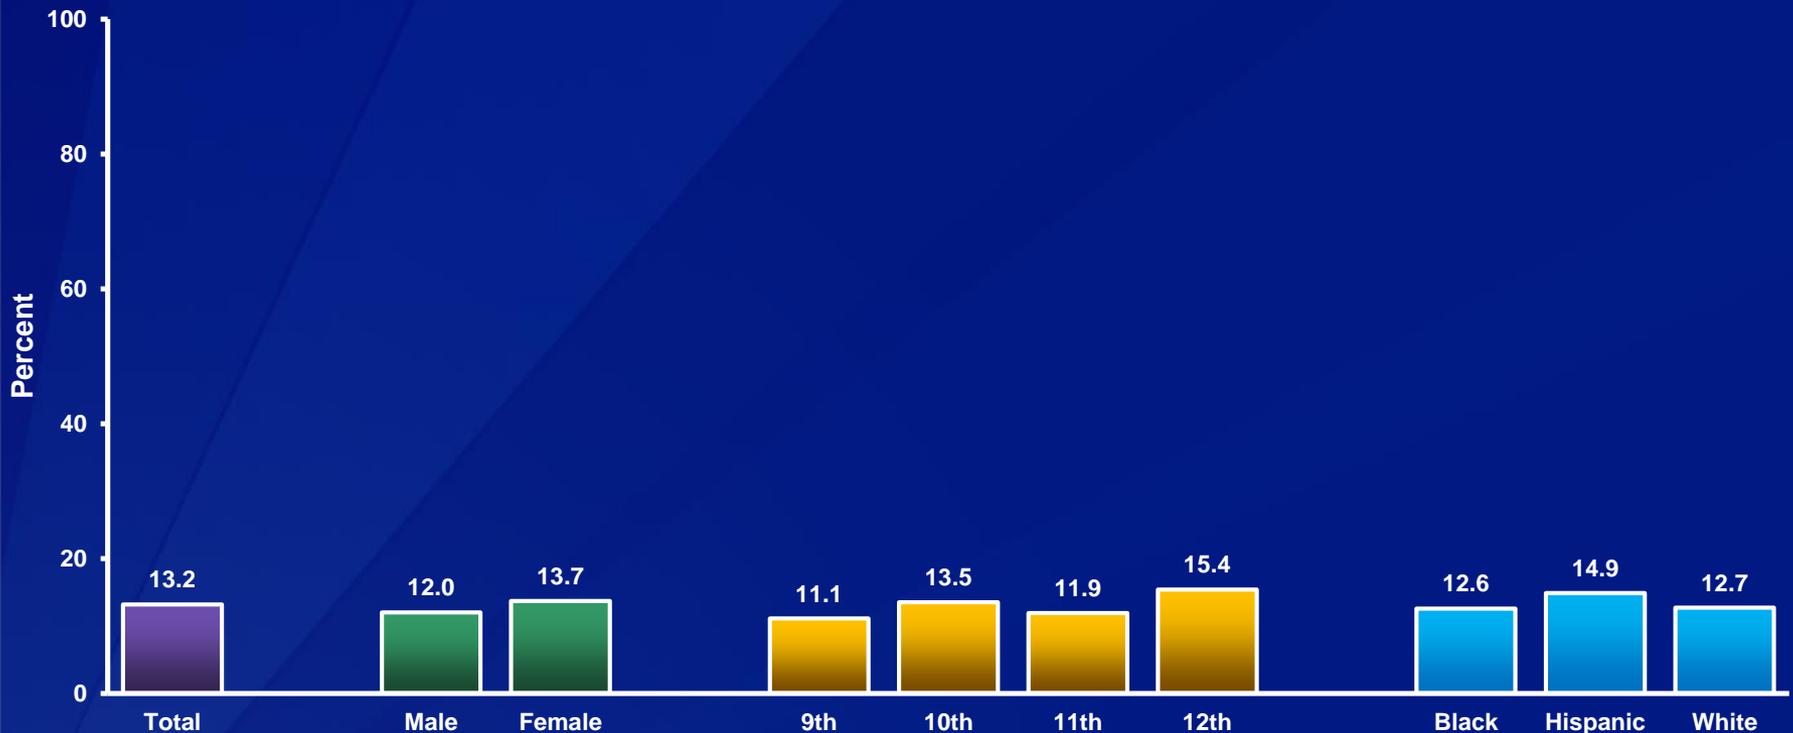

*Pills or shots, one or more times during their life

[†]M > F (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

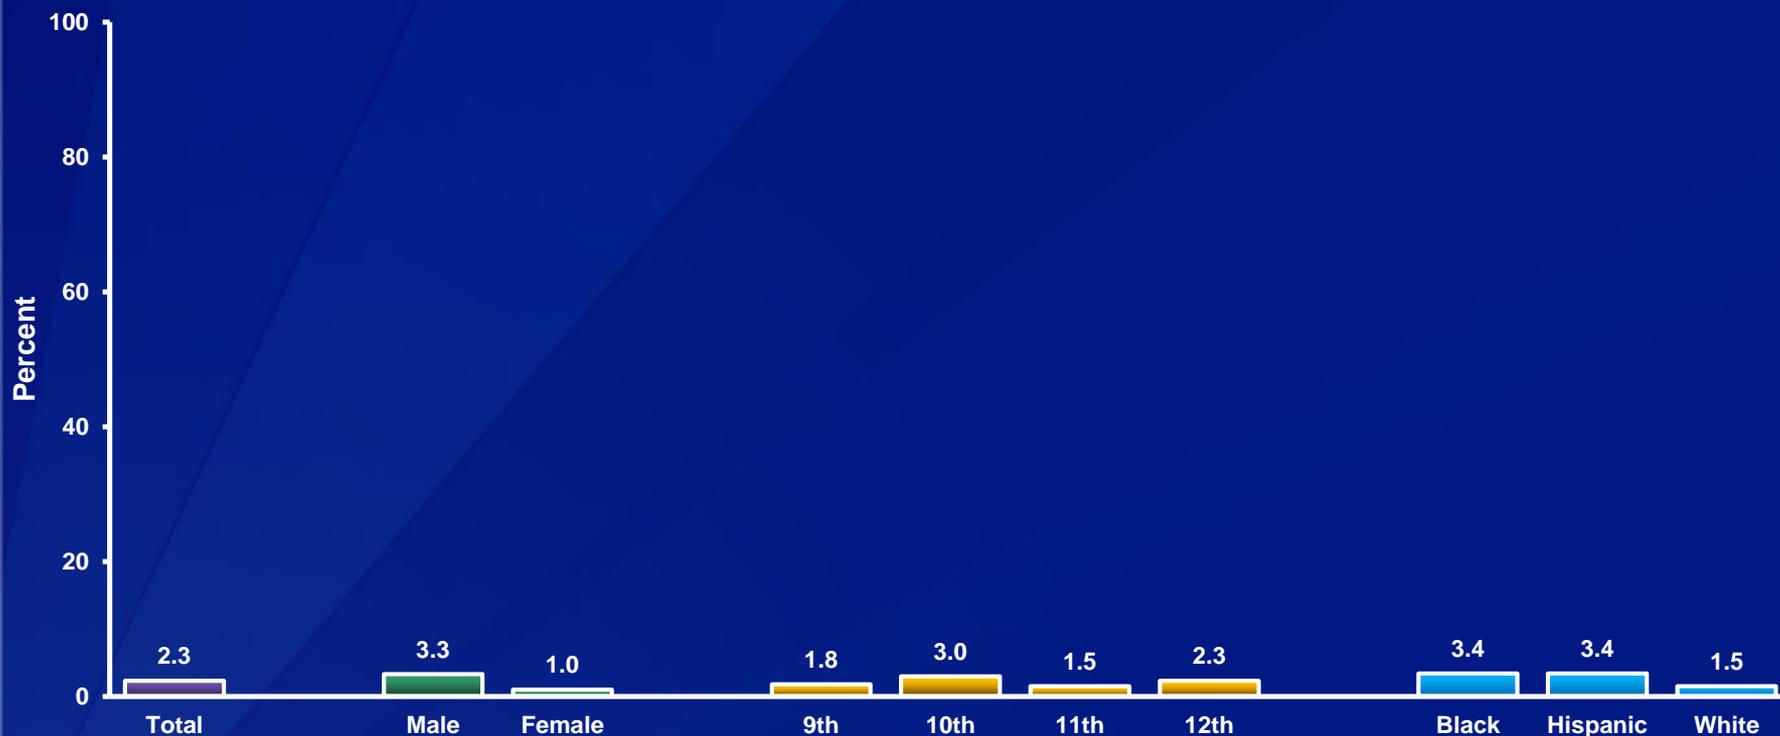

Note: This graph contains weighted results.

Percentage of High School Students Who Ever Took Prescription Pain Medicine Without a Doctor's Prescription or Differently Than How a Doctor Told Them to Use It,* by Sex, Grade, and Race/Ethnicity, 2017

*Counting drugs such as codeine, Vicodin, OxyContin, Hydrocodone, and Percocet, one or more times during their life
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
Note: This graph contains weighted results.

Percentage of High School Students Who Ever Injected Any Illegal Drug,* by Sex,[†] Grade, and Race/Ethnicity, 2017

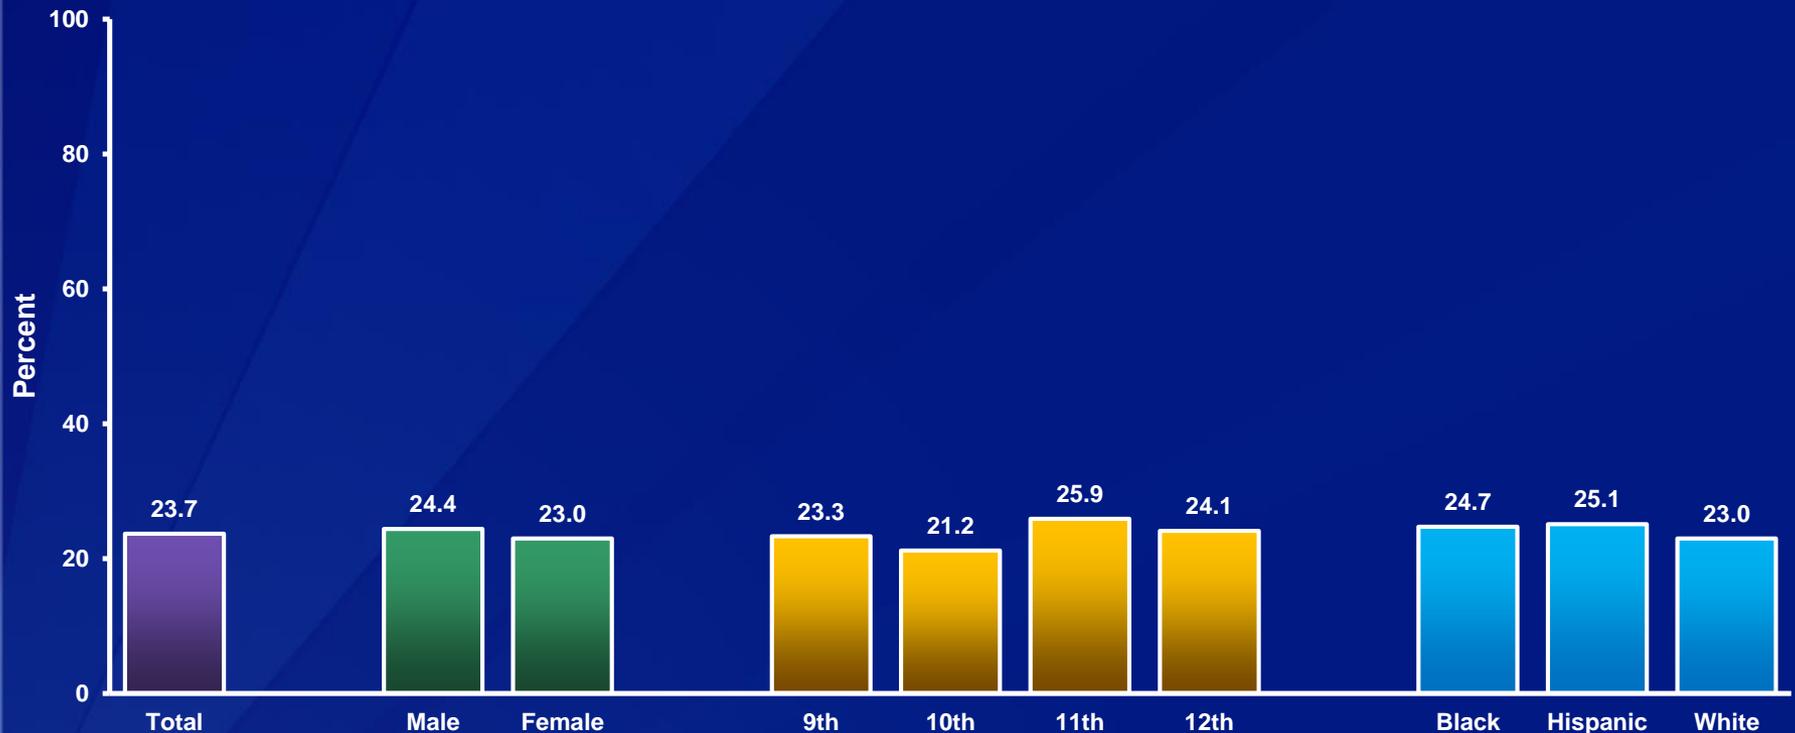

*Used a needle to inject any illegal drug into their body, one or more times during their life

[†]M > F (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Offered, Sold, or Given an Illegal Drug on School Property,* by Sex, Grade, and Race/Ethnicity, 2017

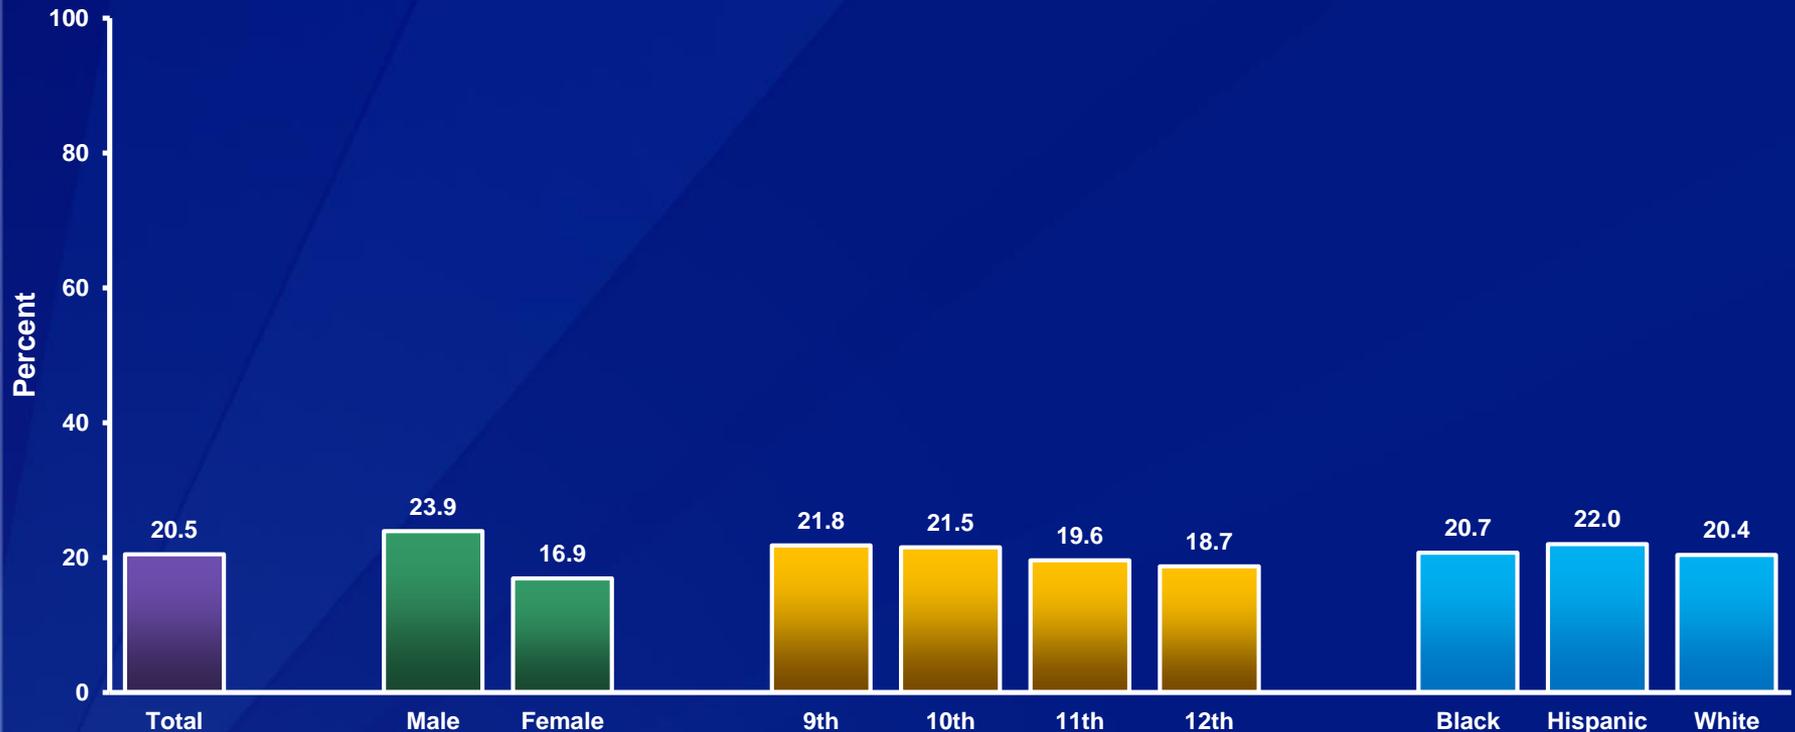

*During the 12 months before the survey

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Had Obesity,* by Sex,† Grade, and Race/Ethnicity, 2017

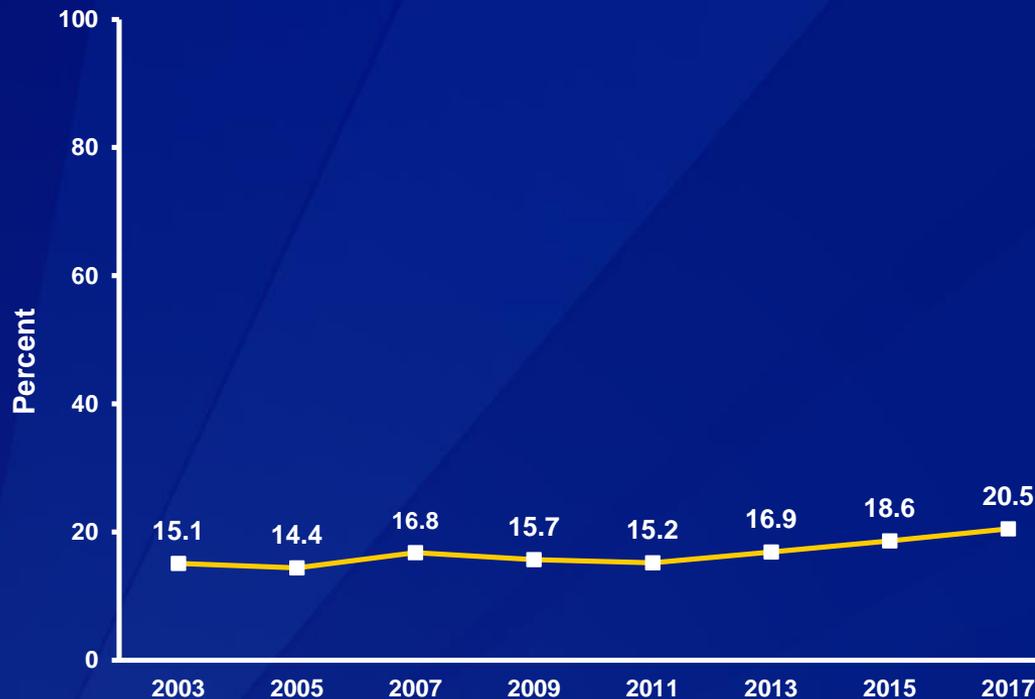

* \geq 95th percentile for body mass index, based on sex- and age-specific reference data from the 2000 CDC growth charts. In 2017, new, slightly different ranges were used to calculate biologically implausible responses to height and weight questions.

†M > F (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Had Obesity,* 2003-2017†

* \geq 95th percentile for body mass index, based on sex- and age-specific reference data from the 2000 CDC growth charts. In 2017, new, slightly different ranges were used to calculate biologically implausible responses to height and weight questions.

†Increased 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Were Overweight,* by Sex, Grade, and Race/Ethnicity, 2017

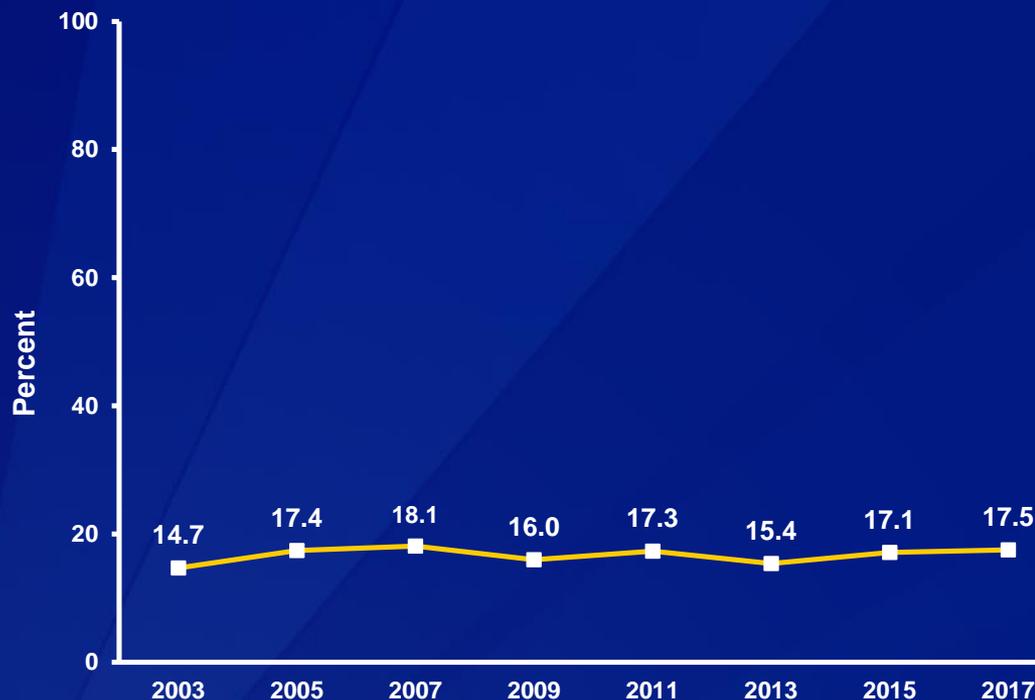

* \geq 85th percentile but $<$ 95th percentile for body mass index, based on sex- and age-specific reference data from the 2000 CDC growth charts. In 2017, new, slightly different ranges were used to calculate biologically implausible responses to height and weight questions.

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Overweight,* 2003-2017†

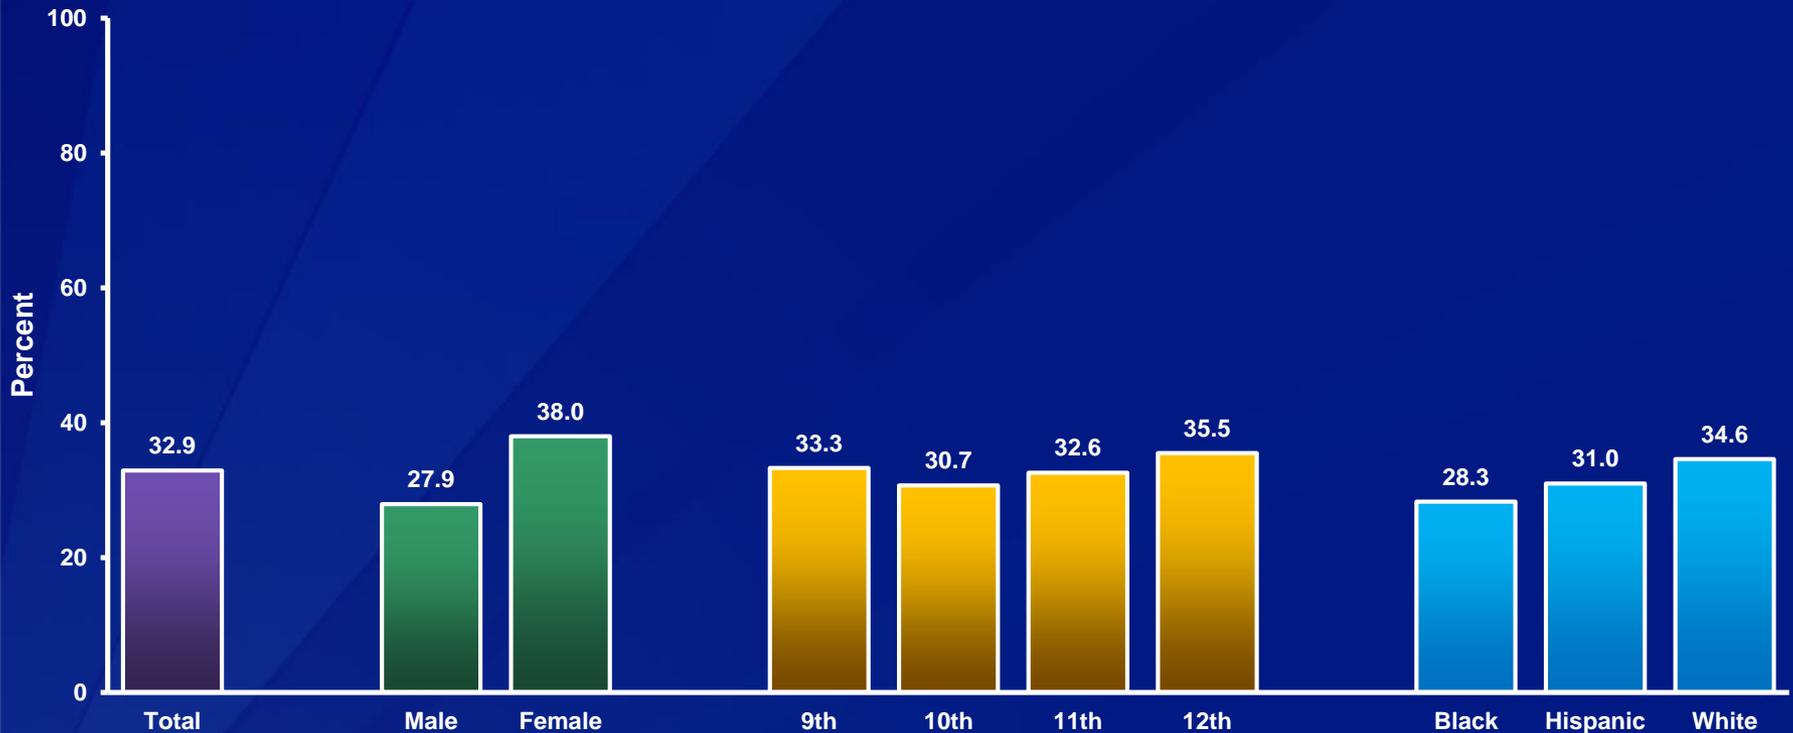

* ≥ 85 th percentile but < 95 th percentile for body mass index, based on sex- and age-specific reference data from the 2000 CDC growth charts. In 2017, new, slightly different ranges were used to calculate biologically implausible responses to height and weight questions.

†No change 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Described Themselves As Slightly or Very Overweight, by Sex,* Grade, and Race/Ethnicity,* 2017

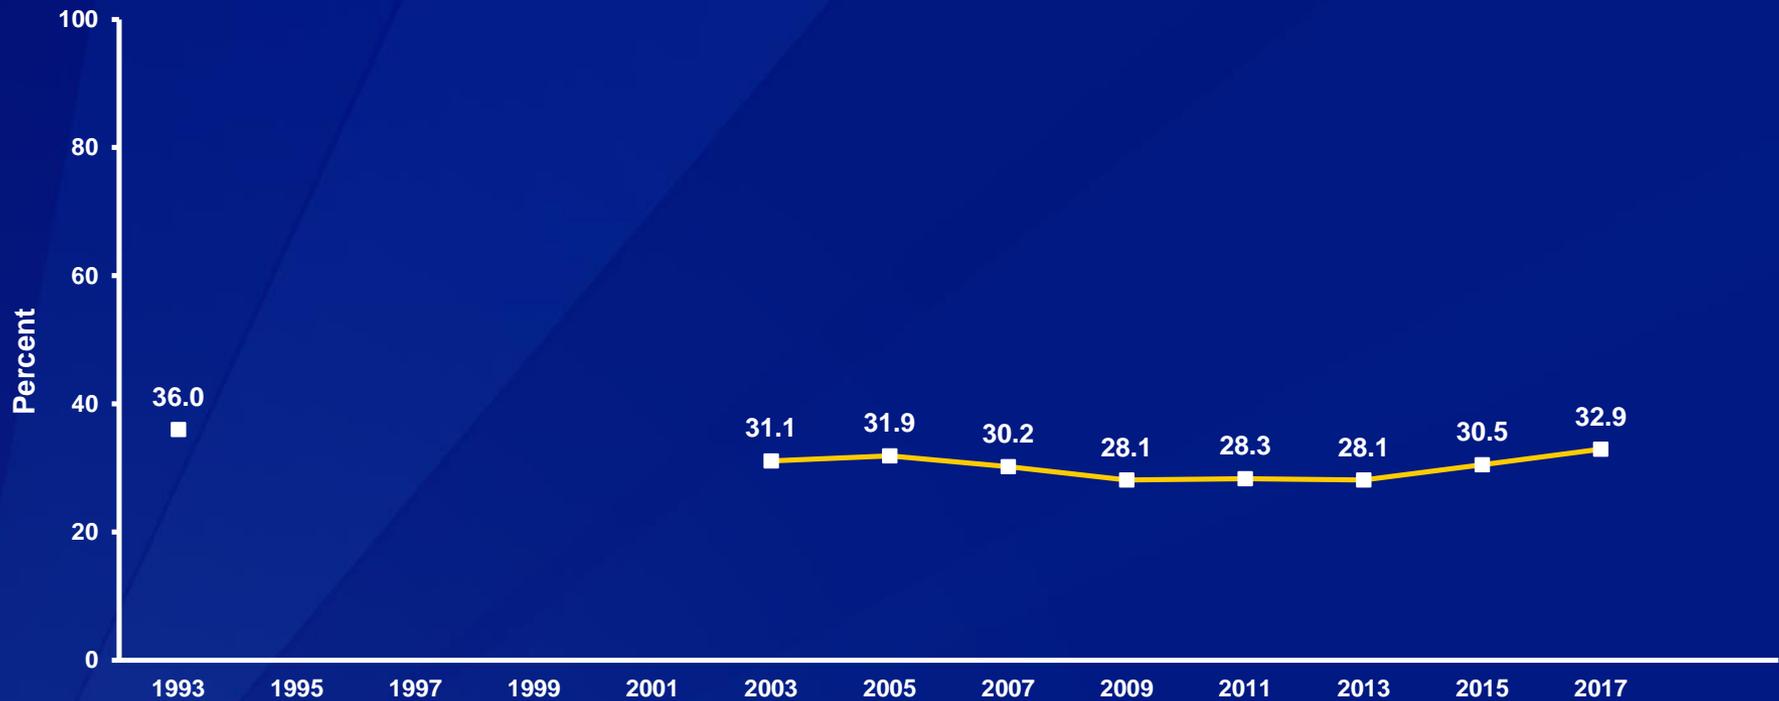

*F > M; W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Described Themselves As Slightly or Very Overweight, 1993-2017*

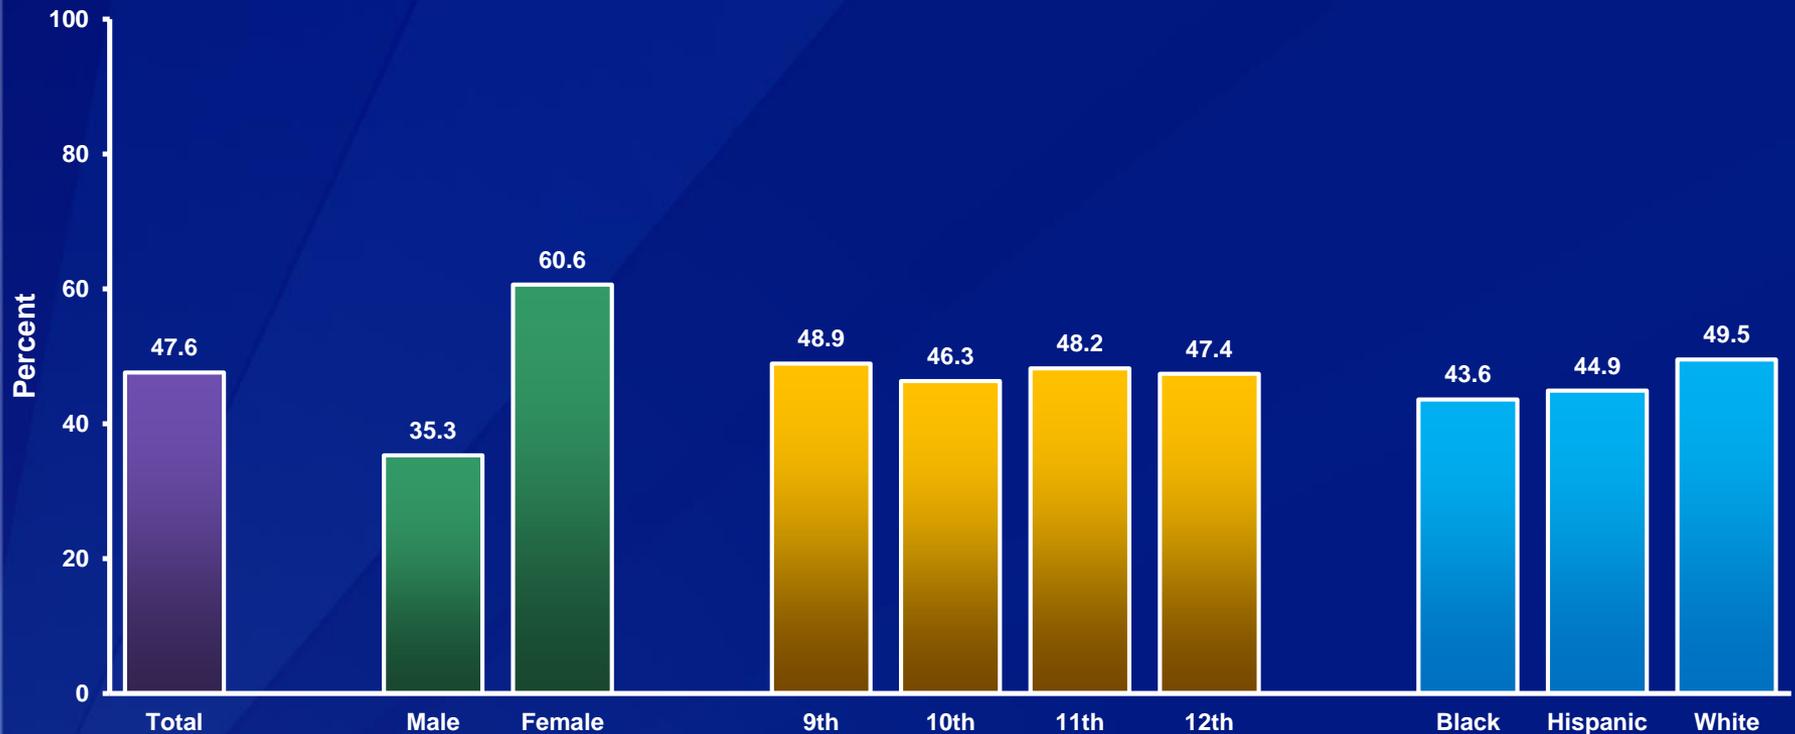

*Decreased 1993-2017, decreased 1993-2013, increased 2013-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Trying to Lose Weight, by Sex,* Grade, and Race/Ethnicity, 2017

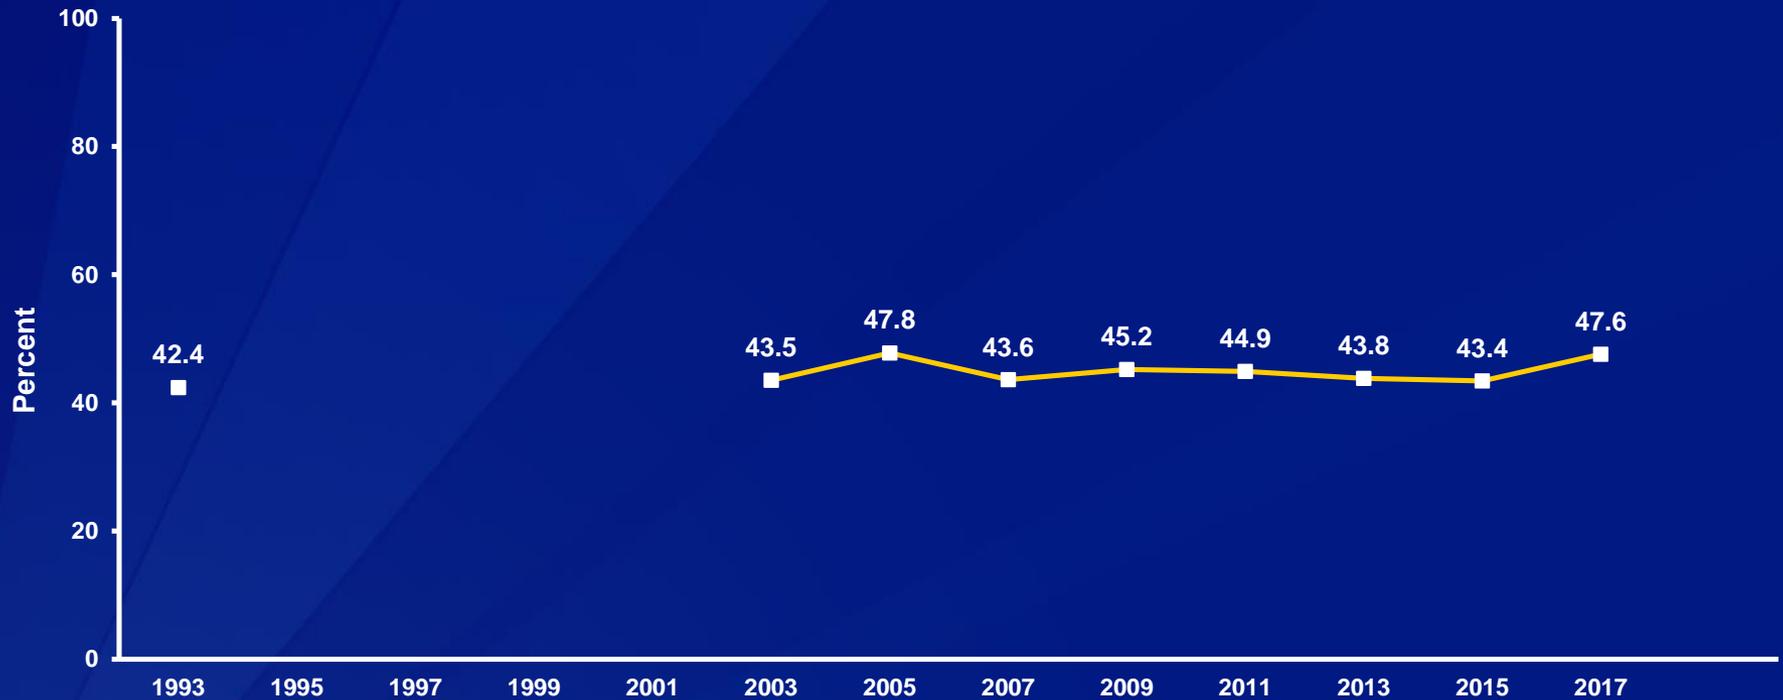

*F > M (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Trying to Lose Weight, 1993-2017*

*Increased 1993-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Drink Fruit Juice,* by Sex,[†] Grade, and Race/Ethnicity,[†] 2017

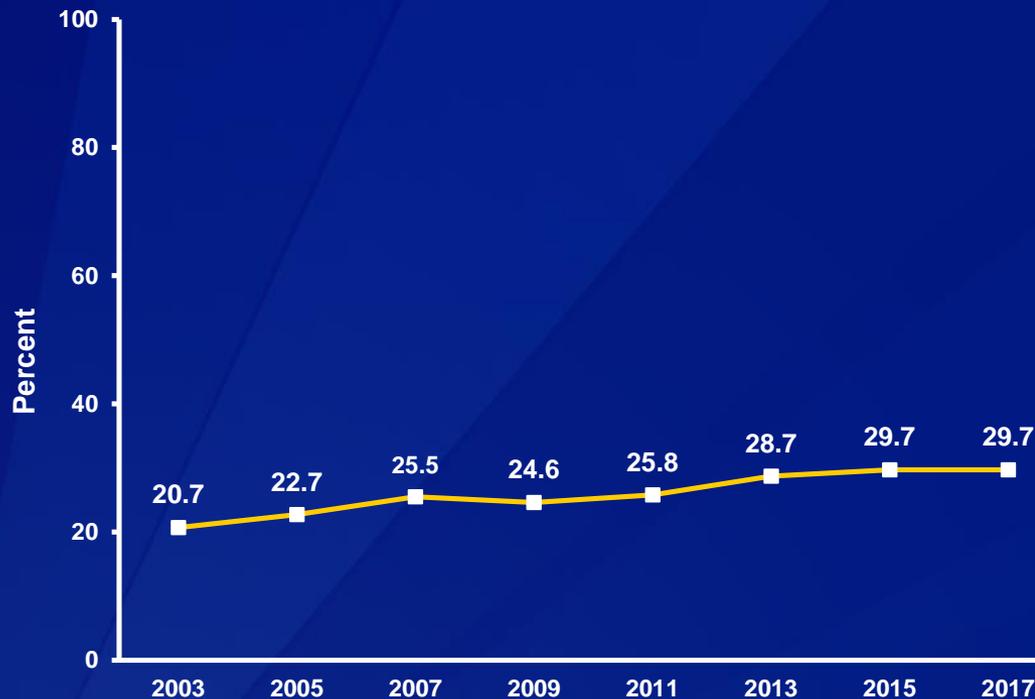

*100% fruit juices one or more times during the 7 days before the survey

[†]F > M; W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Drink Fruit Juice,* 2003-2017†

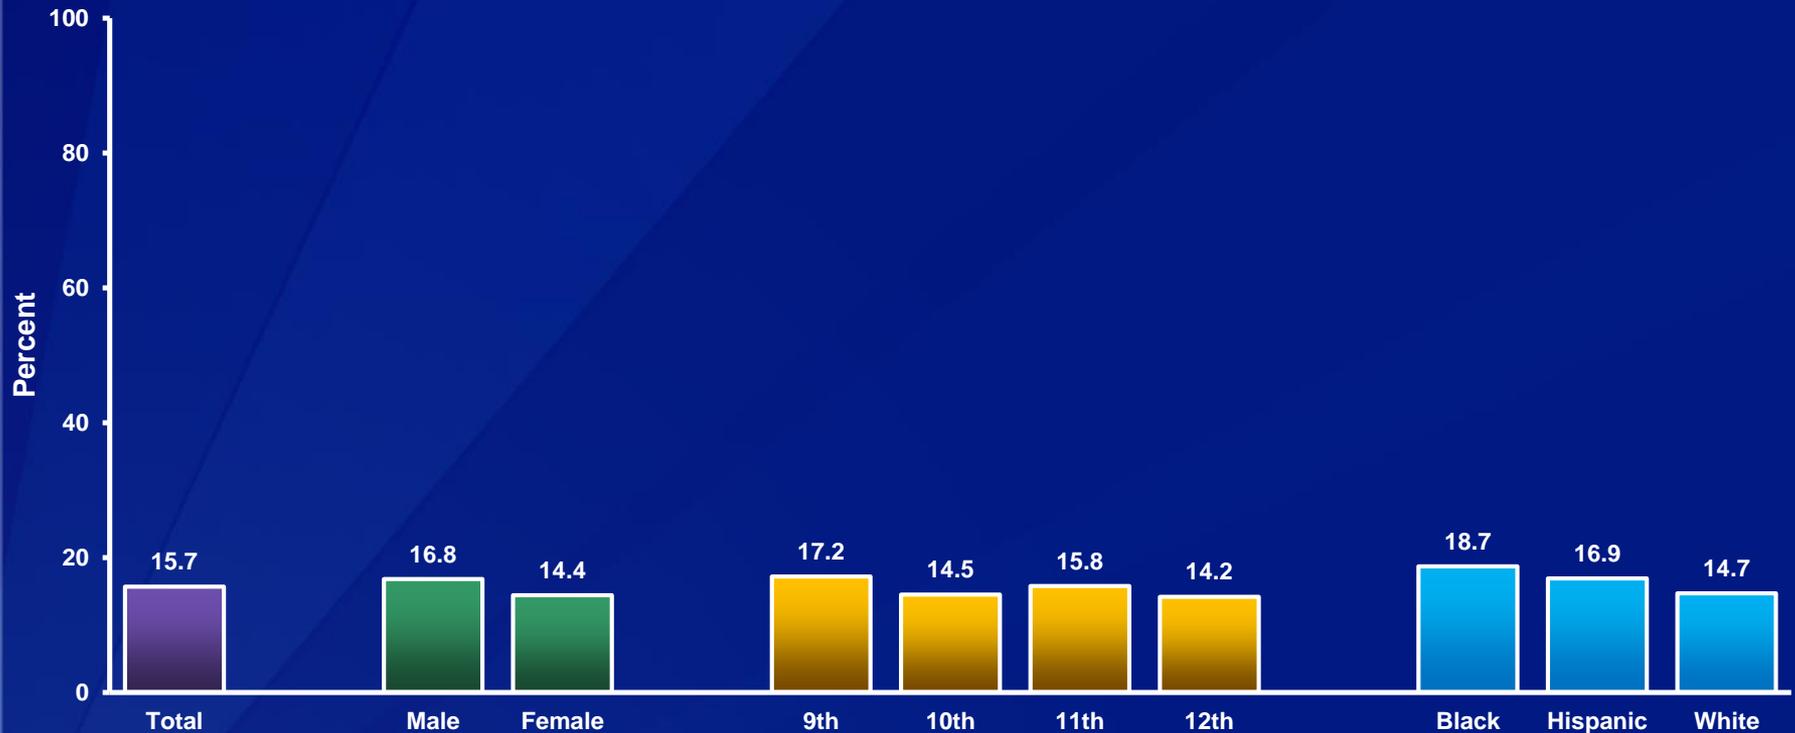

*100% fruit juices one or more times during the 7 days before the survey

†Increased 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Fruit,* by Sex, Grade, and Race/Ethnicity, 2017

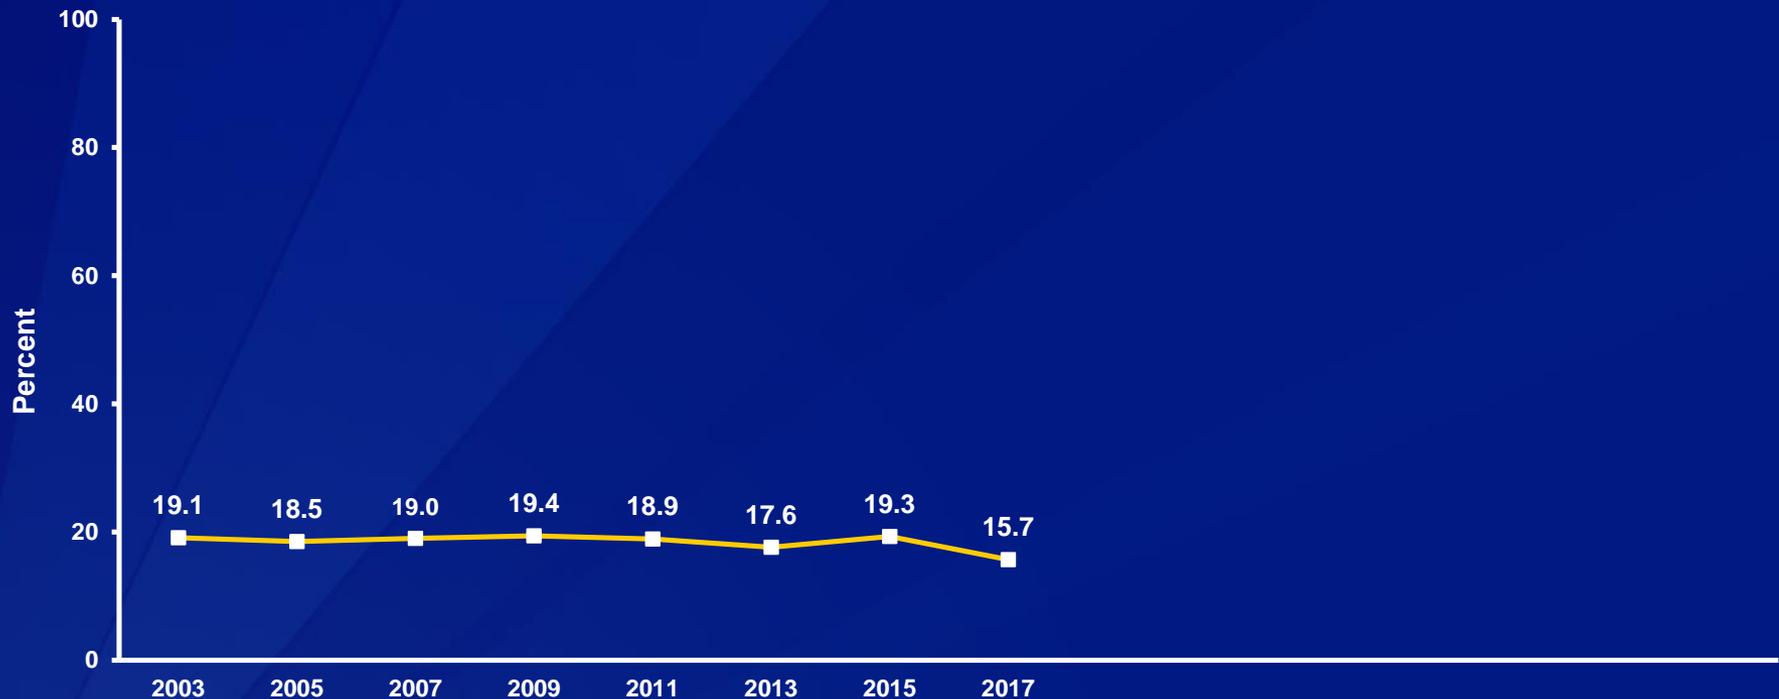

*One or more times during the 7 days before the survey

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Fruit,* 2003-2017†

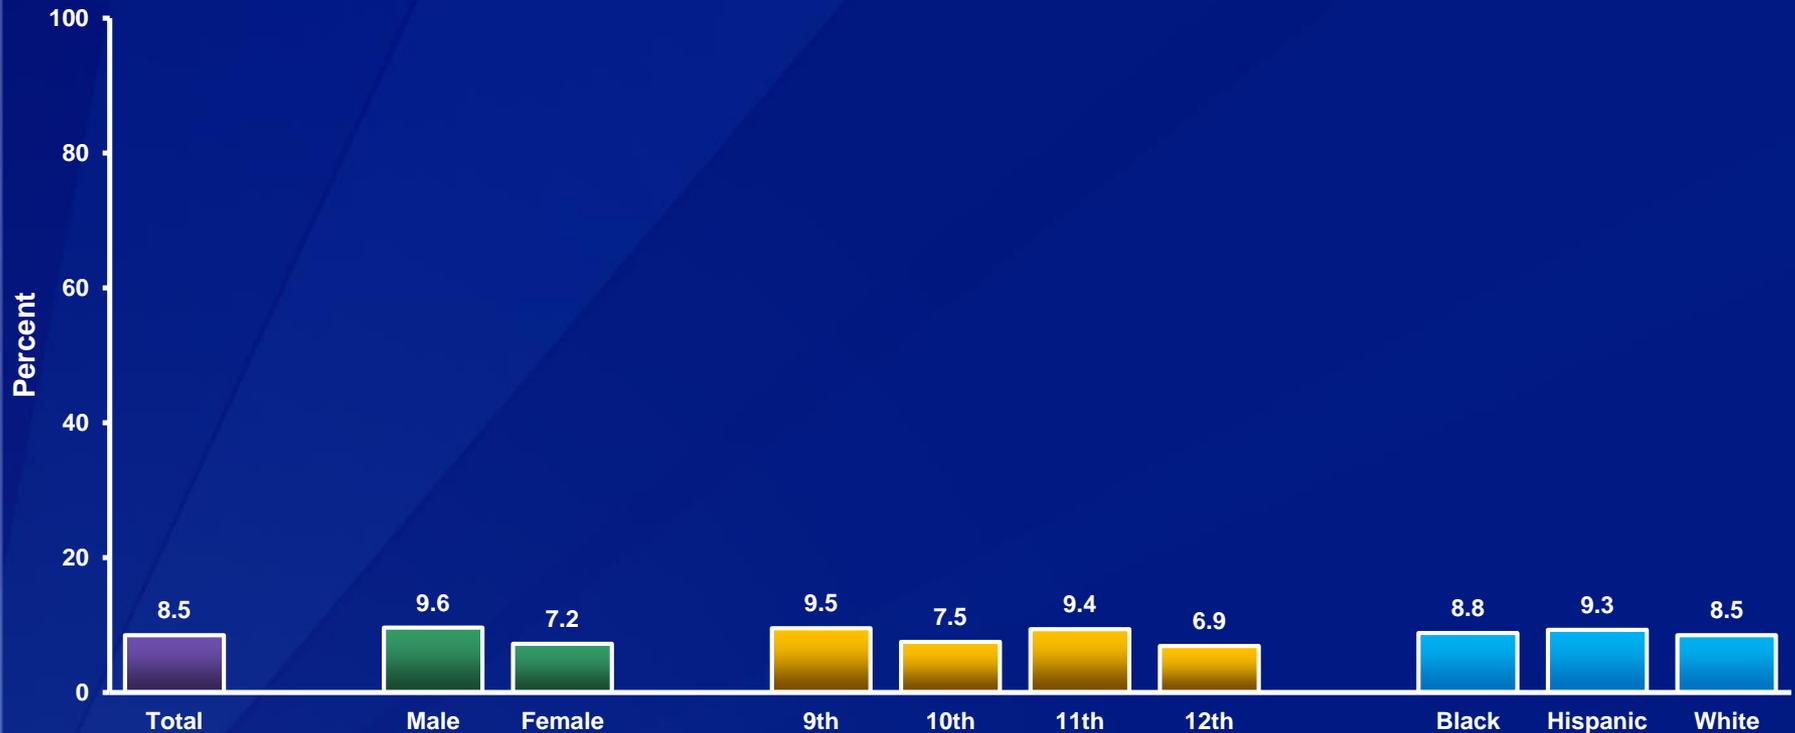

*One or more times during the 7 days before the survey

†No change 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Fruit or Drink 100% Fruit Juices,* by Sex, Grade, and Race/Ethnicity, 2017

*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Fruit or Drink 100% Fruit Juices,* 2003-2017†

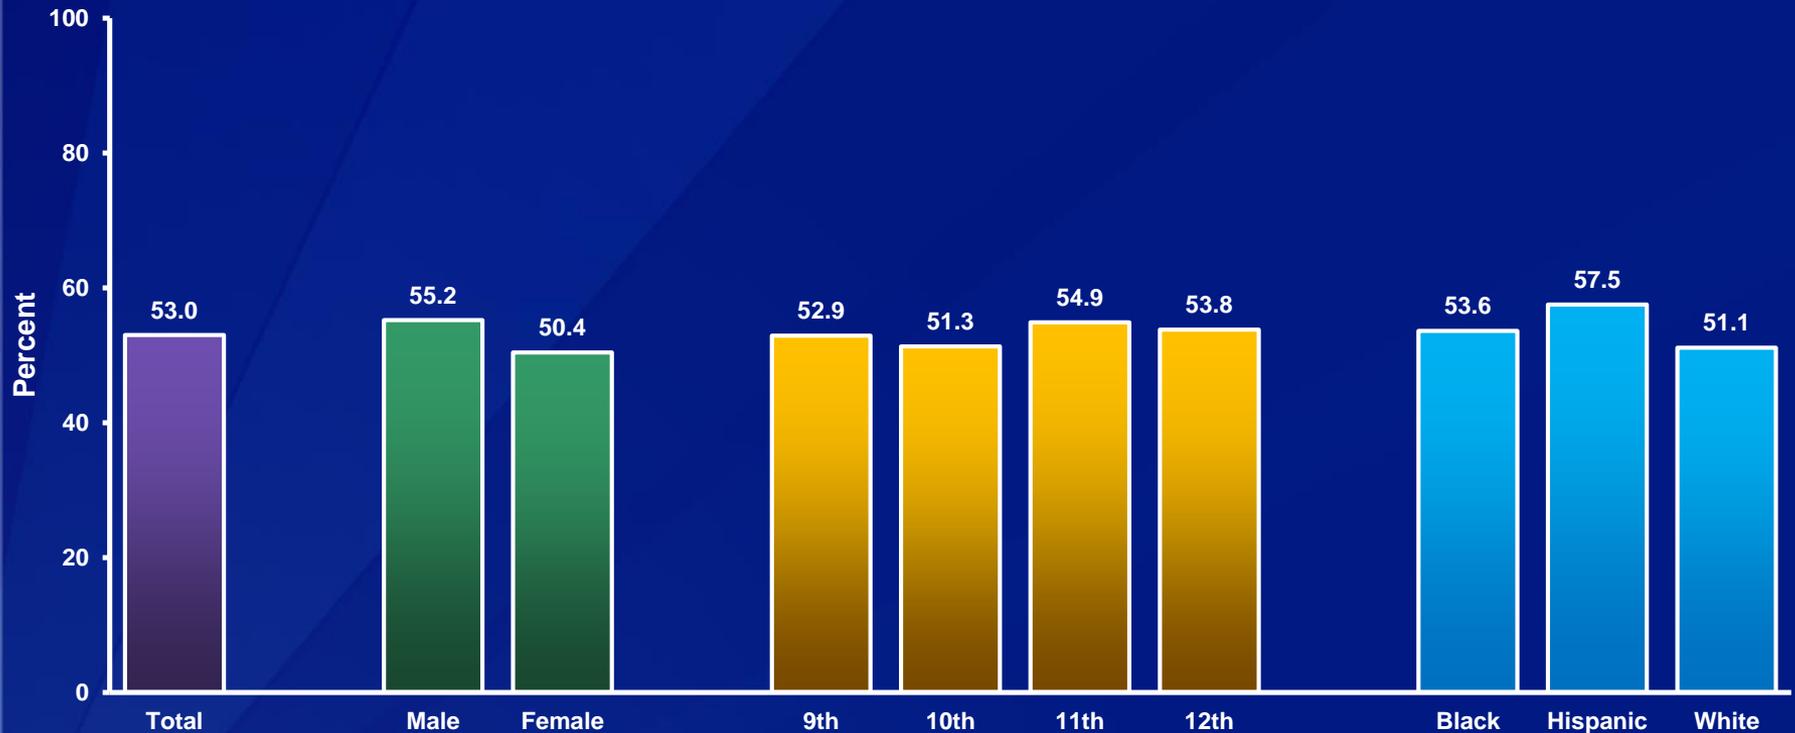

*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey

†No change 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

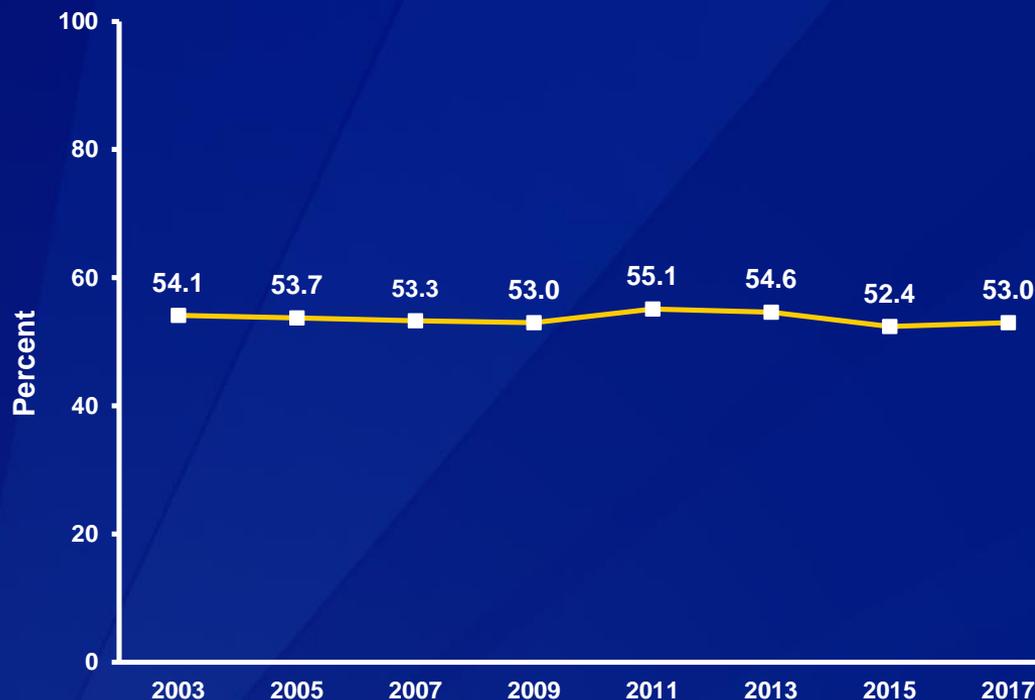

Note: This graph contains weighted results.

Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices One or More Times Per Day,* by Sex, Grade, and Race/Ethnicity, 2017

*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
Note: This graph contains weighted results.

Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices One or More Times Per Day,* 2003-2017†

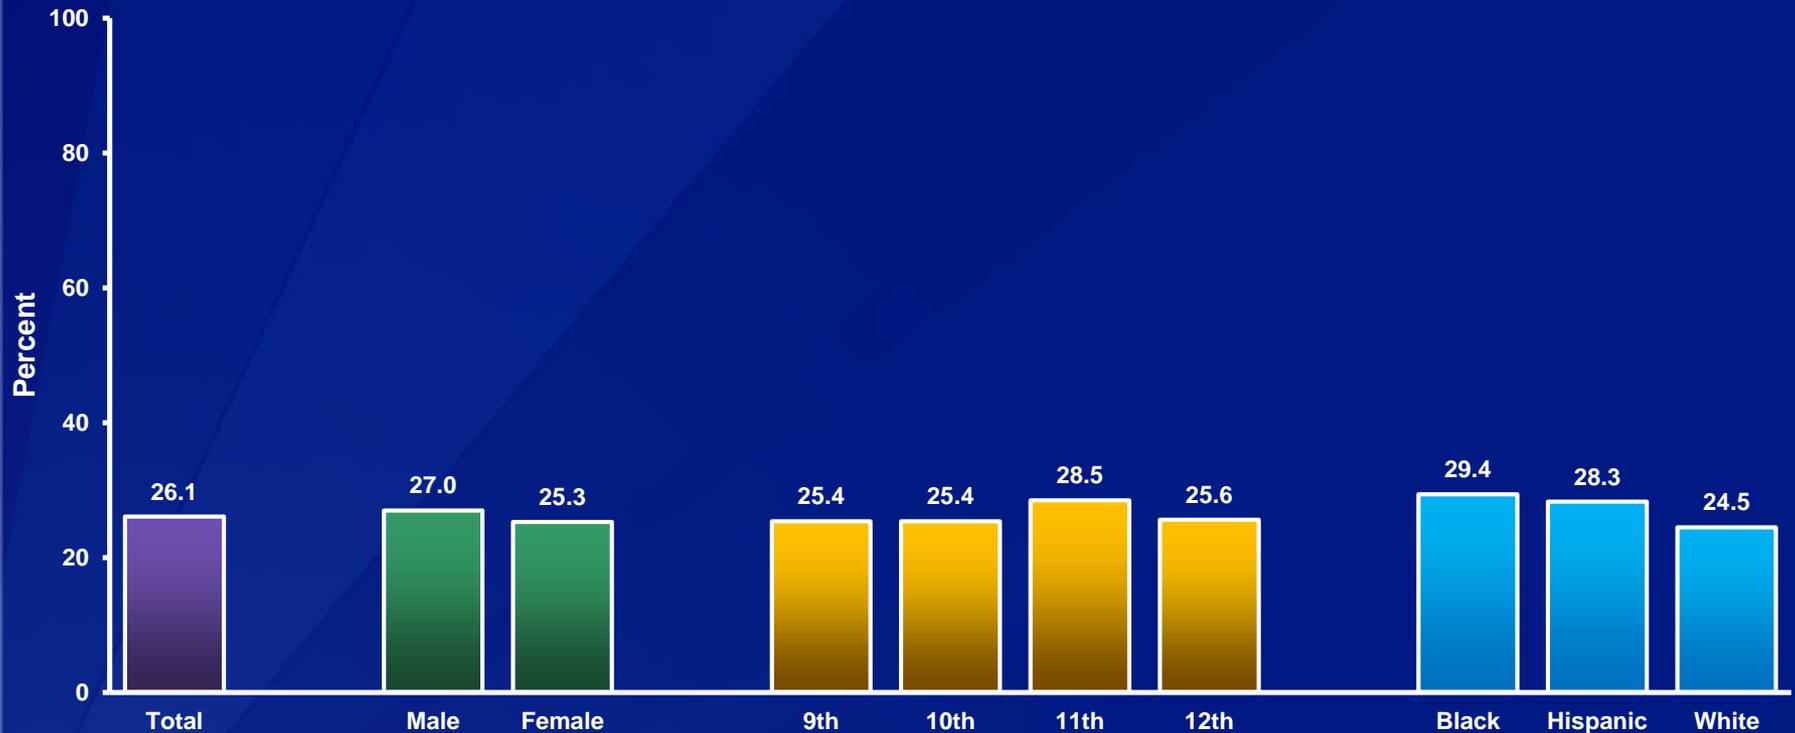

*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey

†No change 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

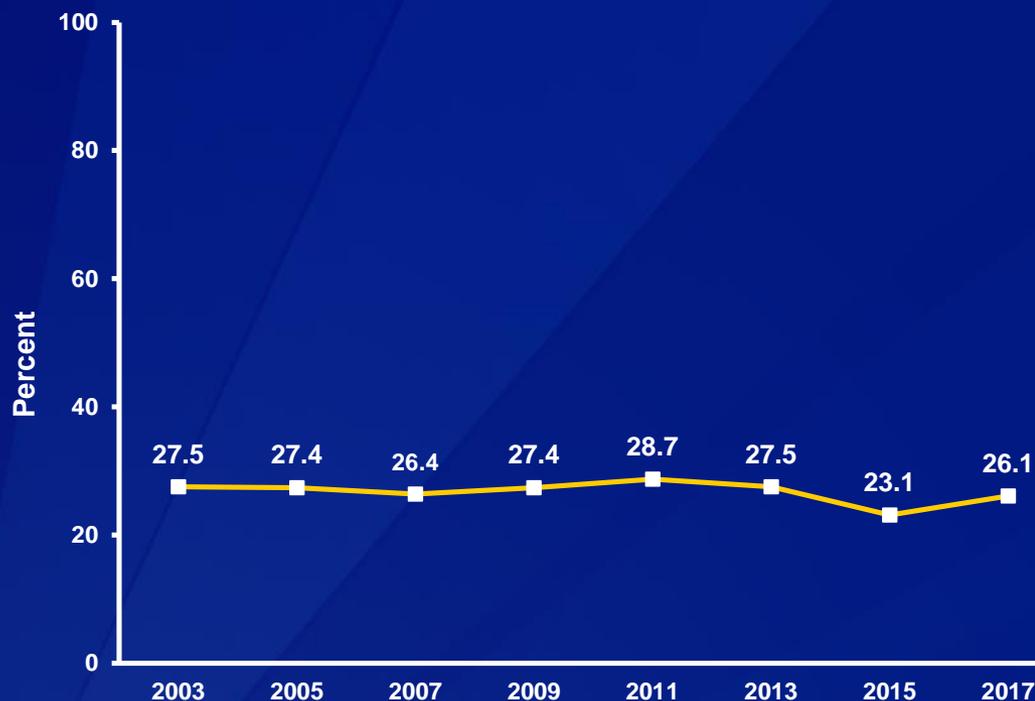

Note: This graph contains weighted results.

Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices Two or More Times Per Day,* by Sex, Grade, and Race/Ethnicity, 2017

*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey
All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.
Note: This graph contains weighted results.

Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices Two or More Times Per Day,* 2003-2017[†]

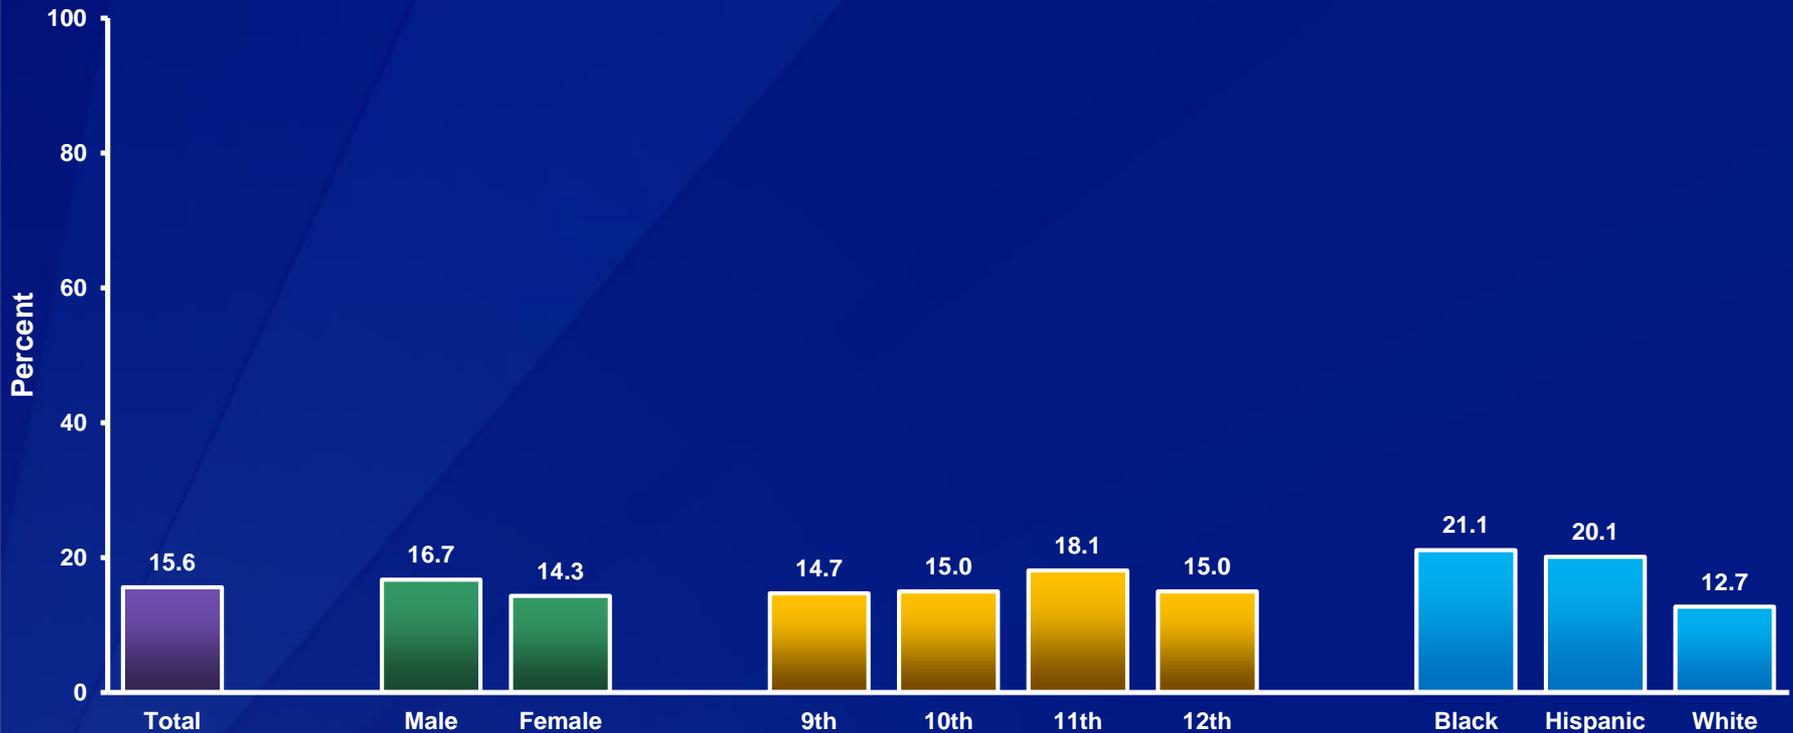

*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey

[†]Decreased 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices Three or More Times Per Day,* by Sex, Grade, and Race/Ethnicity,† 2017

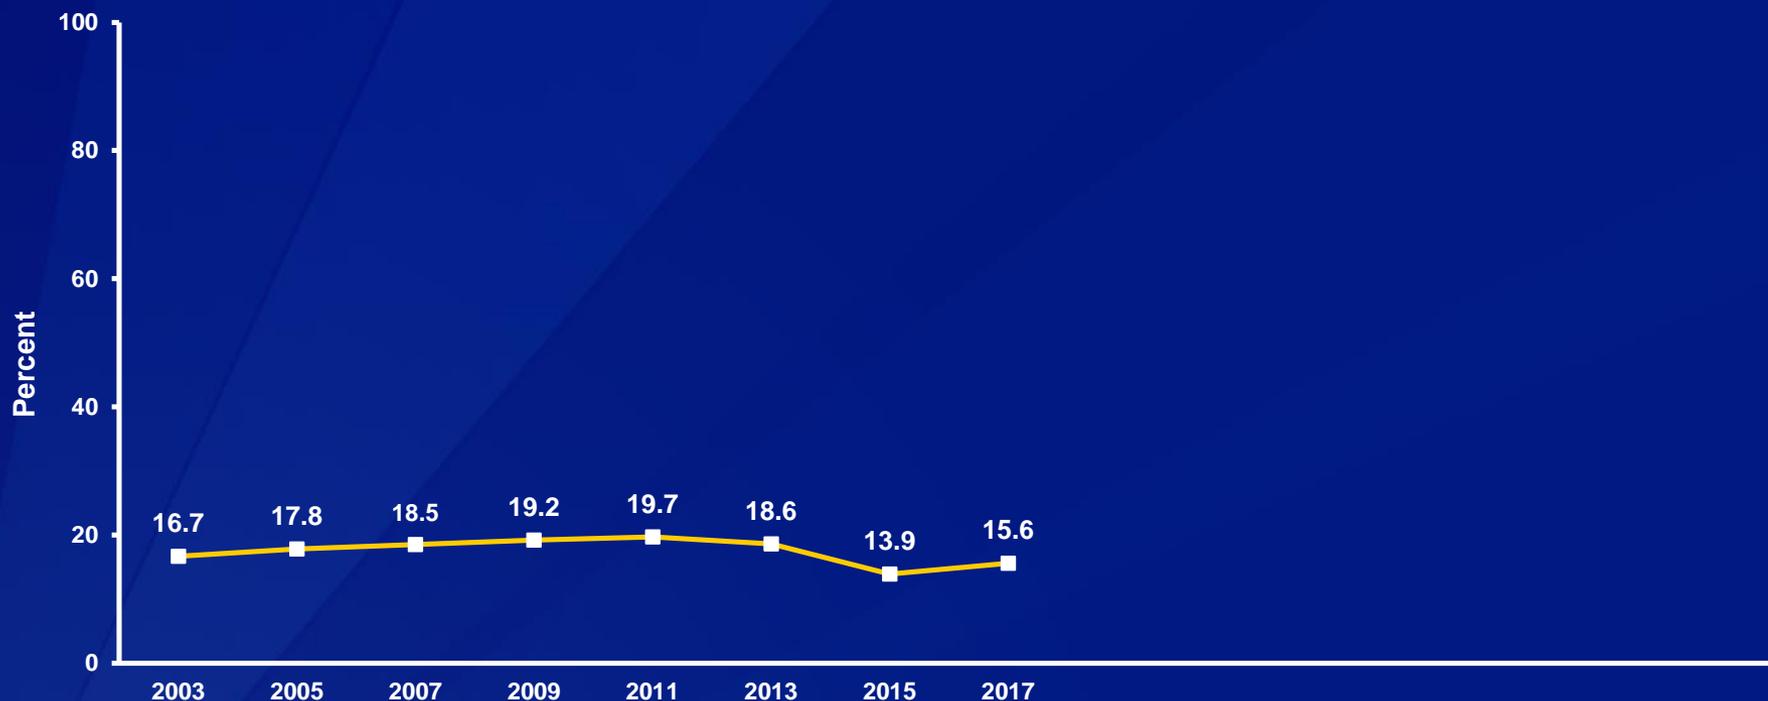

*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey

†B > W, H > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Ate Fruit or Drank 100% Fruit Juices Three or More Times Per Day,* 2003-2017†

*Such as orange juice, apple juice, or grape juice, during the 7 days before the survey

†Decreased 2003-2017, no change 2003-2011, decreased 2011-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Green Salad,* by Sex,† Grade, and Race/Ethnicity,† 2017

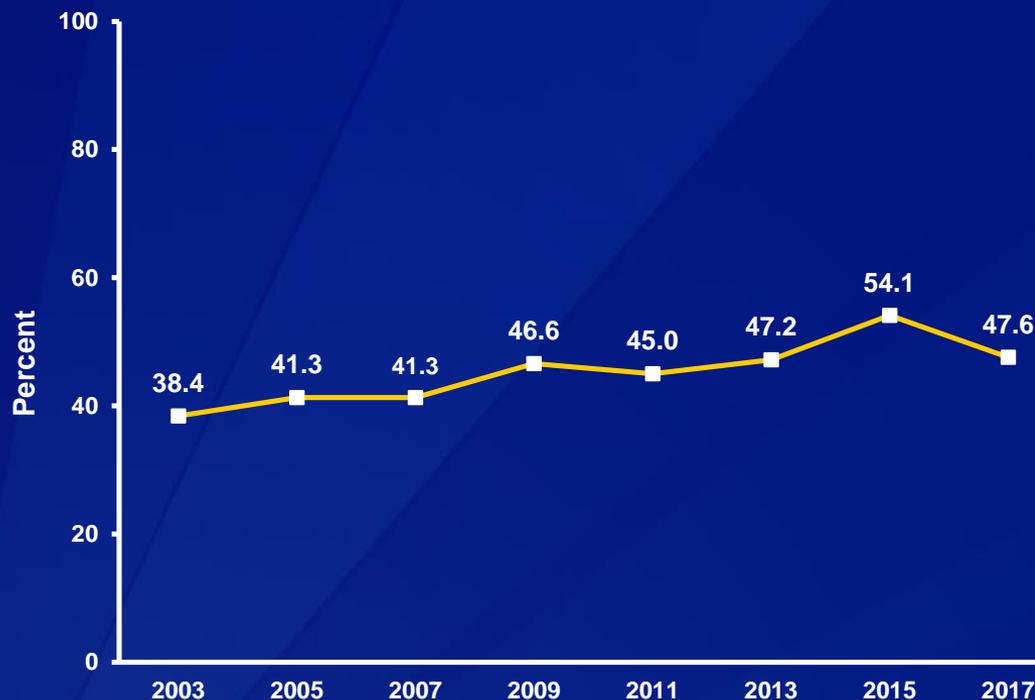

*One or more times during the 7 days before the survey

†M > F; B > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Green Salad,* 2003-2017†

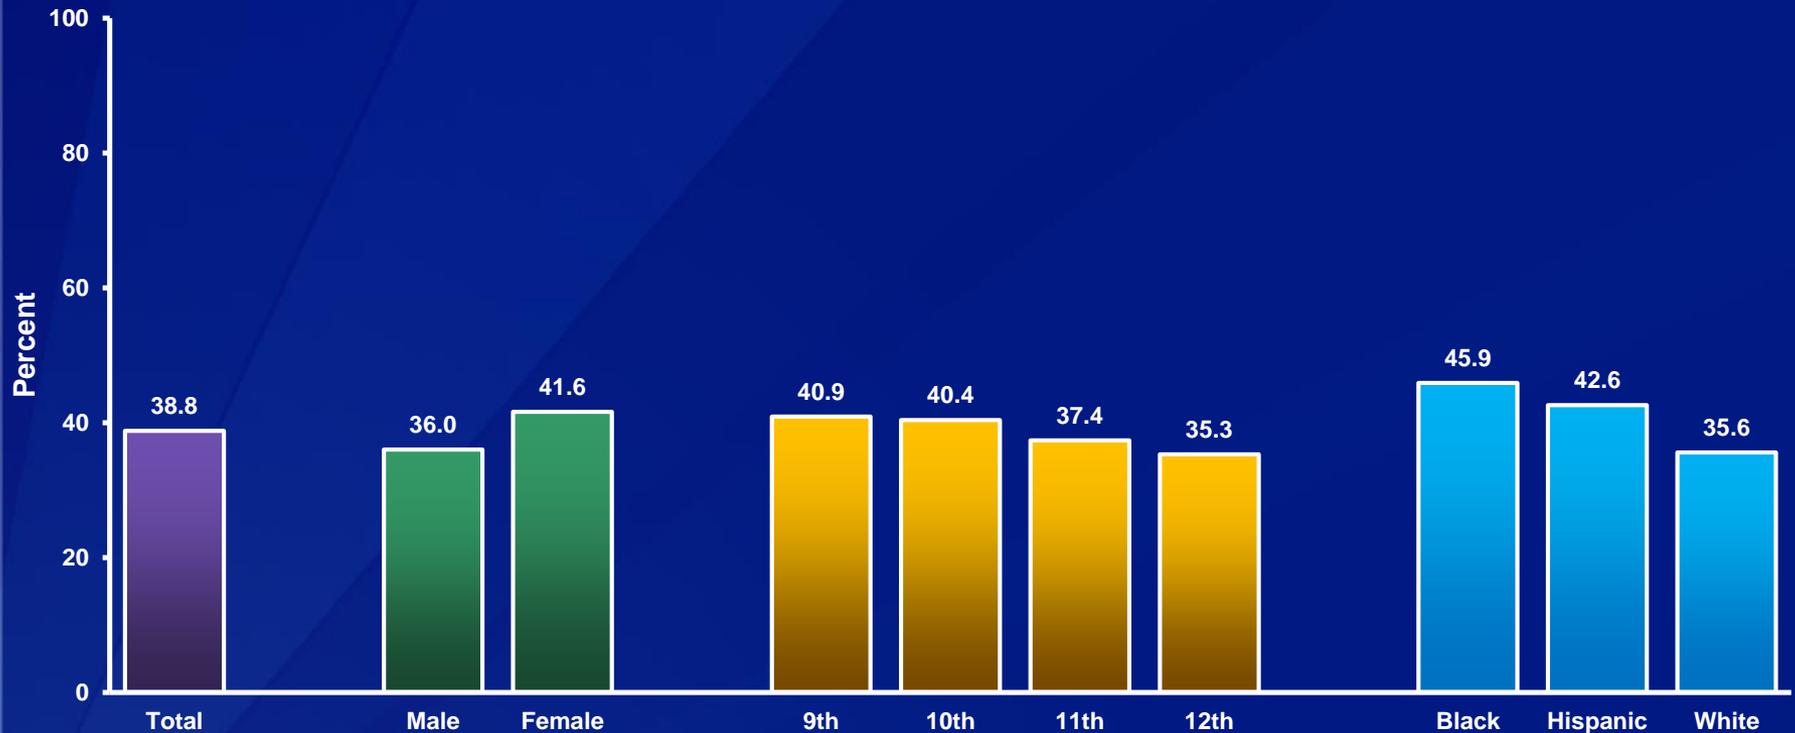

*One or more times during the 7 days before the survey

†Increased 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Potatoes,* by Sex,† Grade, and Race/Ethnicity,† 2017

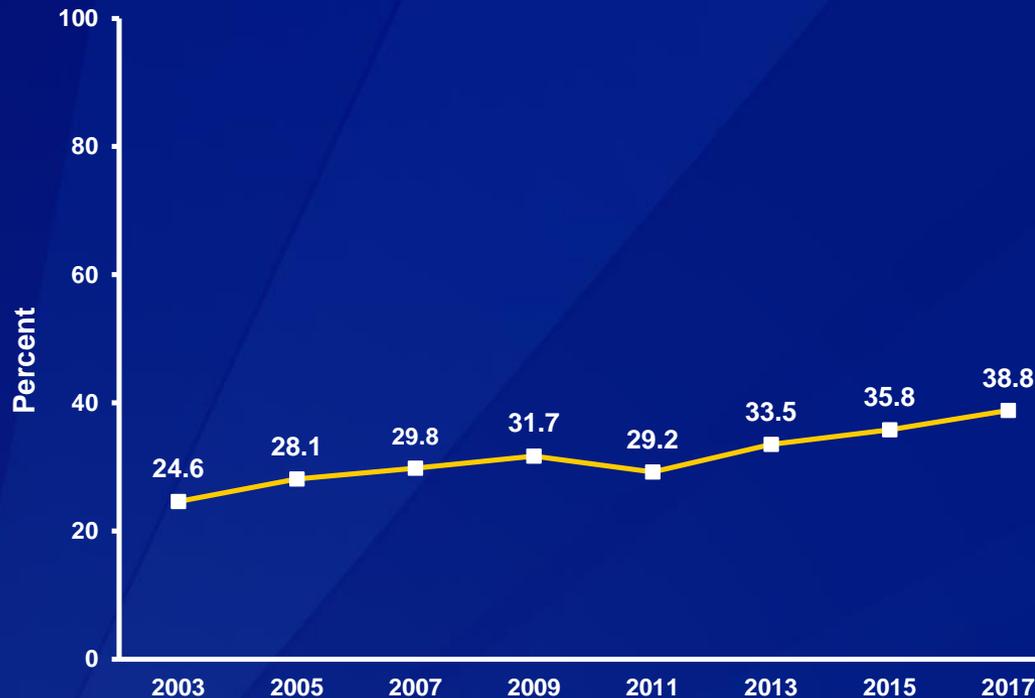

*One or more times during the 7 days before the survey

†F > M; B > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Potatoes,* 2003-2017†

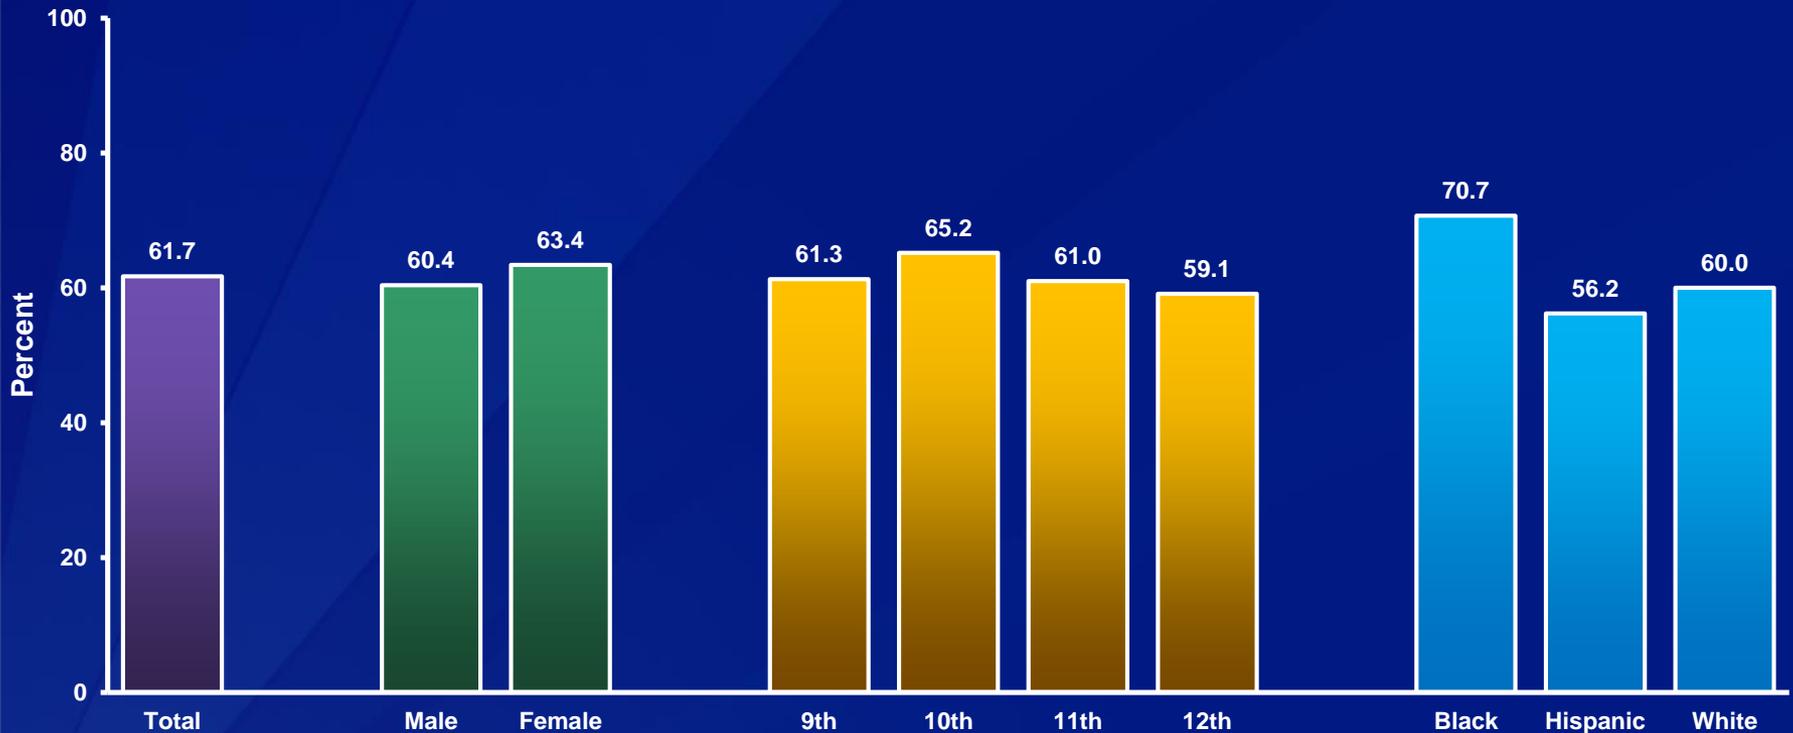

*One or more times during the 7 days before the survey

†Increased 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Carrots,* by Sex,† Grade,‡ and Race/Ethnicity,‡ 2017

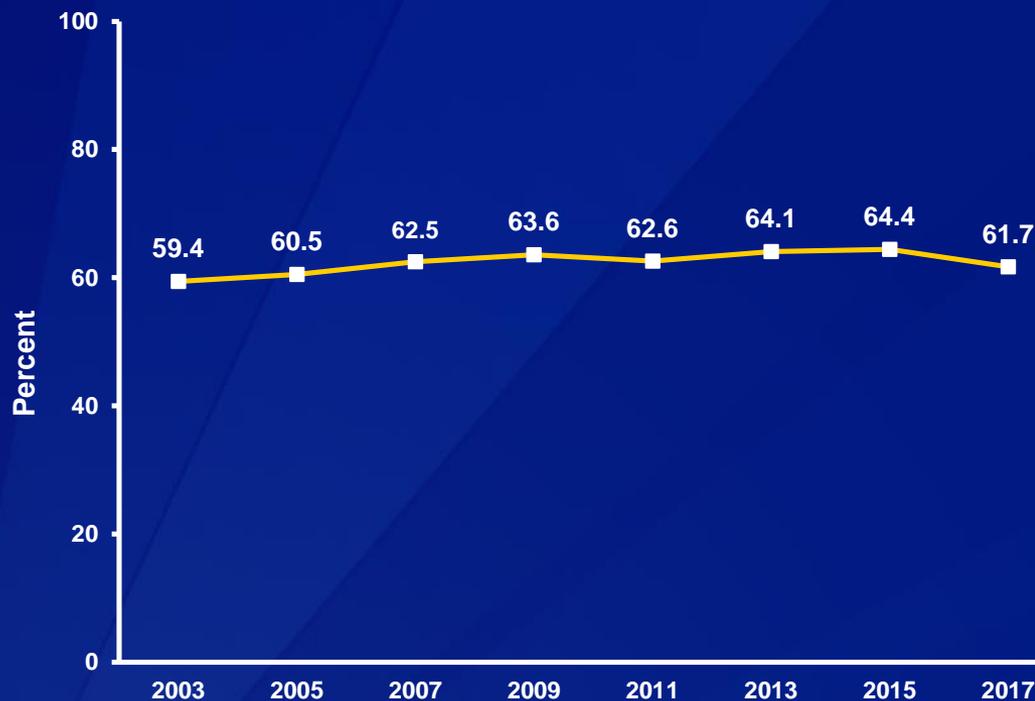

*One or more times during the 7 days before the survey

†F > M; 10th > 12th; B > H, B > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Carrots,* 2003-2017†

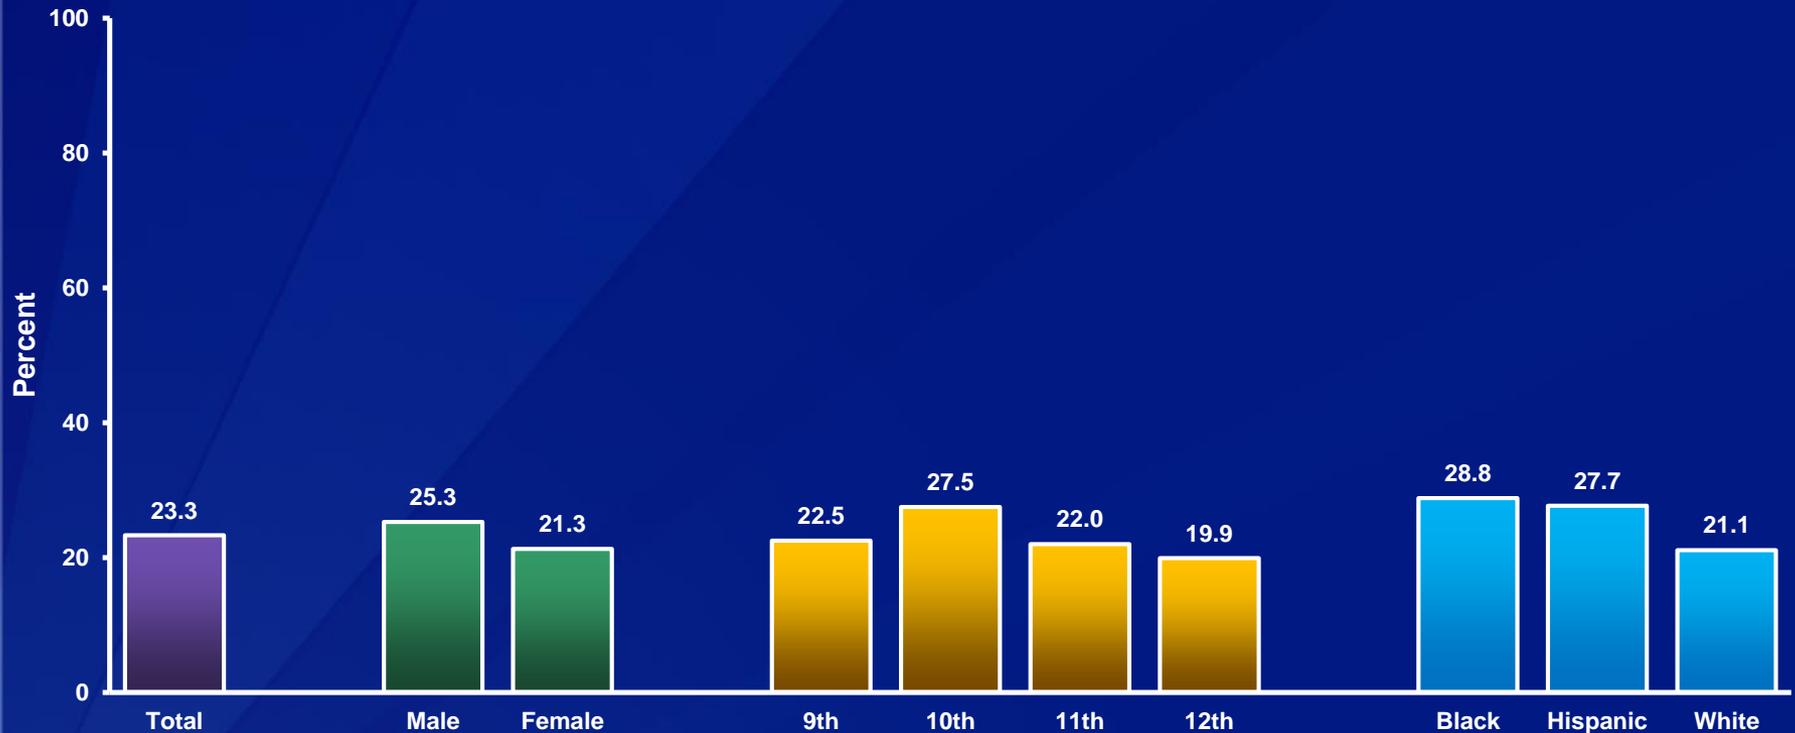

*One or more times during the 7 days before the survey

†Increased 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Percentage of High School Students Who Drank Two or More Glasses Per Day of Milk,* by Sex,[†] Grade, and Race/Ethnicity,[†] 2017

*Counting the milk they drank in a glass or cup, from a carton, or with cereal and counting the half pint of milk served at school as equal to one glass, during the 7 days before the survey

[†]M > F; W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Drank Two or More Glasses Per Day of Milk,* 2013-2017†

*Counting the milk they drank in a glass or cup, from a carton, or with cereal and counting the half pint of milk served at school as equal to one glass, during the 7 days before the survey

†Decreased 2013-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Drank Three or More Glasses Per Day of Milk,* by Sex,† Grade, and Race/Ethnicity,† 2017

*Counting the milk they drank in a glass or cup, from a carton, or with cereal and counting the half pint of milk served at school as equal to one glass, during the 7 days before the survey

†M > F; W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

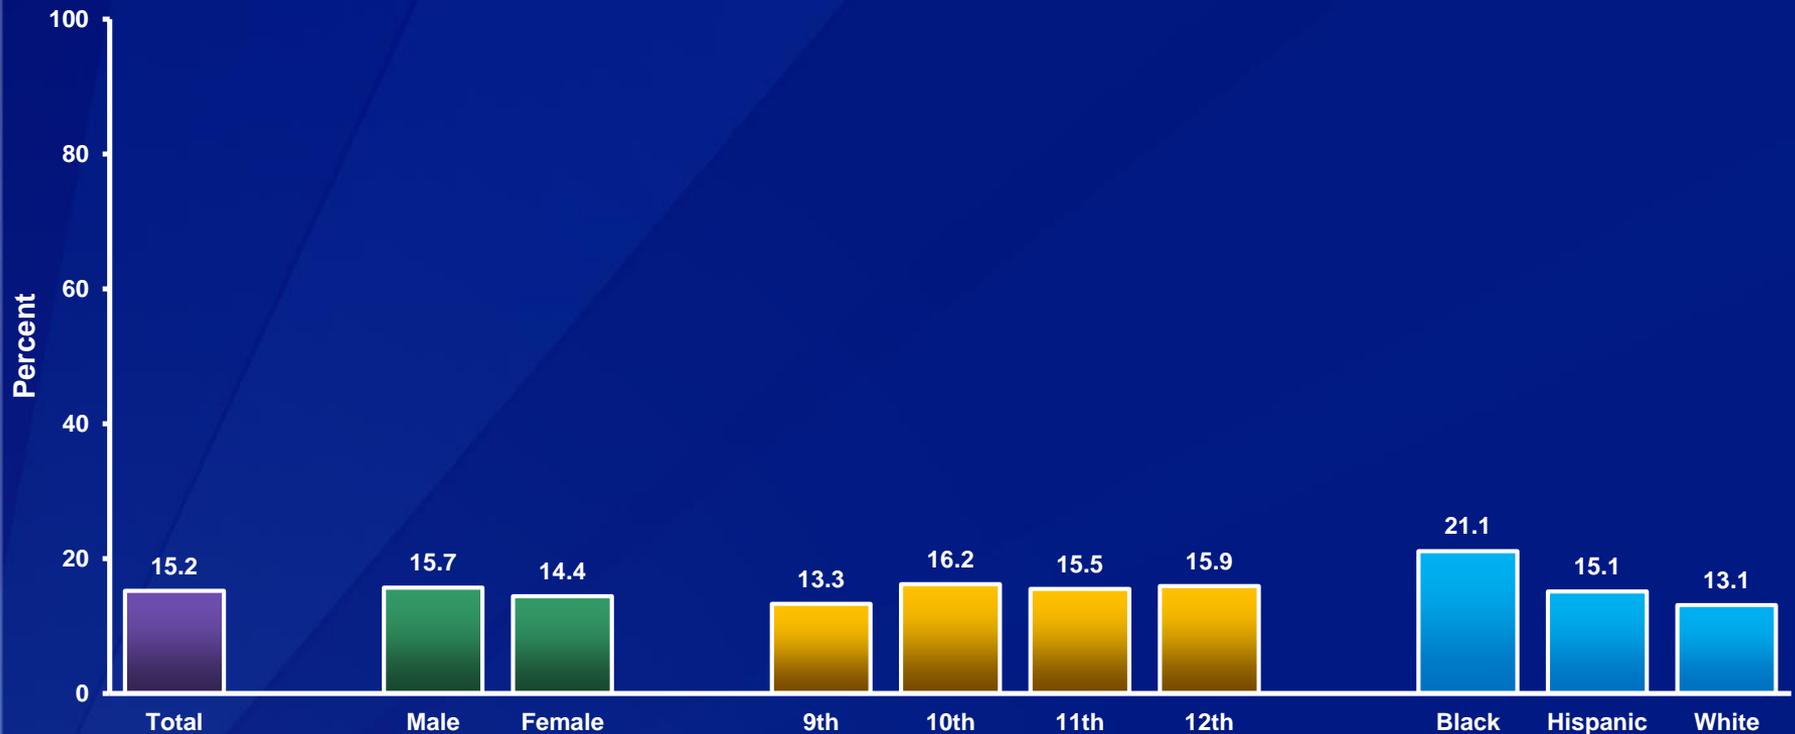

Percentage of High School Students Who Drank Three or More Glasses Per Day of Milk,* 2013-2017[†]

*Counting the milk they drank in a glass or cup, from a carton, or with cereal and counting the half pint of milk served at school as equal to one glass, during the 7 days before the survey

[†]Decreased 2013-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Did Not Eat Breakfast,* by Sex, Grade, and Race/Ethnicity,† 2017

*During the 7 days before the survey

†B > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Did Not Eat Breakfast,* 2013-2017[†]

*During the 7 days before the survey

[†]No change 2013-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Ate Breakfast on All 7 Days,* by Sex, Grade, and Race/Ethnicity,† 2017

*During the 7 days before the survey

†H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

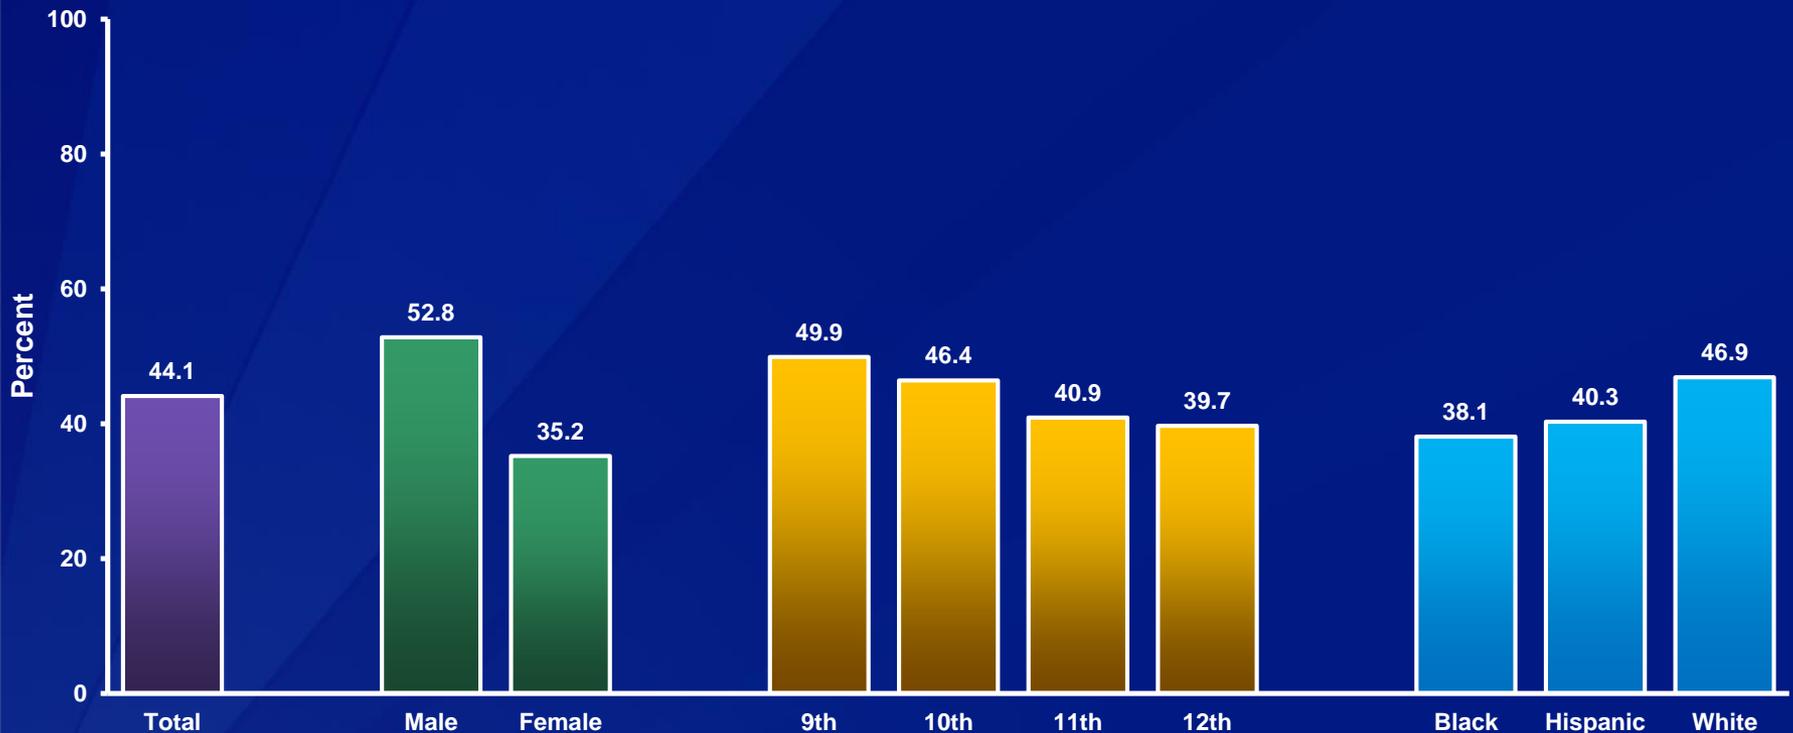

Percentage of High School Students Who Ate Breakfast on All 7 Days,* 2013-2017[†]

*During the 7 days before the survey

[†]No change 2013-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on 5 or More Days,* by Sex,[†] Grade,[†] and Race/Ethnicity, 2017

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey

[†]M > F; 9th > 11th, 9th > 12th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

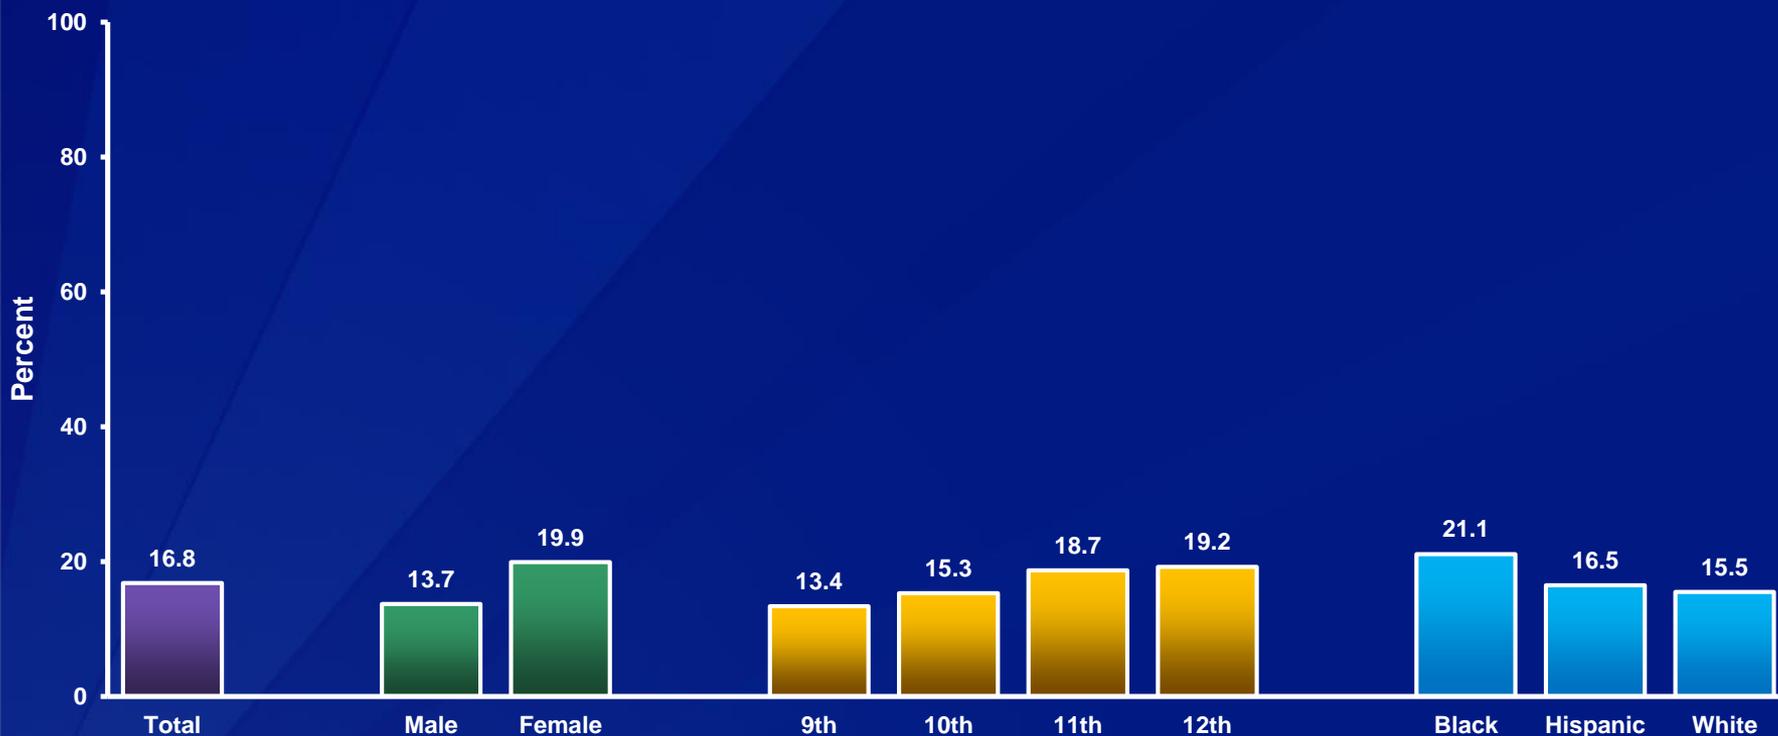

Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on 5 or More Days,* 2011-2017†

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey

†No change 2011-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Did Not Participate in at Least 60 Minutes of Physical Activity on at Least 1 Day,* by Sex,[†] Grade,[†] and Race/Ethnicity, 2017

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey

[†]F > M; 12th > 9th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

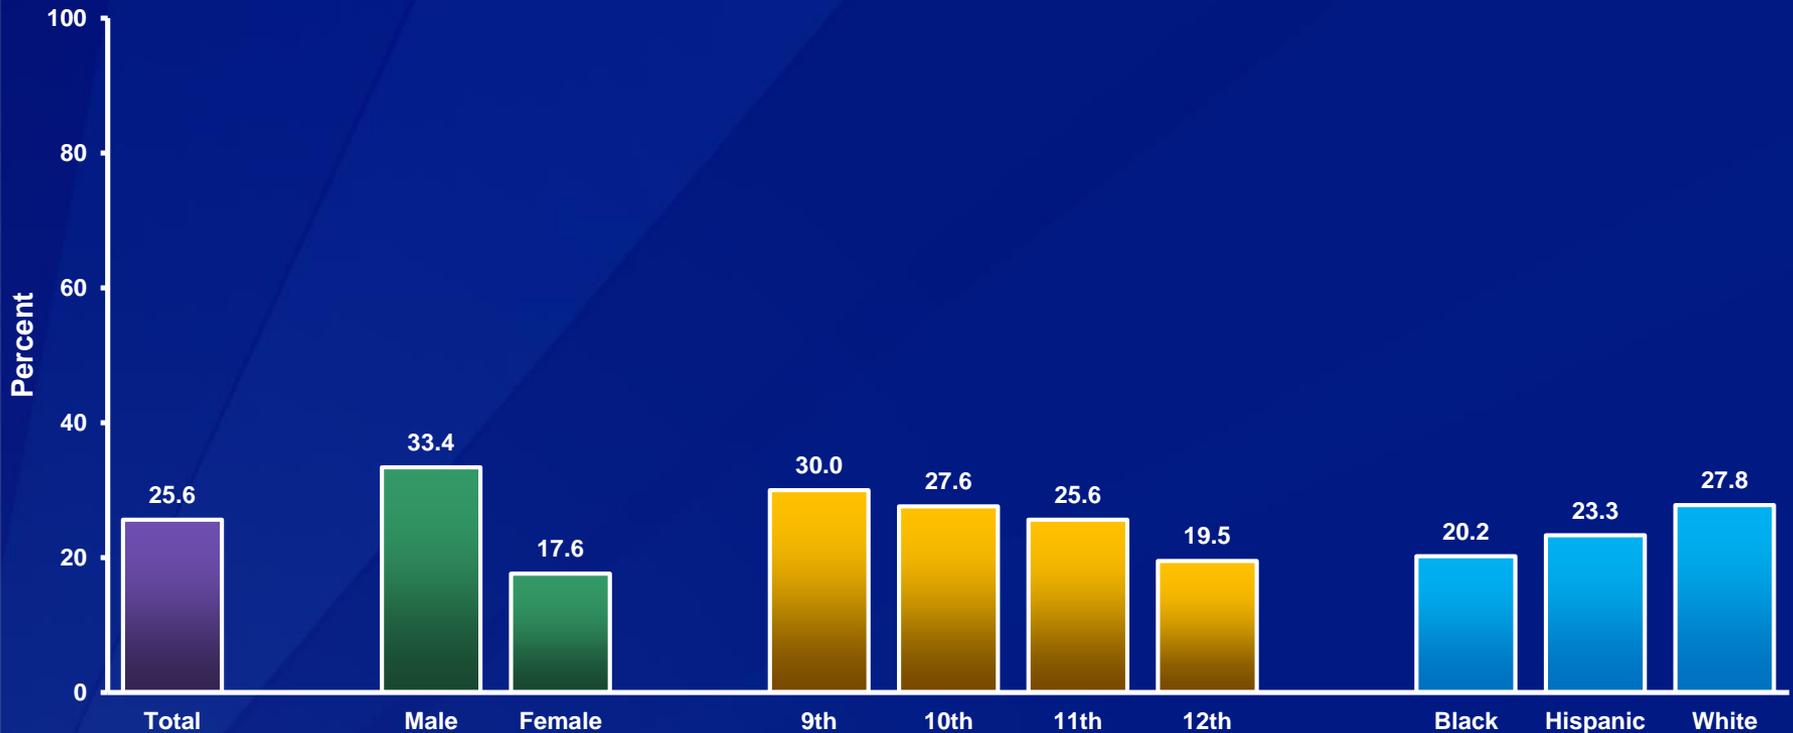

Percentage of High School Students Who Did Not Participate in at Least 60 Minutes of Physical Activity on at Least 1 Day,* 2011-2017†

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey

†No change 2011-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on All 7 Days,* by Sex,† Grade,† and Race/Ethnicity, 2017

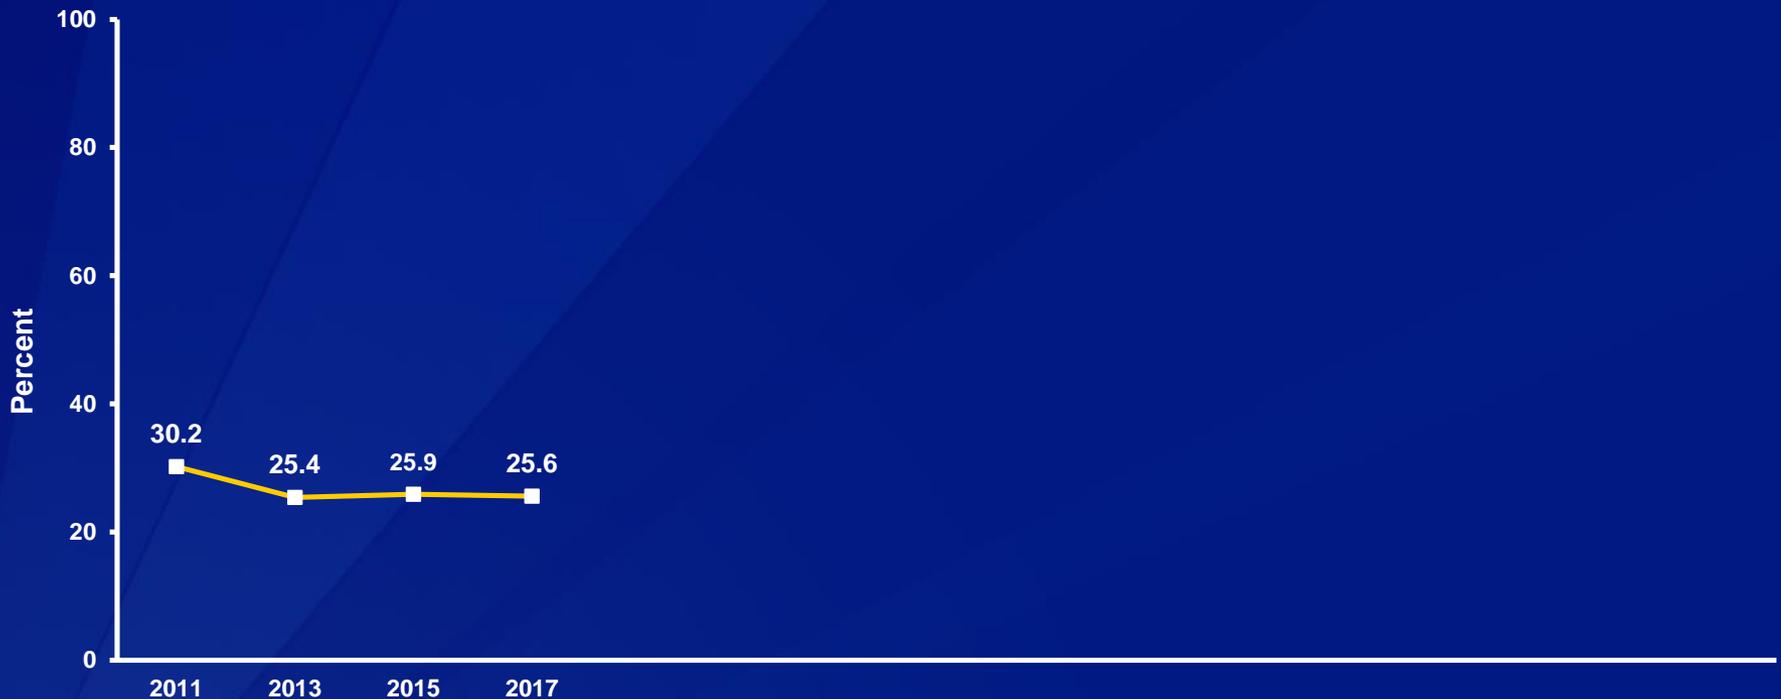

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey

†M > F; 9th > 11th, 9th > 12th, 10th > 12th, 11th > 12th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Physically Active at Least 60 Minutes Per Day on All 7 Days,* 2011-2017[†]

*In any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey

[†]Decreased 2011-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Watched Television 3 or More Hours Per Day,* by Sex, Grade, and Race/Ethnicity,† 2017

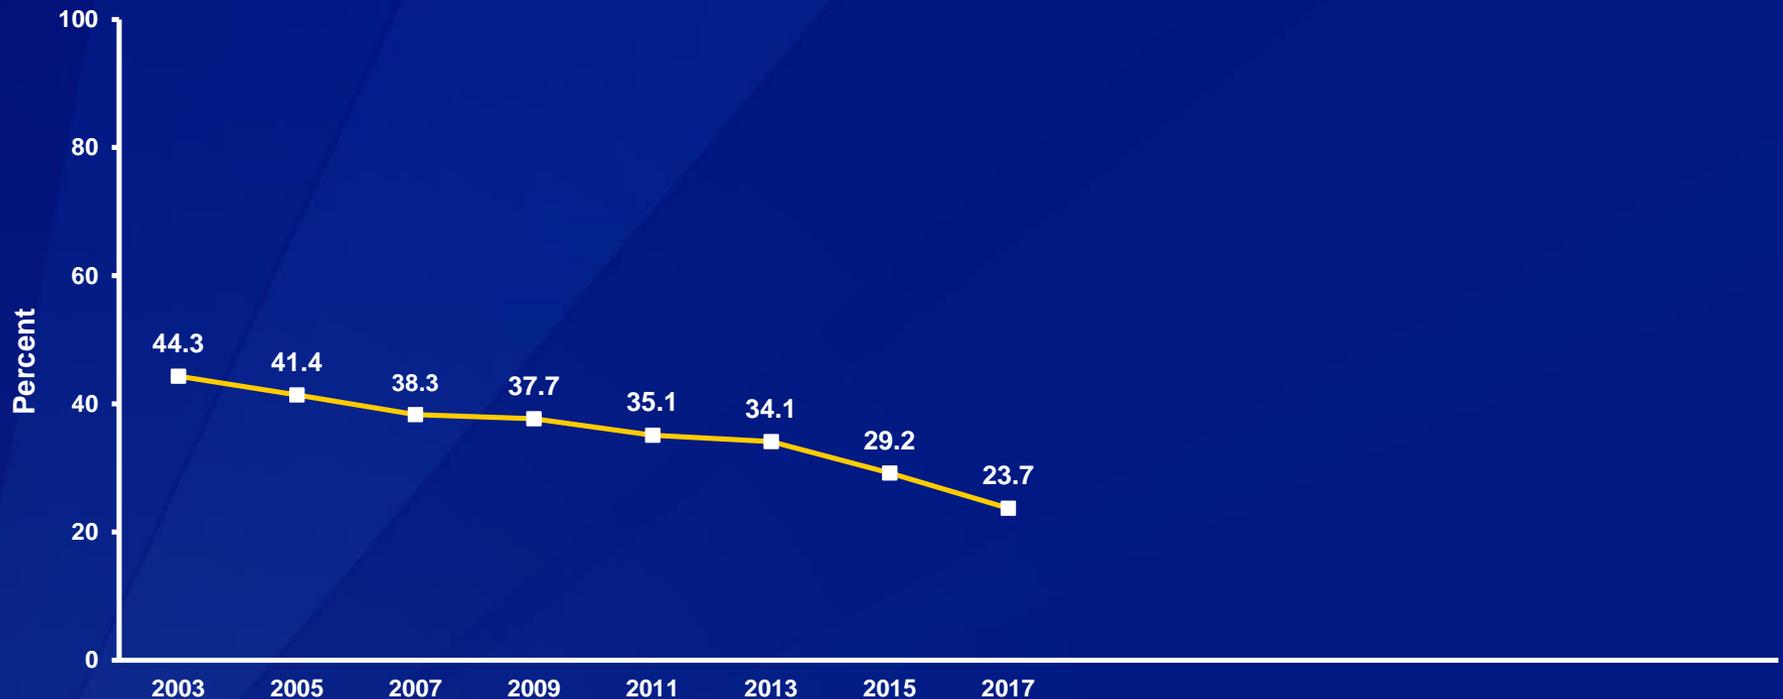

*On an average school day

†B > H, B > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

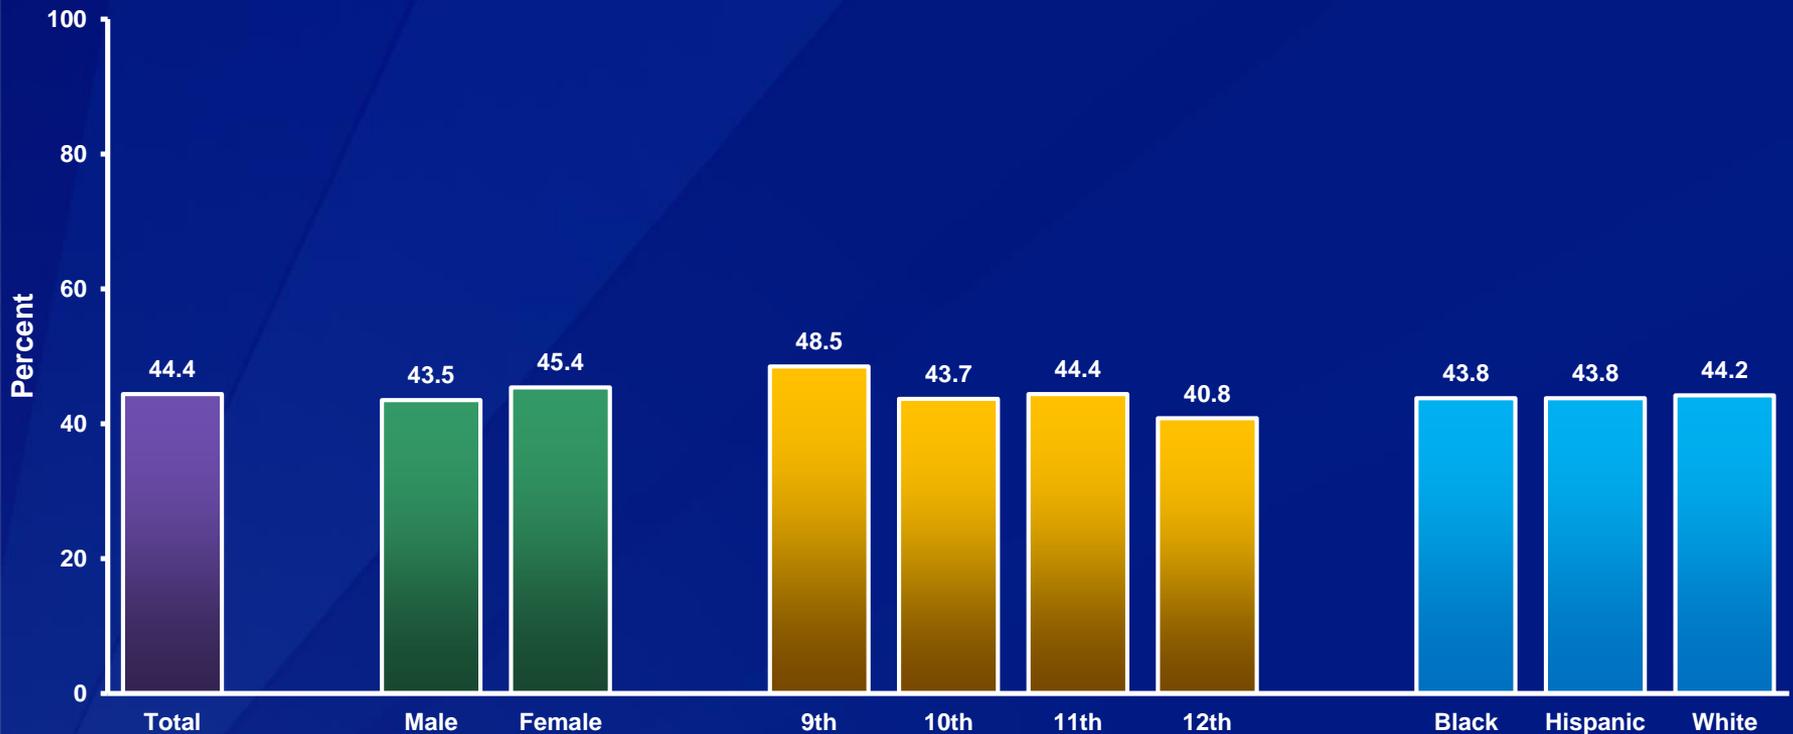

Percentage of High School Students Who Watched Television 3 or More Hours Per Day,* 2003-2017†

*On an average school day

†Decreased 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Percentage of High School Students Who Played Video or Computer Games or Used a Computer 3 or More Hours Per Day,* by Sex, Grade,† and Race/Ethnicity, 2017

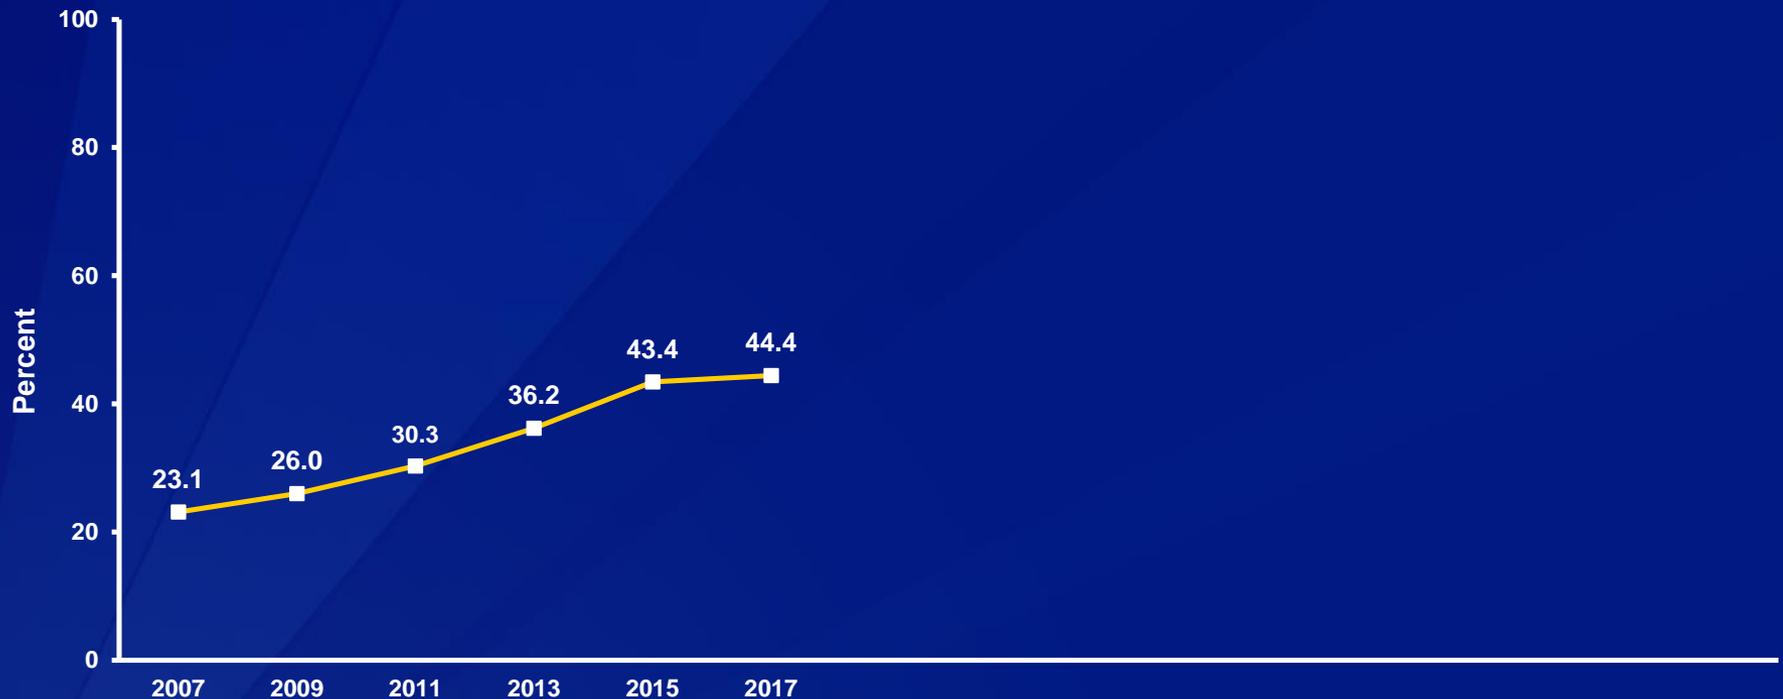

*Counting time spent on things such as Xbox, PlayStation, an iPad or other tablet, a smartphone, texting, YouTube, Instagram, Facebook, or other social media, for something that was not school work, on an average school day

†9th > 12th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

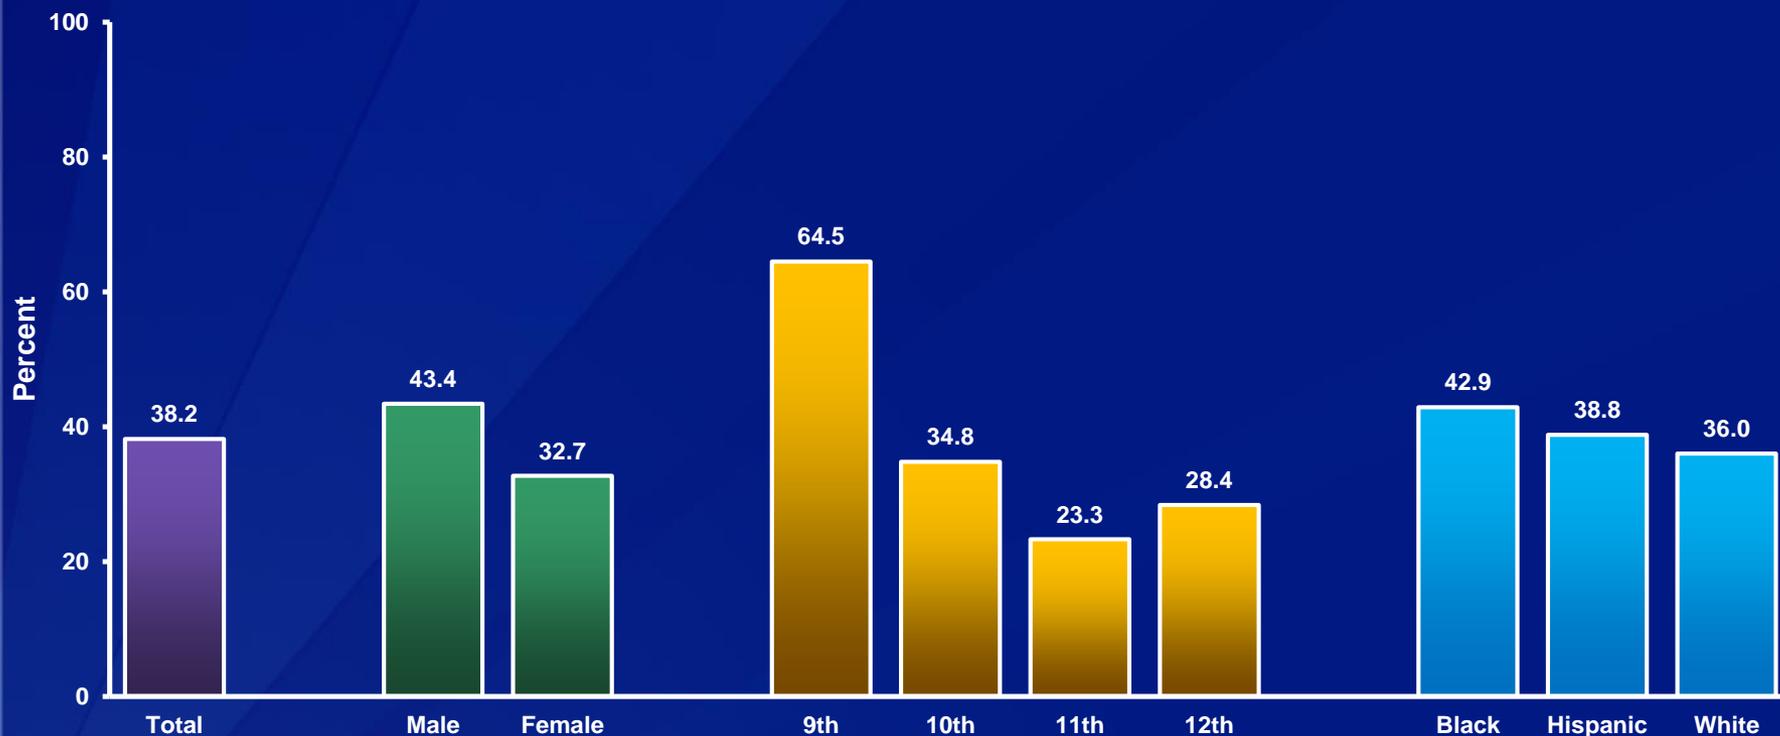

Percentage of High School Students Who Played Video or Computer Games or Used a Computer 3 or More Hours Per Day,* 2007-2017†

*Counting time spent on things such as Xbox, PlayStation, an iPad or other tablet, a smartphone, texting, YouTube, Instagram, Facebook, or other social media, for something that was not school work, on an average school day

†Increased 2007-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Percentage of High School Students Who Attended Physical Education (PE) Classes on 1 or More Days,* by Sex,† Grade,† and Race/Ethnicity, 2017

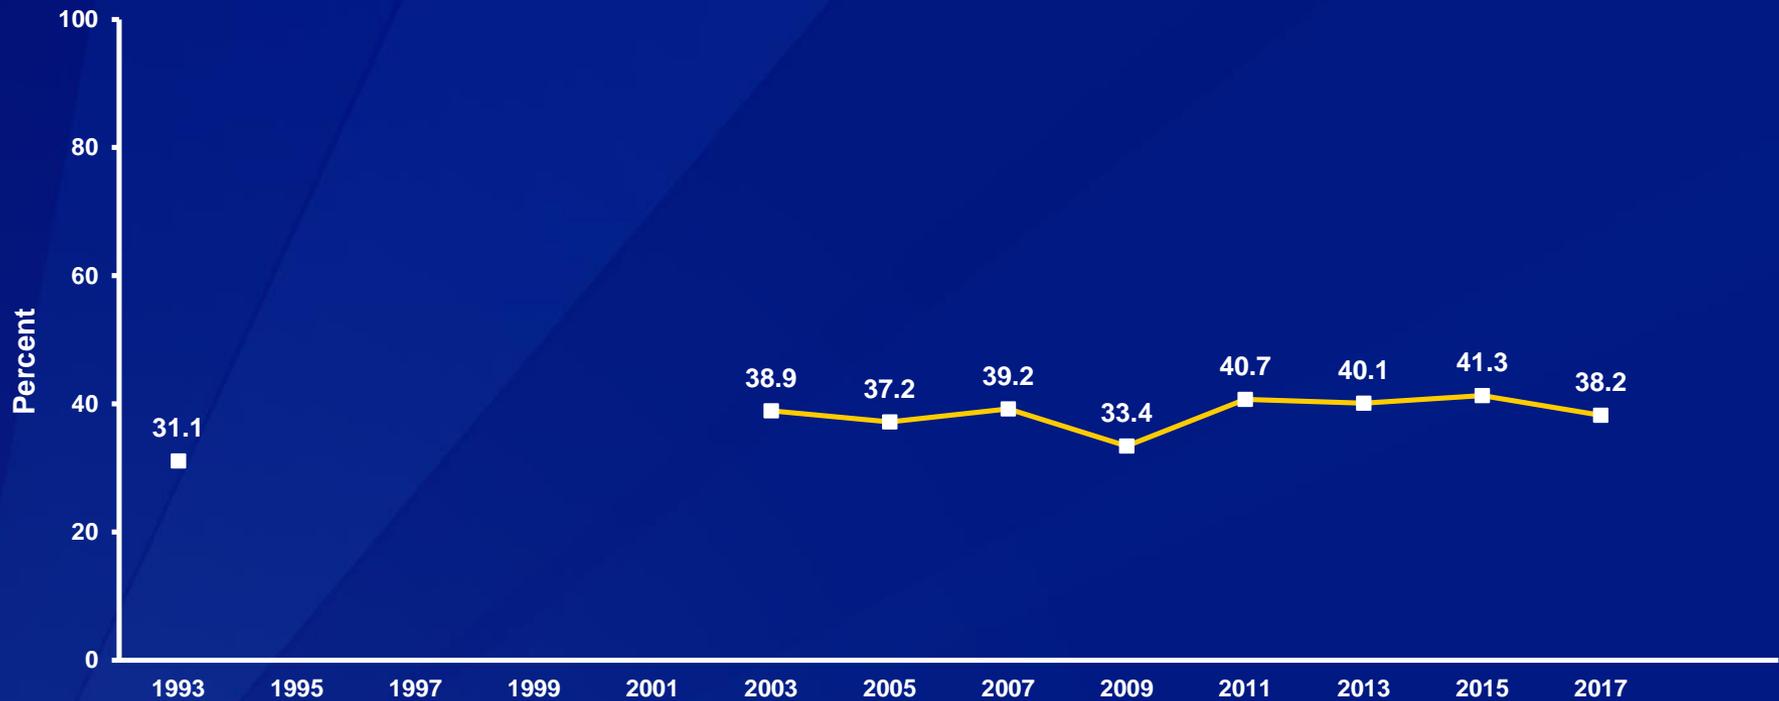

*In an average week when they were in school

†M > F; 9th > 10th, 9th > 11th, 9th > 12th, 10th > 11th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Attended Physical Education (PE) Classes on 1 or More Days,* 1993-2017†

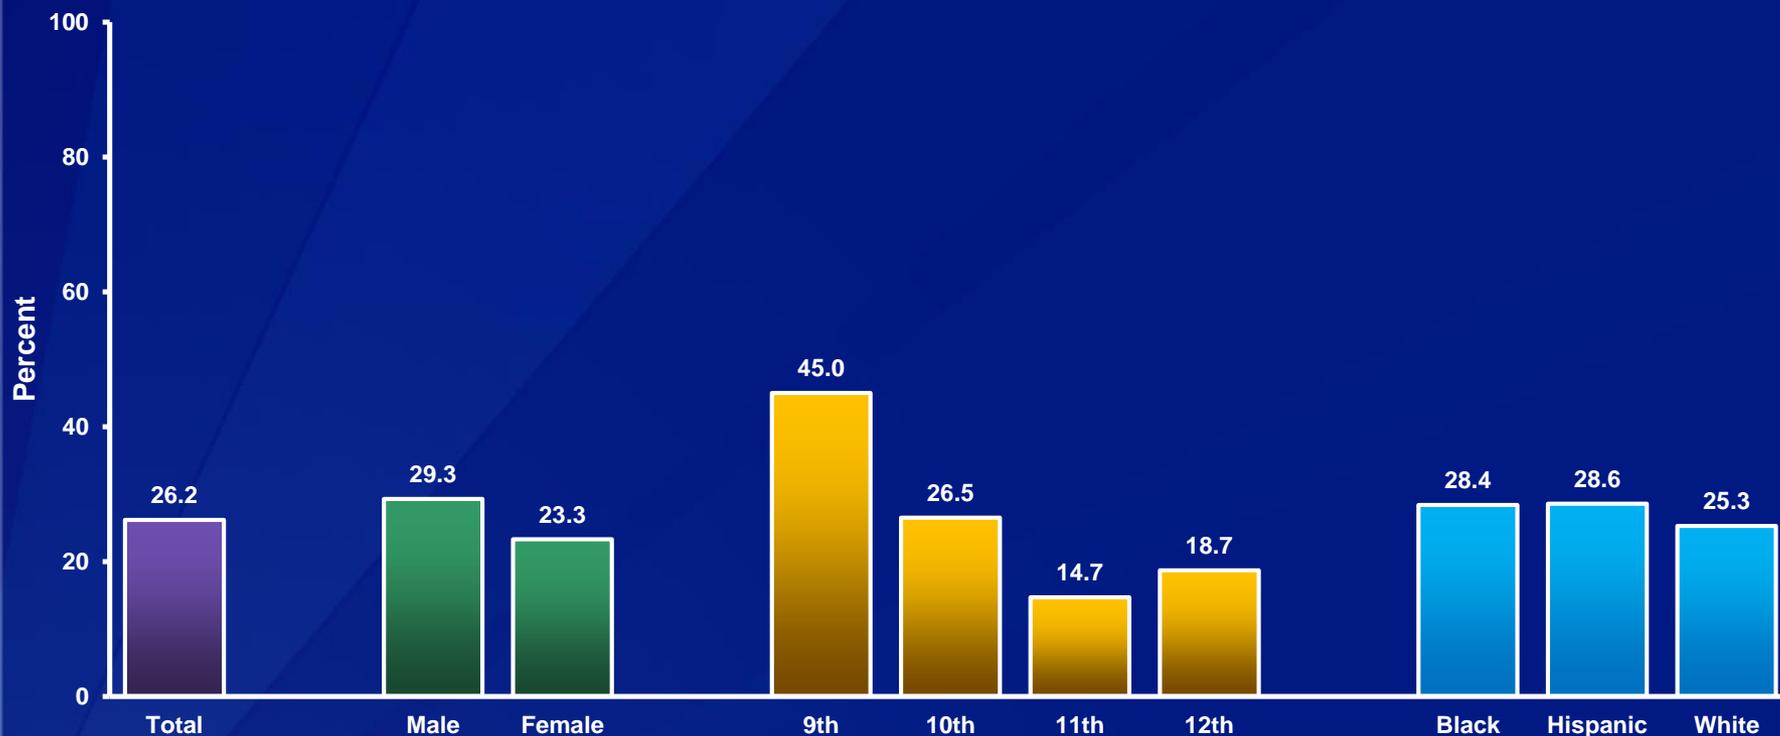

*In an average week when they were in school

†Increased 1993-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Percentage of High School Students Who Attended Physical Education Classes on All 5 Days,* by Sex,[†] Grade,[†] and Race/Ethnicity, 2017

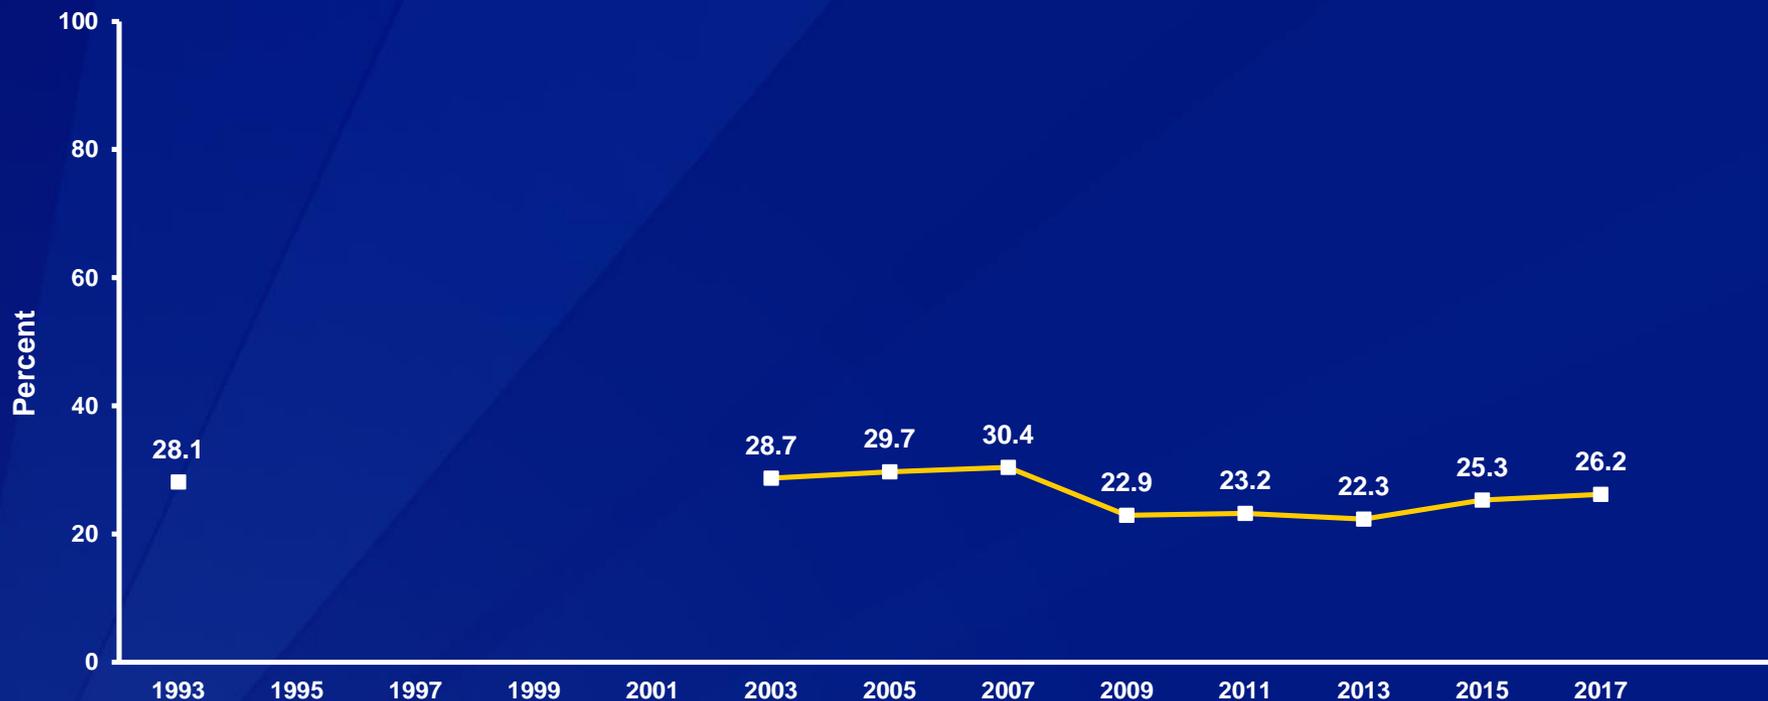

*In an average week when they were in school

[†]M > F; 9th > 10th, 9th > 11th, 9th > 12th, 10th > 11th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Attended Physical Education Classes on All 5 Days,* 1993-2017†

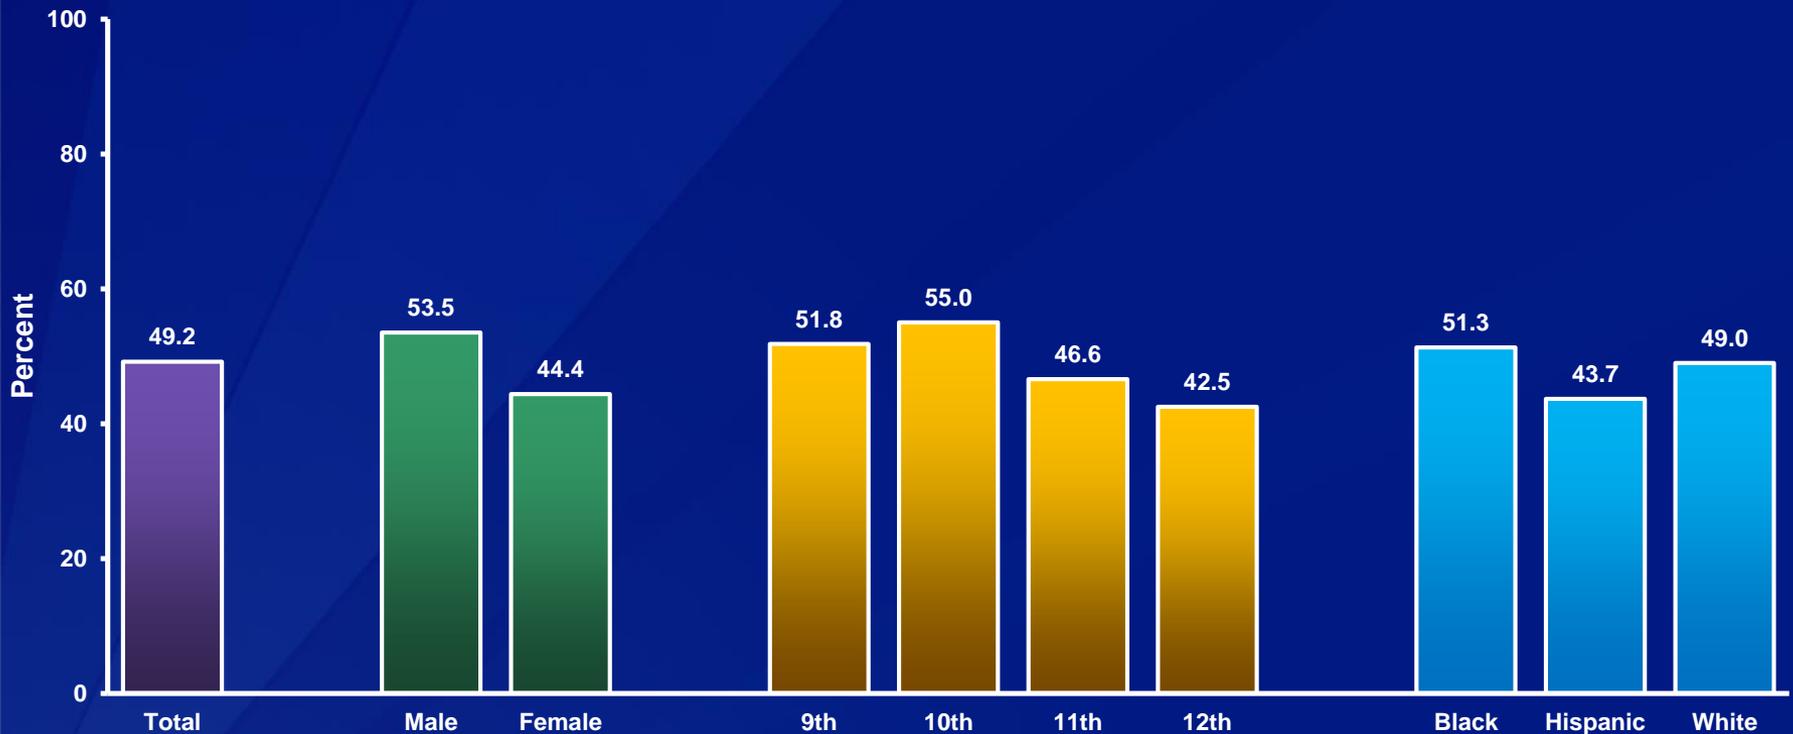

*In an average week when they were in school

†Decreased 1993-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Data not available for 1995, 1997, 1999, 2001.

Percentage of High School Students Who Played on at Least One Sports Team,* by Sex,[†] Grade,[†] and Race/Ethnicity, 2017

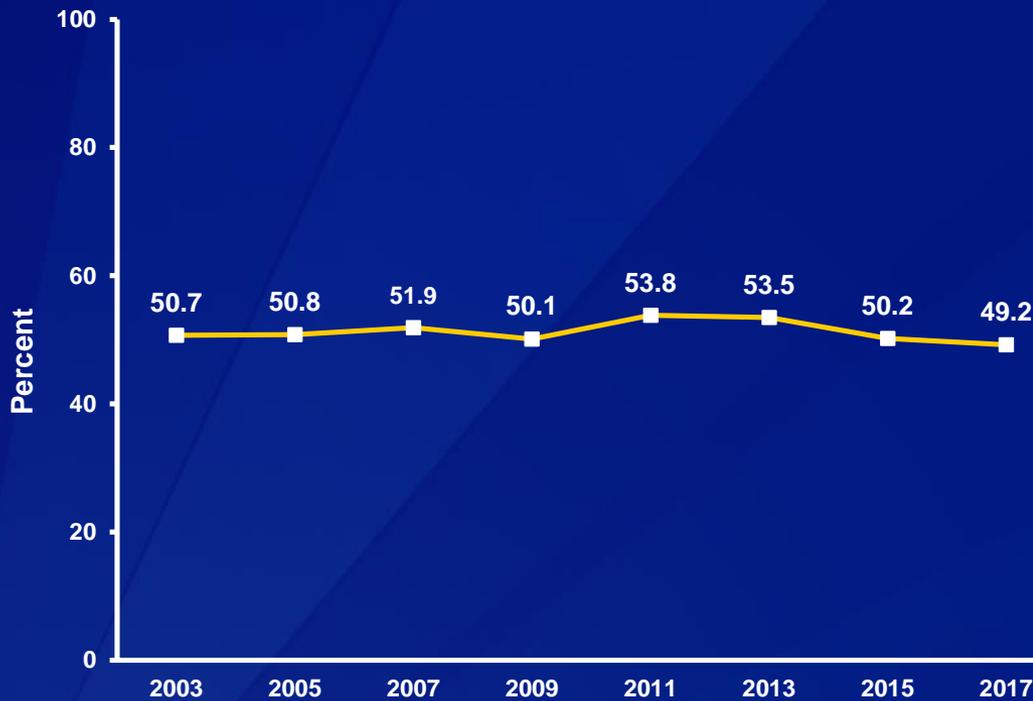

*Counting any teams run by their school or community groups, during the 12 months before the survey

[†]M > F; 9th > 12th, 10th > 11th, 10th > 12th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

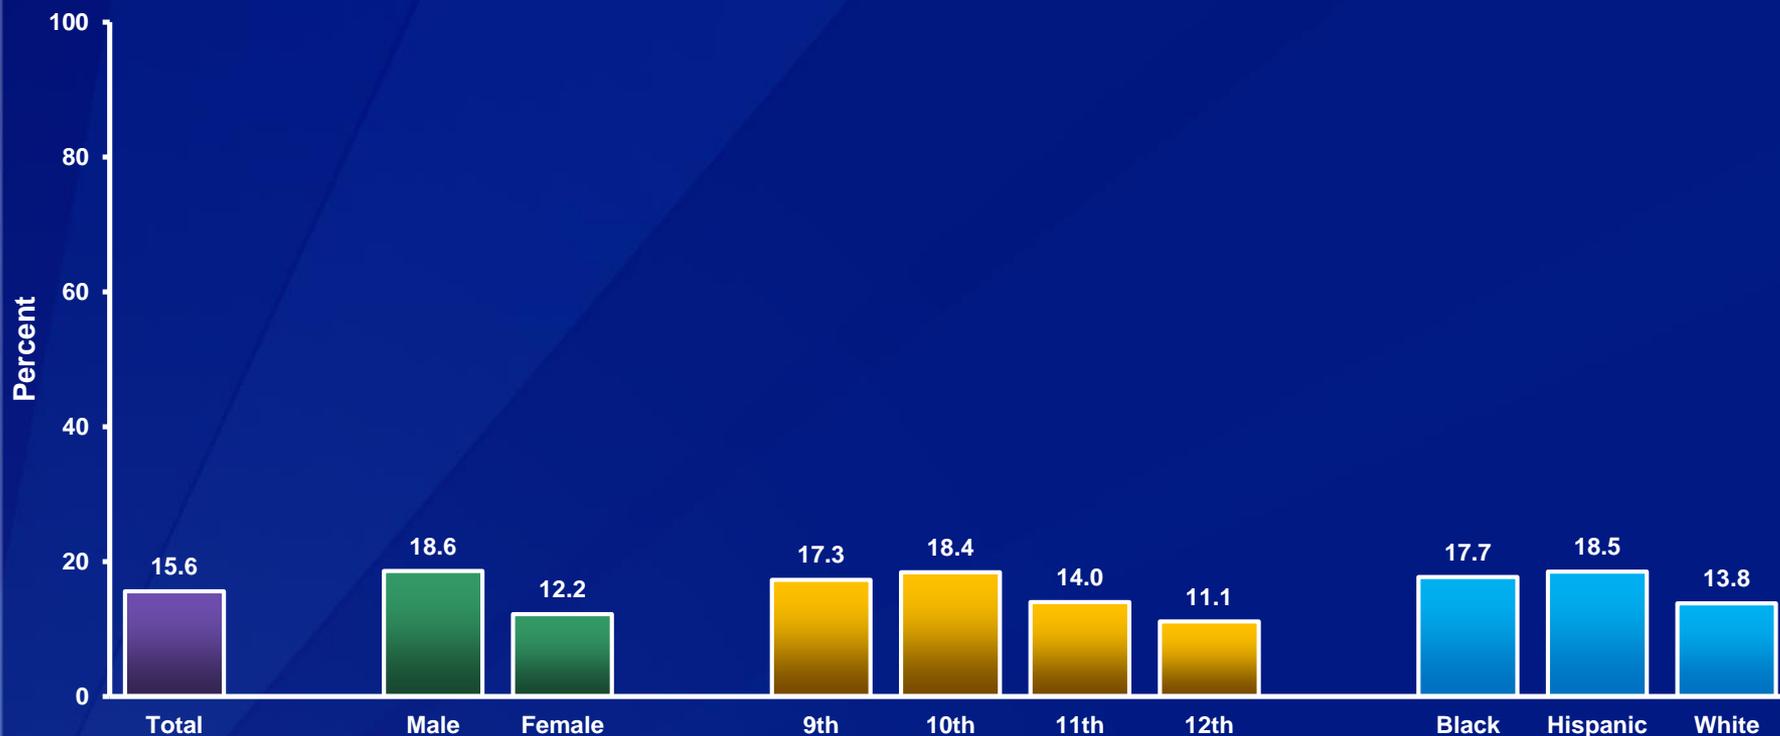

Percentage of High School Students Who Played on at Least One Sports Team,* 2003-2017†

*Counting any teams run by their school or community groups, during the 12 months before the survey

†No change 2003-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Percentage of High School Students Who Had a Concussion from Playing a Sport or Being Physically Active,* by Sex,[†] Grade,[†] and Race/Ethnicity, 2017

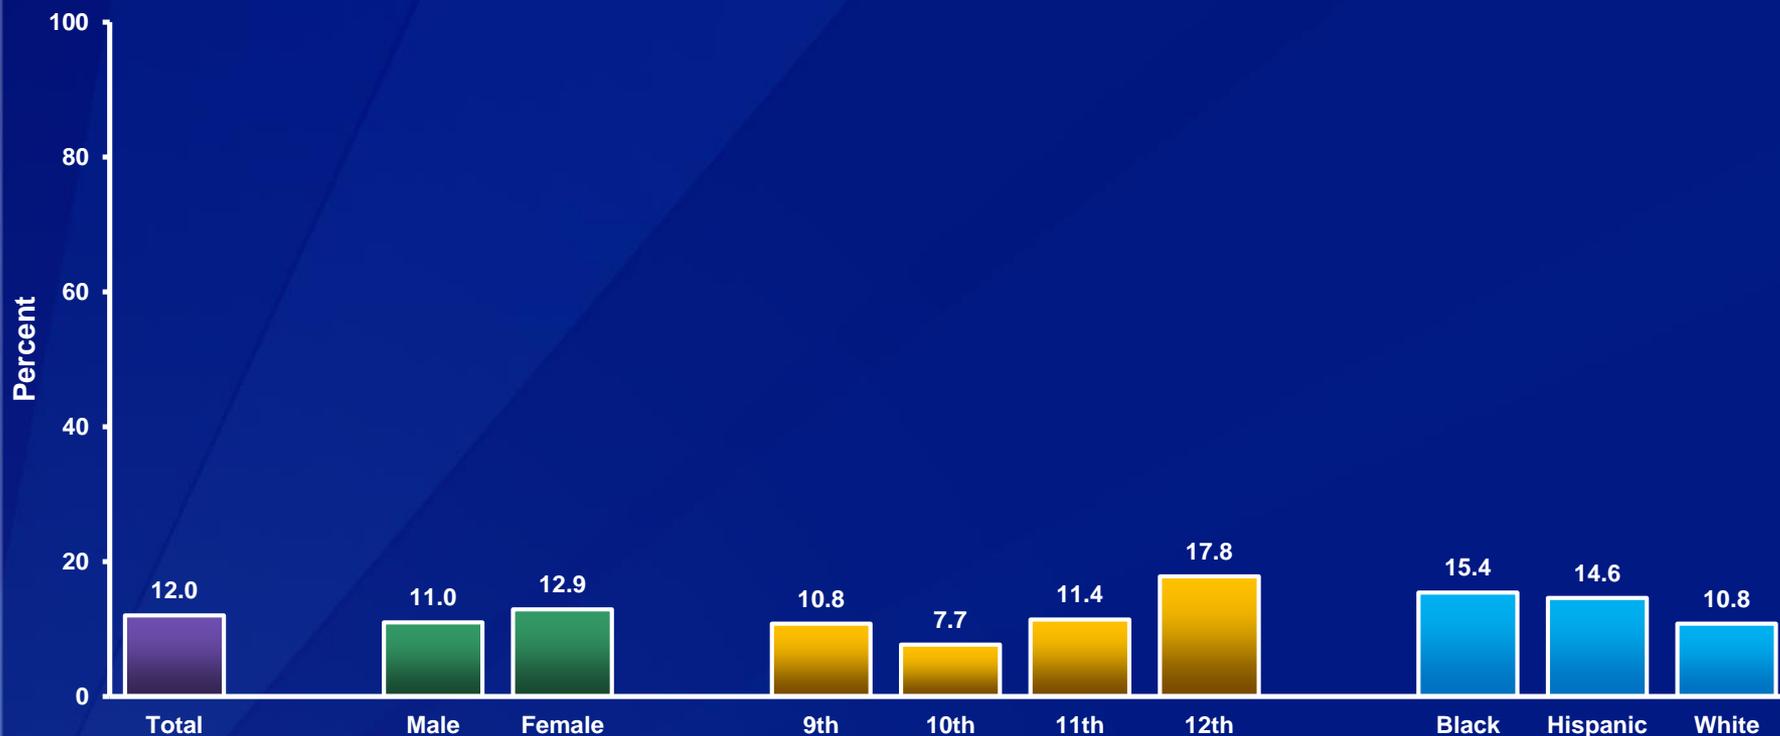

*One or more times during the 12 months before the survey

[†]M > F; 10th > 12th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Were Ever Tested for Human Immunodeficiency Virus (HIV),* by Sex, Grade,† and Race/Ethnicity, 2017

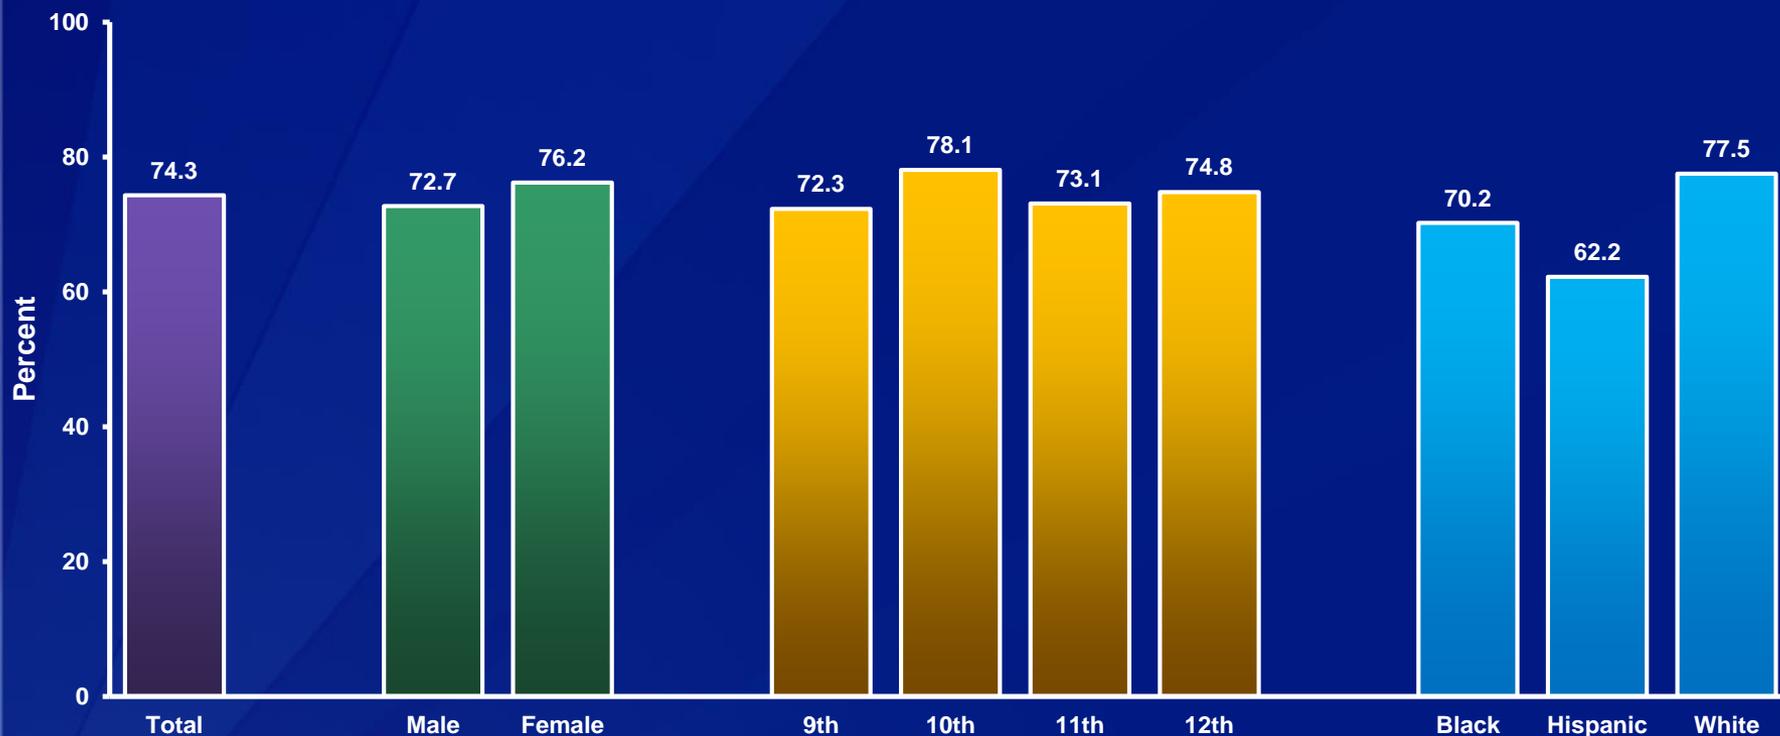

*Not counting tests done if they donated blood

†12th > 10th, 12th > 11th (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Saw a Dentist,* by Sex, Grade,† and Race/Ethnicity,† 2017

*For a check-up, exam, teeth cleaning, or other dental work, during the 12 months before the survey

†10th > 9th; W > H (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

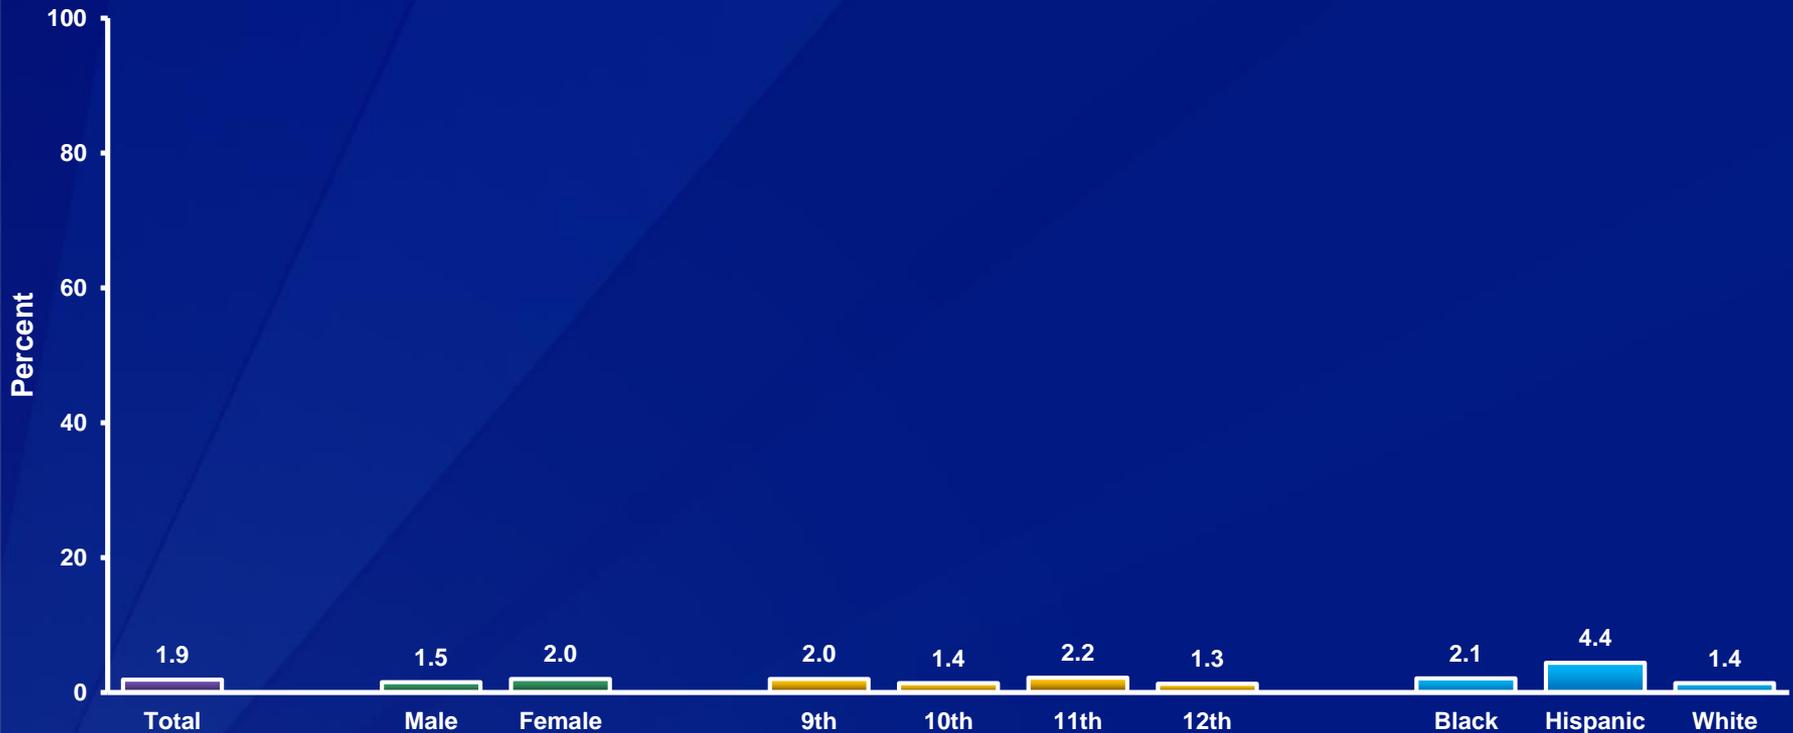

Percentage of High School Students Who Saw a Dentist,* 2015-2017†

*For a check-up, exam, teeth cleaning, or other dental work, during the 12 months before the survey

†Increased 2015-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Never Saw a Dentist,* by Sex, Grade, and Race/Ethnicity, 2017

*For a check-up, exam, teeth cleaning, or other dental work

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

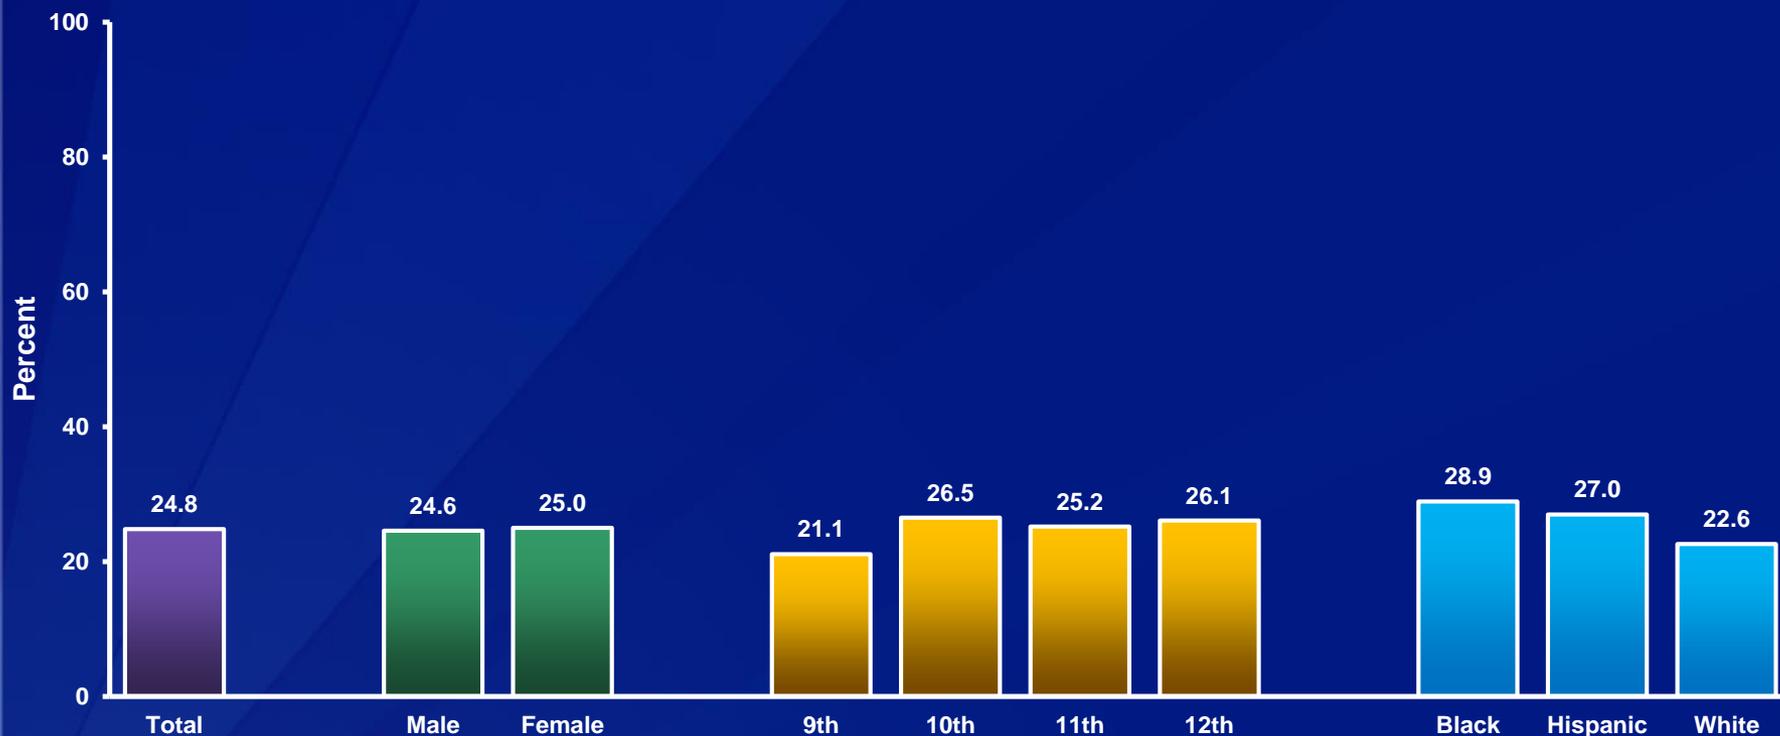

Percentage of High School Students Who Never Saw a Dentist,* 2015-2017†

*For a check-up, exam, teeth cleaning, or other dental work

†No change 2015-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Had Ever Been Told by a Doctor or Nurse That They Had Asthma, by Sex, Grade, and Race/Ethnicity,* 2017

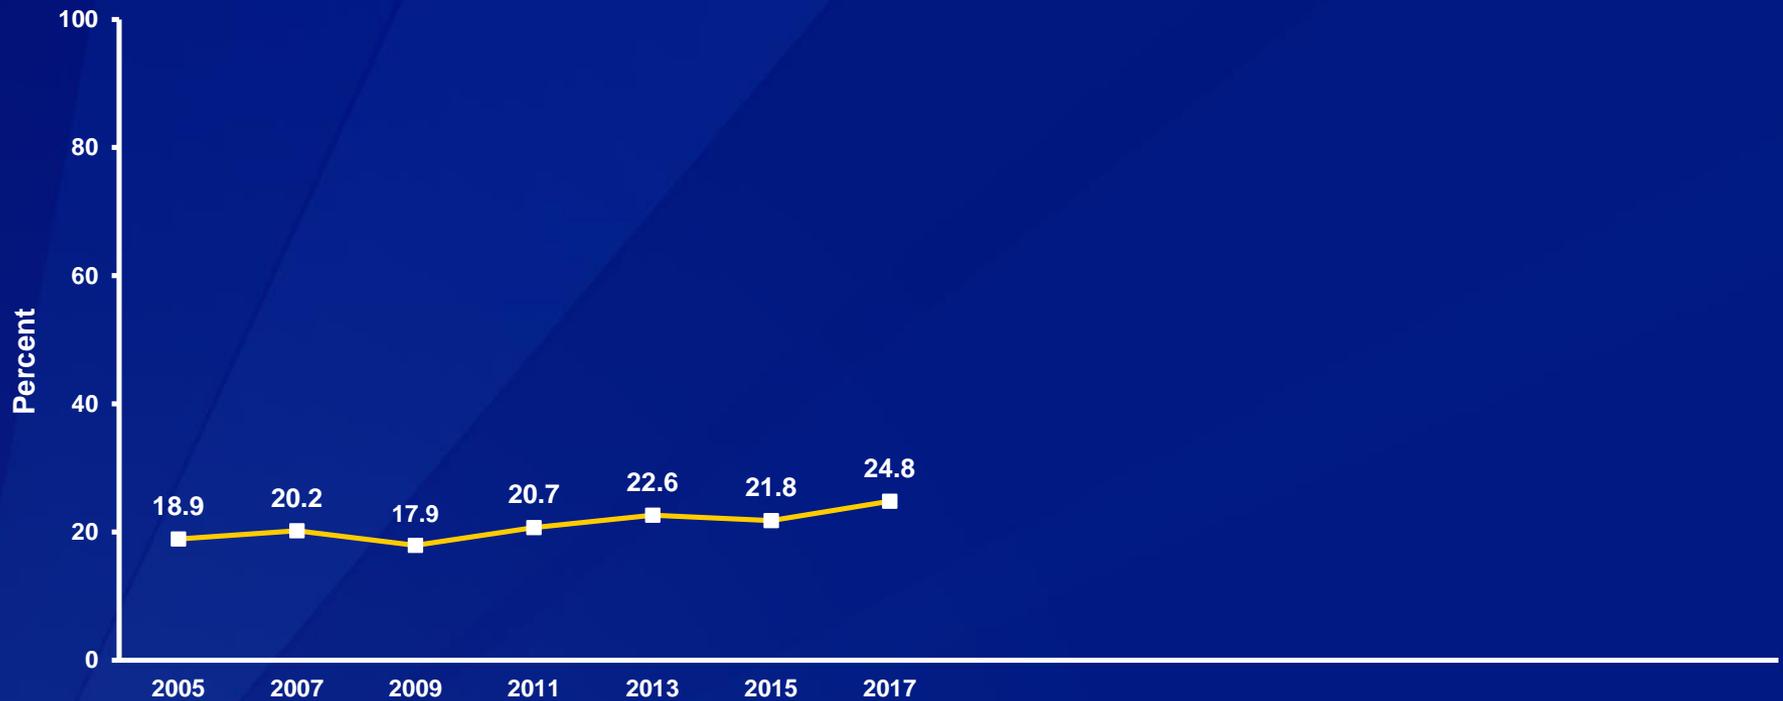

*B > W (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

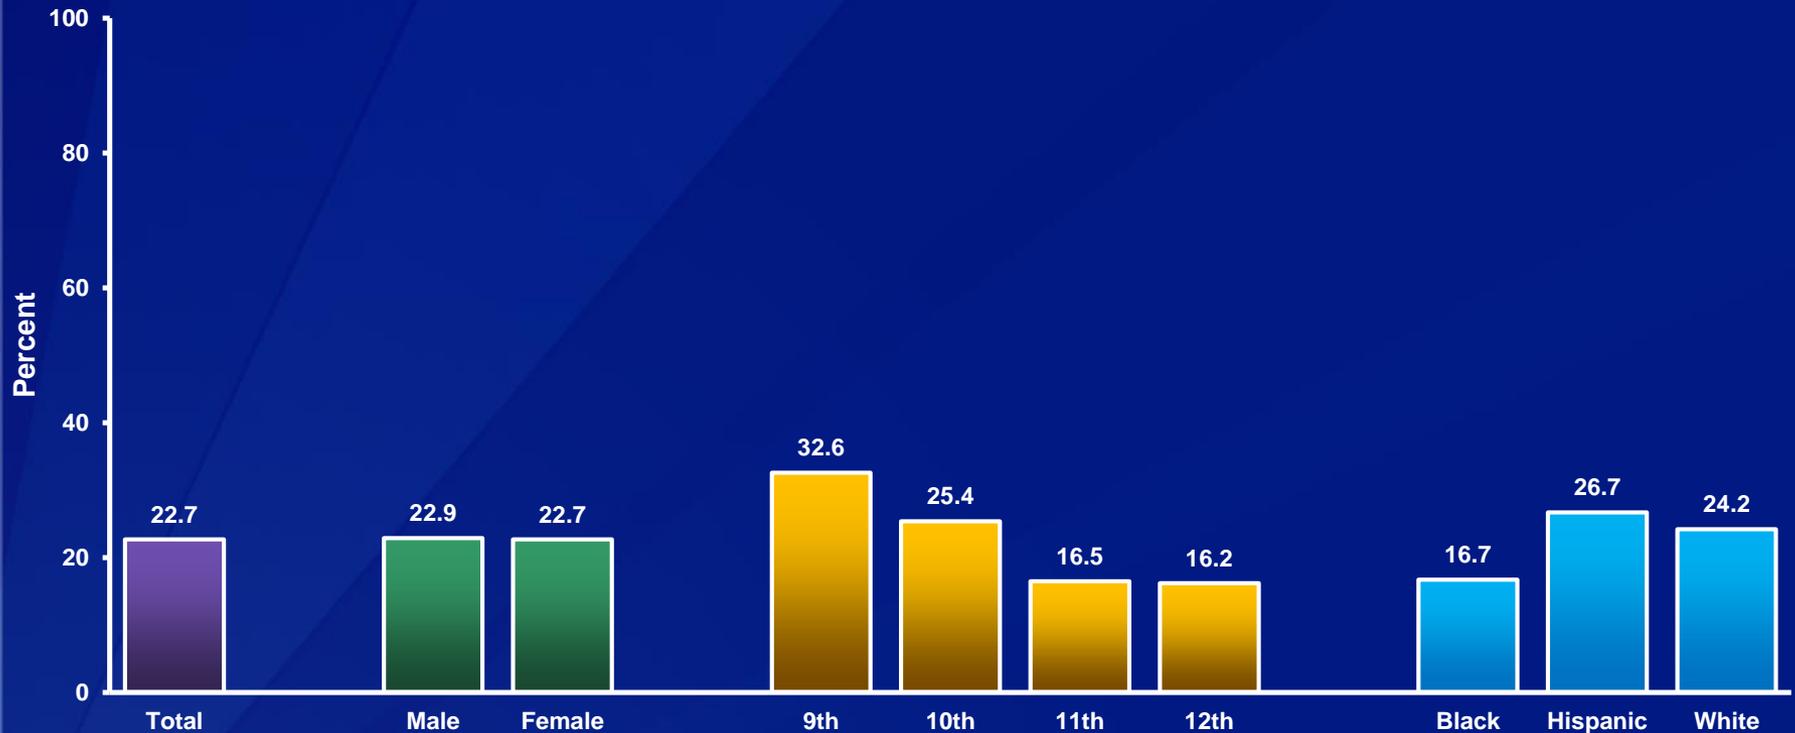

Note: This graph contains weighted results.

Percentage of High School Students Who Had Ever Been Told by a Doctor or Nurse That They Had Asthma, 2005-2017*

*Increased 2005-2017 [Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$). Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).]

Percentage of High School Students Who Got 8 or More Hours of Sleep,* by Sex, Grade,† and Race/Ethnicity,† 2017

*On an average school night

†9th > 10th, 9th > 11th, 9th > 12th, 10th > 11th, 10th > 12th; H > B, W > B (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

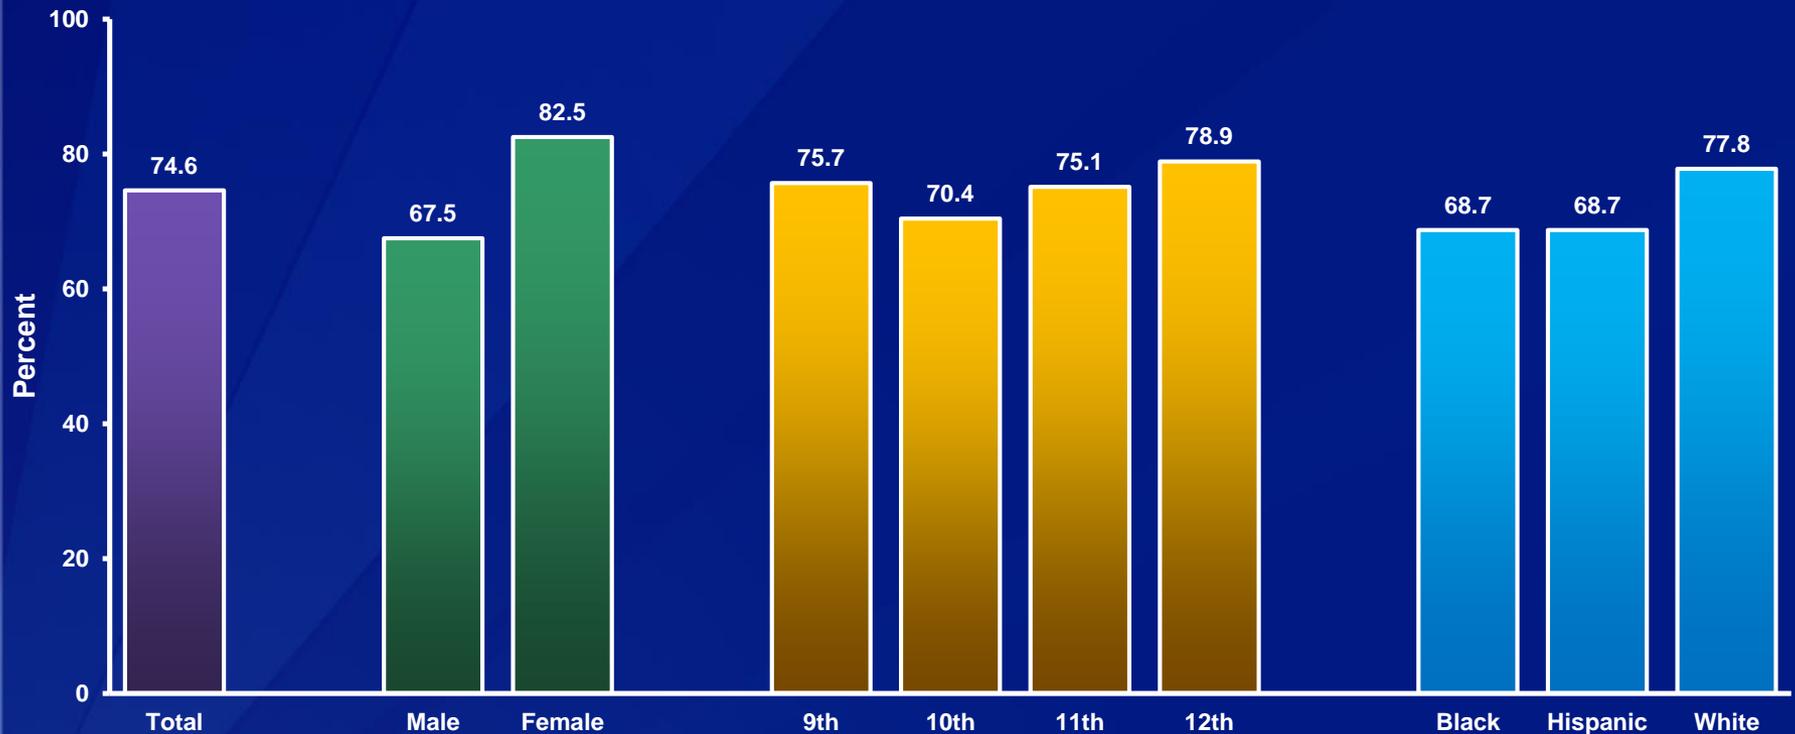

Percentage of High School Students Who Got 8 or More Hours of Sleep,* 2013-2017†

*On an average school night

†No change 2013-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]

Percentage of High School Students Who Described Their Grades in School As Mostly A's or B's,* by Sex,† Grade,† and Race/Ethnicity,† 2017

*During the 12 months before the survey

†F > M; 12th > 10th; W > H (Based on t-test analysis, $p < 0.05$.)

All Hispanic students are included in the Hispanic category. All other races are non-Hispanic.

Note: This graph contains weighted results.

Percentage of High School Students Who Described Their Grades in School As Mostly A's or B's,* 2013-2017†

*During the 12 months before the survey

†No change 2013-2017 [Based on linear trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade ($p < 0.05$).]
